1 Main function

Function	Description
COMMAX Widget	Display of widget type such as today's weather, indoor temperature and humidity, smart plug electricity amount, absence information
Login and Membership	User subscription and login to use UC and Cloud
My Reporter	To view and set the integrated value information provided by the app
COMMAX launcher	Support for space control / editing / addition to the main screen and main functions (weather, uick menu, household device information, individual device control)
Scene control	It is main functions that can display basic values (away, burglar), appear user-specified scenes, and register new scenes and delete
My house coach	Offer various lifestyle tips to users by apps
Device control	Funciton to control a wireless device that works with wall-pad
Apps	Show all apps that are registered in the wall-pad
Door call / recording	Video call with IP door and recording function through IP network
House to call	Call between household and another household through IP network
Lobby call / recording	Video call to lobby and recording function by IP network
uard call	Voice call to guard station by IP network
Call list	Checking the call list and recorded video of lobby phone and IP Door

CCTVlive view/ recording	Real-time and CCTV video monitoring service Fucntion to display and record multiple images on two or more monitors
CCTV video recording view	Check recorded CCTV images by date
Security fuction	Using wireless IoT sensor (magnetic, PIR) to away, burglar, emergency handling
Scenario Control	Multi-control function for device by user condition
System management	Manual setting of the basic environment (IP setting, etc.) by the user
Automatic device registration	User can register interlock device (IP Door, CCTV, IoT device, etc.)
COMMAX Setting	IP and various environce setting for lobby call and system operation
Mobile call	Calls to mobile phones login ID same as wallpad
Video streaming server	Format reset function to send CCTV / Door image to external (UC)
Cloud server	Wall pad control by smartphone through cloud server
Notification	Fuction to notify emergency from your house to mobile phone

2.1. Editing a space list

- 1) 'Press an empty space on background screen for one second.

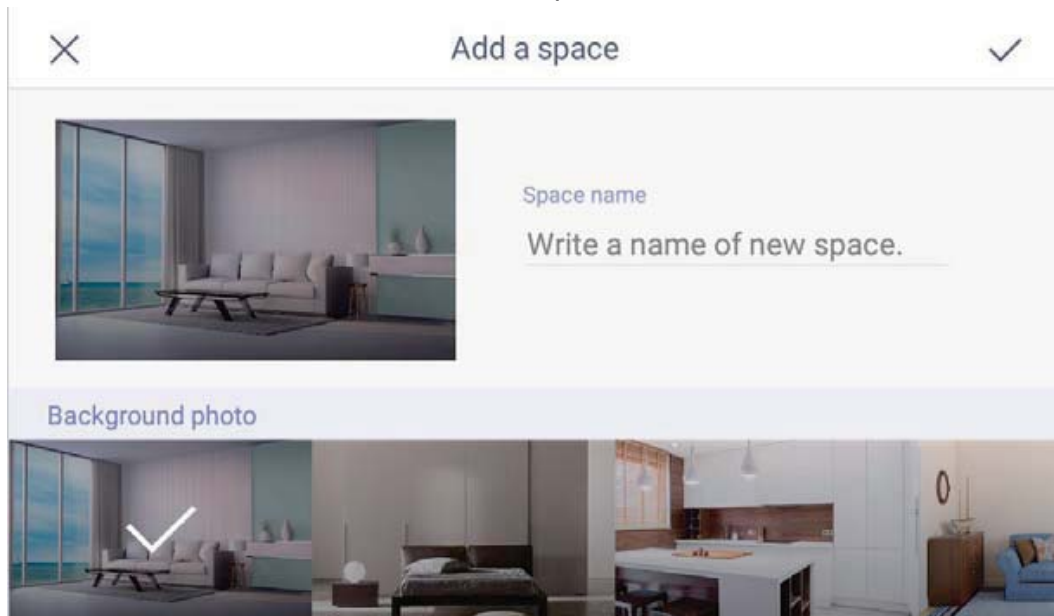

- 2) Drag the space you want to move and move it to the desired location
- 3) Press the "X" button to delete the space.
- 4) Press "+" button to add space
- 5) Press the Cancel button to cancel editing.
- 6) Press the 'complete ' button to save the space list.

Adding Space

- 1) Enter the name of the space.

