## Functional Menus

### 1.1 File manager

Use File manager to organize your files in folders.

If a memory card is inserted, the files stored on it are organized separately.

Select Phone or Memory card and select Options to browse, copy,

delete, and move the files in folders.

- **Open:** Select to open the Received files, Images, Audio, E-book, my music, and Photos.
- **Format:** Format the phone or memory card.

## **1.2 Phonebook**

You can store the name and telephone number in the phone memory or the SIM card.

Up to 500 pairs of numbers and names can be stored in the phone memory.

- ◆ The storage capacity of the SIM card is determined by the type of the card.

## **1.3 Fun & Games**

### **1.3.1 WhatsApp**

Log on WhatsApp through a web page.

### **1.3.2 Opera Mini**

Log on Opera Mini through a web page.

### **1.3.3 FaceBook**

Log on FaceBook through a web page.

### **1.3.4 YouTube**

Log on YouTube through a web page.

### **1.3.5 Java**

Java is a folder where downloaded games and applications are stored.

### 1.3.6 Java settings

You can set the java audio(1-7 or off), Java backlight(on/off), Java vibration(on/off), Select SIM and Heap size.

### 1.3.7 Java default security

Set Java default security related parameters as needed.

## 1.4 Call center

### 1.4.1 Call history

You can view Missed calls, Dialed calls, Received calls through this function, as well as delete all log etc.

### 1.4.2 Call settings

- **Call waiting:** After you choose Activate, the mobile phone will contact the network. A moment later, the network will make a response and send a message to acknowledge your operation. If the call waiting function is activated, the network will alert you and the mobile phone screen will display the incoming call number if others are calling you while you are already in a conversation.
- **Call divert:** this network function enables you to forward incoming calls to another number you have previously specified.
- **Call barring:** The call barring function enables you to bar calls as needed. When setting this function, you need to use a network barring code, which can be obtained from the network operator. If the code is wrong, an error message will be prompted on the screen. After selecting a call barring option, continue to select Activate or Deactivate. The mobile phone will prompt you to input the call barring code and then

contact the network. A moment later, the network will make a response and send the operation results to the mobile phone.

- **Line switching:** Switch to Line 1 or Line 2. By default, Line 1 is used.

- **Advanced settings**

- **Black list:** you can set many numbers. When this Black list is enabled, you won't receive the calls from the numbers entered in the Black list.

- **Auto redial:** Set it to On or Off to enable or disable auto redial. If you set Auto redial to On, the mobile phone will automatically redial the number a moment later if the called party does not reply. The number of auto redial times can be set to a maximum of 10. In the auto redial period, you cannot dial other numbers. To end the auto redial process, press the End key.

**Note:** This function requires support from the network operator to which the SIM card is registered.

- **IP dial:** You should set the IP number first.
- **Background sound:** To set playback settings and effect list.
- **Call time reminder:** To set single or circle tone in a call to make you know the time.
- **Auto quick end:** You can select to turn on/off this function.
- **Reject by SMS:** You can select to turn on/off this function.
- **Answer mode:** Select an answer mode as per your need.

## 1.5 Messaging

The phone supports Short Messaging Service (SMS) and Multimedia Message Service (MMS). You can send text messages and manage the messages that you sent and received.

In the standby mode, go to the main menu by pressing the left soft key, and then select message center to enter into the message

interface.

In the message, select the options to see operate the other new menu.

You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling. of such hazardous waste.

## Warning

Specific Absorption Rate (SAR) information SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output. Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this mobile phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 5mm from the body.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
