Charging

If the bluetooth indicator light keeps flashing while you are working, the battery power is low and the device needs to be recharged.

Step 1: Connect the Micro USB power cable to the keyboard charging connector.

Step 2: Connect the USB cable to the computer's USB interface or USB power adapter.

Step 3: The Charge red indicator light will stay on when the device is charging. Once charged full, the green indicator light will turn off. Charging time is 3-4 hours.

Troubleshooting

(A) Unable to connect

1. Make sure the power switch is turned on
2. Make sure the keyboard or the speaker is within the operating distance
3. Make sure the battery is charged
4. Make sure iPad Bluetooth setting is at on status
5. Make sure bluetooth keyboard or speaker is connected to iPad
6. Make sure the bluetooth keyboard has been paired with the iPad

(B) Unable to charge

Make sure the USB power cable is connected properly to the keyboard and the power source

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

CAUTION: 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