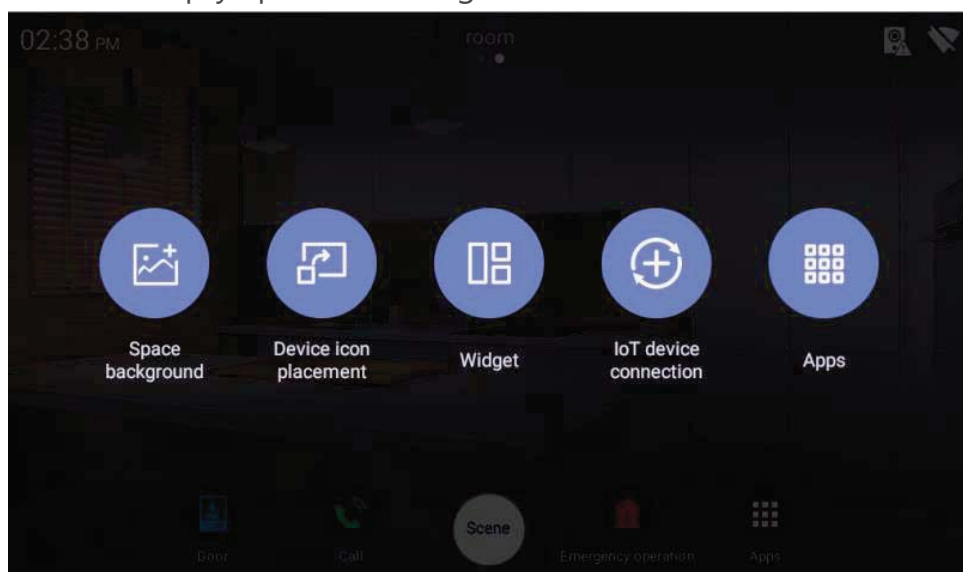

- 2) Press "Enter" on the keyboard.
- 3) Select a space image .
- 4) ✓ 'Press 'OK' button to add space.
- 5) ← 'Previous' button will move to previous screen

2.2. Registering a device

Method 1.

- 1) Press an empty space on background screen for one second.

- 2) Press register IoT Device

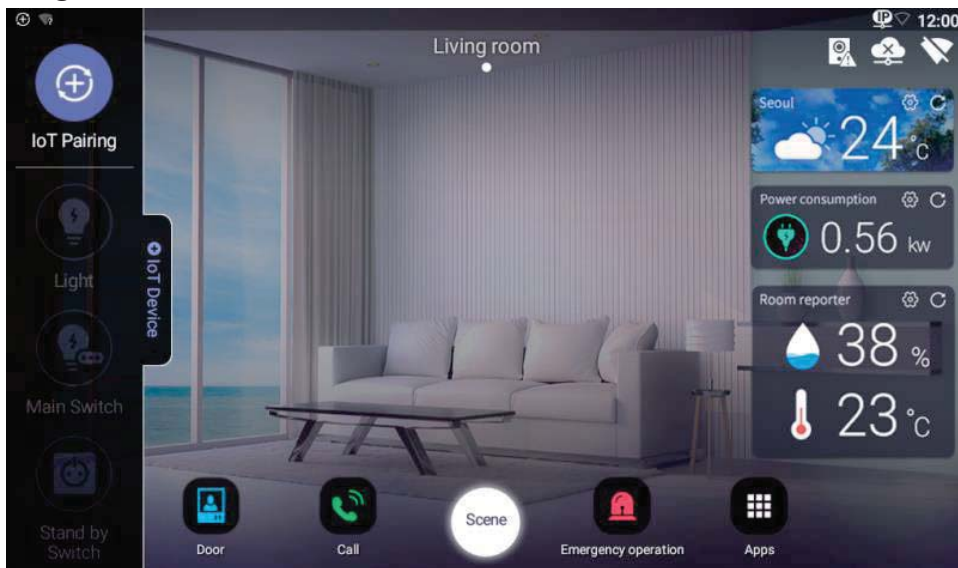

- 3) Connect the device according to the device pairing method..
- 4) The device can be paired for up to 60 seconds.
- 5) Press Cancel 'button to cancel the device pairing method.
- 6) When a device is registered, the device is automatically placed on the screen

