### 11. Troubleshooting problems

#### 1. The phone cannot search for wireless earbuds.

- (1) Check if the left earphone is flashing slowly (already paired with the host automatically), and the right earphone (host) red and blue lights flash alternately, wireless earbuds search mode
- (2) If wireless earbuds is still not connected to the headphone, please put the left and right headphones into the charging box. After that, try again and the wireless earbuds connected device will restart at the same time;

#### 2. wireless earbuds headphones always disconnected after connecting with wireless earbuds device.

- (1) Power is insufficient, please charge the wireless earbuds headphones as soon as possible;
- (2) The distance between the wireless earbuds device and the wireless earbuds headphones exceeds the wireless earbuds reception distance.

#### 3. Do you need to re-search to connect to wireless earbuds every time you use it?

No, as long as you have connected the TWS-T02 wireless earbuds headphones once, when you take it from the charging box, wireless earbuds will connect to your wireless earbuds device automatically.

#### 4. When I use the wireless earbuds headphones to make a call, only the right earphone can hear the sound, if I want to change to the left ear, can I hear the call?

Because only the main earphone can connect to the phone when answering the call, you can only hear the voice from one side of the headphones. If you want to set the left earphone as the main earphone, please follow the instructions in section 9 to change the setting operation of main earphone.

#### 5. Do I have to turn it on manually before and after use, how about shut down?

No, open the lid of the charging box, and take out the earphone, it will automatically turn on. When you put the earphones back inside the charging box, the earphones are automatically turned off and charged again. When you remove the box, Bluetooth automatically connects to your Bluetooth device.

#### 6. If the headphones are removed and not used for a long time, whether the headphones will wait for the power to run out and then shut down?

No, the headphones will automatically shut down after 15 minutes without using it.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
