12. 🗣️ The microphone

PRODUCT SPECIFICATIONS

Main device parameters

output power: 4Wx2

frequency response: 180Hz-20KHz

driver: 1.5"

power supply: USB ,DC 5V=500mA

distortion: ≤0.5%

S/N: ≥80dB

battery capacity: 2000mAh

battery time: up to 4 hours

battery charging time: 4.5-5 hours

product size: 206x74x65mm

product weight: 440g

IP rating: IP66

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
