

B R Y D G E

1 INSERT/REMOVE

Place your Brydge on a flat surface, rotate the hinges upright to 90° and insert your tablet into the hinges.

To remove, hold your tablet and pull straight up, with one hand firmly holding your Brydge against a hard surface.

2 POWER

To manually power **ON**, press and hold the power key (the light will blink green to indicate the keyboard is on).

To manually power **OFF**, press and hold the power key for 3 seconds (the light will blink red to indicate the keyboard is off).

NOTE: To conserve battery, your Brydge will enter sleep mode after 15 minutes of non-use. Your Brydge will also enter sleep mode when both devices are closed like a laptop. Press any key to turn back on.

3 PAIR

Once the keyboard is on, press and hold the Bluetooth™ key for 3 seconds. The power key will flash blue indicating your Brydge is ready to pair.

On your tablet, under the Bluetooth settings select Brydge G-Type. The power key will stop blinking blue when the pairing is complete.

4 CHARGE

To charge your Brydge insert the supplied USB-C cable into the charging port on your Brydge. The battery is charging when the light on the power key is red; the light will turn off when the battery is fully charged.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
