## Information

Read this information before using your mobile device otherwise may result in personal injury or your device not complying with local laws.

### **Battery:**

If a conductive material such touches the exposed terminal, short circuit may occur resulting in

property damage, bodily injury or burn. To avoid risk of leaking electricity, take care when handling a charged battery particularly when placing it inside your pocket, purse or other container with metal objects.

**Keep your mobile device from water:**

Keep your mobile device dry.

**Use while driving**

Always obey the laws and regulations on the use of mobile devices in the area where you drive.

Give full attention to driving and the road; use hand-free operation or earpiece if a call is needed.

**Aircraft**

Mobile device may cause harmful interference so turn off your mobile device before boarding an airplane.

**Blasting areas**

Always obey the related limits and regulations and do not use your mobile device in blasting

areas. Turn off your mobile device in areas posted "turn off electronic devices".

**Potentially explosive atmospheres**

Turn off your mobile device in the gas station and areas near fuel and chemical containers. Turn off your mobile device in areas posted "turn off electronic devices".

**Medical devices**

Turn off your mobile device whenever instructed to do so by posted signs near some medical equipment. Mobile device may interfere with pacemakers, hearing aids and some other medical

transplanting equipment. Do not put your mobile device near pacemakers nor carry in the breast pocket.

**Accessories and battery**

Use the accessories, batteries and chargers approved by manufacturer. Use of batteries not approved by manufacturer may cause injury.

**Emergency calls**

Turn on your phone and keep it in service areas, dial emergency phone numbers and then press send key to make a call.

**When losing your phone**

To avoid any economy damage, please inform the Tele-communication Company or agencies to lock your SIM card when you lost your phone.

When you inform the telecom company or agencies to lock your SIM card they need to know the IMEI No. of your phone, which you can find printed on the label on the back of your phone when taking off the battery. Please backup this number for future need

For safety consideration, you can make preventative measures such as set PIN Code for your SIM card to prevent other persons using your SIM card without your permission.

**Keep away from children**

Keep the phone, battery and charger away from children to avoid any personal injury.

---

## **2. Use and Care**

**To care for this mobile device, keep it away from:**

**Any kind of fluid**

Keep the device away from water, rain, humidity, sweat or other moisture.

**Extreme heat or cold**

Avoid the temperature below  $-10^{\circ}\text{C}/14^{\circ}\text{F}$  or above  $45^{\circ}\text{C}/113^{\circ}\text{F}$ .

**Microwave**

Don't try to dry your phone in a microwave oven.

**Dust and dirt**

Don't expose your phone to dust, dirt, sand, food or other inappropriate materials.

**Cleaning solutions**

Use only a dry soft cloth to clean your phone. Don't use alcohol or other cleaning solutions.

**Ground**

Don't drop your phone.

## 3. Essential

---

### 3.1 Turn it on/off

**Caution:** On power up, the phone may prompt you to enter your SIM card PIN code to unlock

the SIM card. If your phone shows Input PUK code that express your SIM card is locked, please contact your web service provider.

To turn on your phone, press and hold the power on/off key for two seconds. If prompted, enter your four-to-eight-digit SIM card PIN code and/or four-digit unlock code.

If you don't insert a SIM card, your phone shows **Insert SIM**. None of the functions related to SIM card can be used and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

## 3.2 Make a call

1. Under the sleep mode, input the telephone number directly.
2. Steps will be different according to the options of call settings and set-ups of dual SIM:  
**Dual SIM open:** Then press send key, you can choose menu -- **SIM 1/SIM 2** to dial calls.  
**Only SIM 1 open/ only SIM2 open:** If set only SIM1 or only SIM2, you can press send key to dial calls.
3. After calling, press the power on/off key or end key to end.

### 3.3 Answer or Reject a call

When there is an incoming call, the phone rings and /or vibrates showing the number or the corresponding name.

Now the phone provide three mode,

**Not any key(set in User profiles):** Press **answer key** or enter **option** and then select **answer** to receive a call. If you don't want to answer, you can press the power on/off key or right soft key.

**Any key:** Except power on/off key and right soft key, press any key to answer a call.

**Earphone/Bluetooth mode:** when plugging the earphone(including bluetooth earphone), you can answer a call by pressing the key on the earphone; when you are not convenient to press the key, you can turn on the auto-answer mode (only in earphone mode) and make sure the earphone is plugged, your phone auto-answers a call 5 seconds after it rings and/or vibrates.

### **3.4 Operation during a call**

Press **Option** to perform following operation during a call:

**Hold:** Hold this call

**End:** Hang up and end this call

**New Call\*:** Enter a new dialing display to make a new call  
**Phone Book:** Enter the phone book  
**SMS:** Enter messages  
**Mute:** Set mute on or off. When setting mute on, your voice can not be heard through the line.  
**Swap\*:** Switch between the current call and the holding call  
**Conference\*:** You can add additional parties to a call. \

**Note:** the menus marked with \* must be supported by your SIM card. For details, please

contact your service provider. Only when two or more calls are on can **Swap** and **Conference** show.

### **3.5 Insert international access code**

When you are dialing an international call, tap \* **key** till the international call prefix “+” shows and then enter the number in the following order:

+ Country code complete number send key

### **3.6 Dial a extension or voicemail number**

You need to enter P (pause) or W (wait) when dialing an extension number, keep press \* **key** to switch between 'P' and 'W'. You can enter numbers as following:

District code    exchange phone number    P or W    extension number    send key

### **3.7 Emergency calls**

You can make emergency calls as long as your current location is network-covered which you can know by checking the signal strength bar showing on the top left corner of the screen.

**Note:** Emergency numbers vary by country. The emergency number(s) in your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

**Tips:** if all suggests and solutions can't solve your problem, please contact authorized after service center. Please do not disassembly or repair your phone without professional guide. Thank you!

## **Battery Tips**

---

- The machine is provided by the reusable rechargeable battery.

- The new battery only can by two or three times full charge and discharge cycle to achieve optimum performance.
- Battery can be recharged many times for repeated use, but it will eventually be exhausted. When the talk and standby time is significantly shorter than usual, then need to replace a new battery.
- Use the battery the handset manufacturers approved only, and use the authorized charger for the battery charge only.
- Cut off the power supply when do not use the charger.
- Do not connect a battery to a charger more than one week, the long time charge will

affect battery life.

- The battery storage for too long would affect the results. And the battery will automatically discharge as long time unused.
- Do not use a damaged battery or charger.
- Never expose batteries to temperatures below  $-10^{\circ}\text{C}$  ( $14^{\circ}\text{F}$ ) or above  $45^{\circ}\text{C}$  ( $113^{\circ}\text{F}$ ).
- Always take your phone with you when you leave your vehicle.
- It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.
- Do not let the batteries short-circuit. When metal objects (such as: coins, etc.) directly

connected to the battery anode and the cathode (with the metal side), will occur short-circuit accident. In the pocket or handbag carry a spare battery should be particularly careful. Short-circuit will damage the battery.

- Please deal with the waste batteries according to the relevant provisions.
- Never dispose of batteries in a fire because they may explode.

## Product Maintenance

---

Your phone is a product with outstanding design and superior quality, please take good care using it. You are strongly suggested to take the following advice which should help you stick to the warranty in order to extend the usage period of the product.

- Keep your phone and its parts away from children.
- Keep your phone dry. Keep it away from rain, damp or any kind of fluid.

- Don't touch your phone with wet hands when charging or there may be bodily injury or damage to the phone.
- Keep your phone away from extreme heat which can shorten your phone's life, damage the battery, twist or melt some plastic parts.
- Keep your phone away from extreme cold because when the temperature grows up, water vapor accumulated from inside the phone may damage the electronic circuit.
- Keep your phone away from dust and dirt.
- Keep your phone away from ignited cigarettes, fire or heat source.
- Don't disassemble your phone by yourself.

- Don't drop, beat or shake your phone. Any rude treatment can damage the inner electronic circuit board.
- Don't daub your phone because paint would jam-up the earpiece, microphone or any other removable part and disable your phone.
- Clean the pc camera or screen with neat, soft and dry cloth. Don't use alcohol or other cleaning solutions.
- If your phone, battery, charger or parts can't work, please take them to the authorized service center for help.

## FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: K100(FCC ID: Y7WPLUMK100) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.62W/kg and when properly worn on the body is 0.39W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