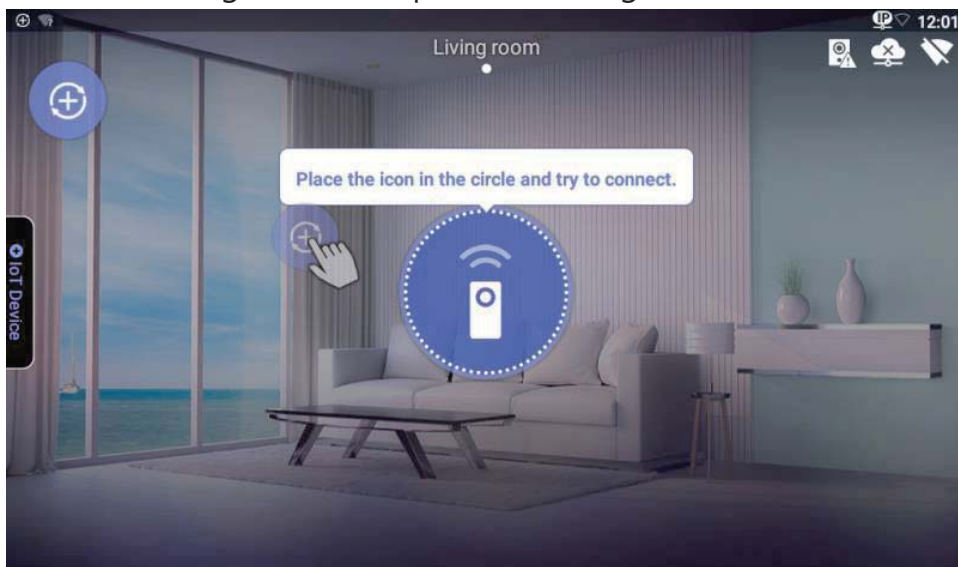

Method 2.

- 1) Drag or click IoT Device ICON leftside on screen

- 2) Click IoT Pairing ICON on upside and drag center on screen.

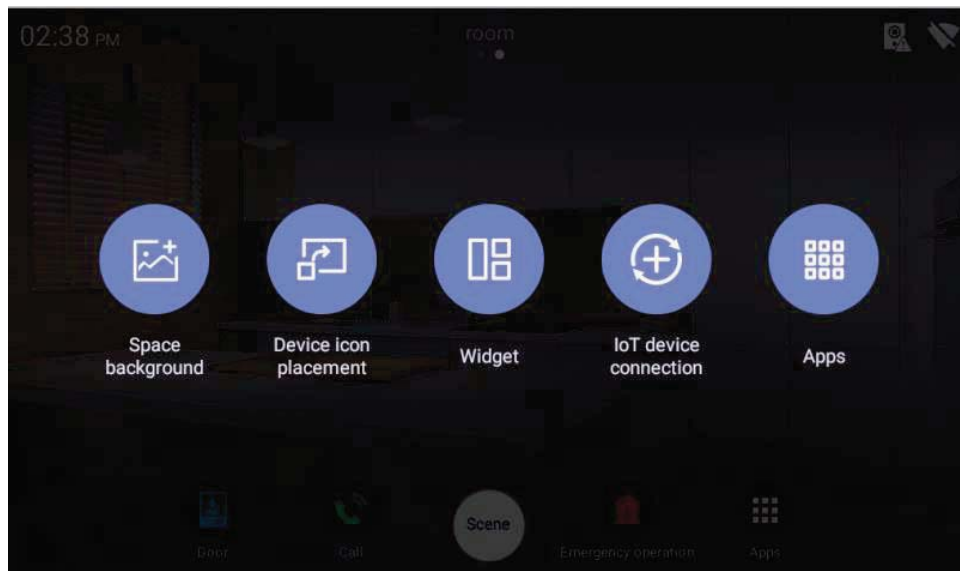

- 3) Connect the device by using device pairing method.

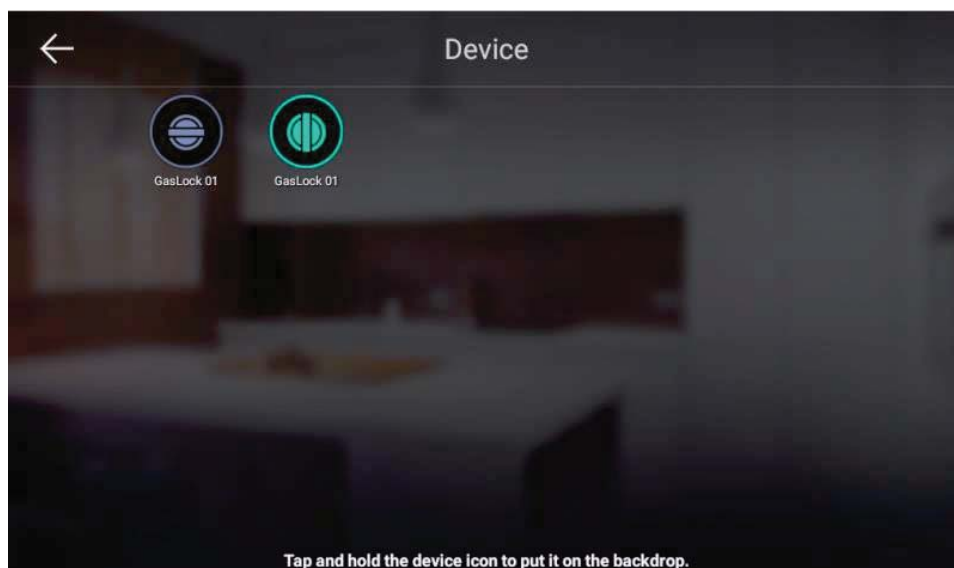

2.3. Placing device (move / delete)

Method1.

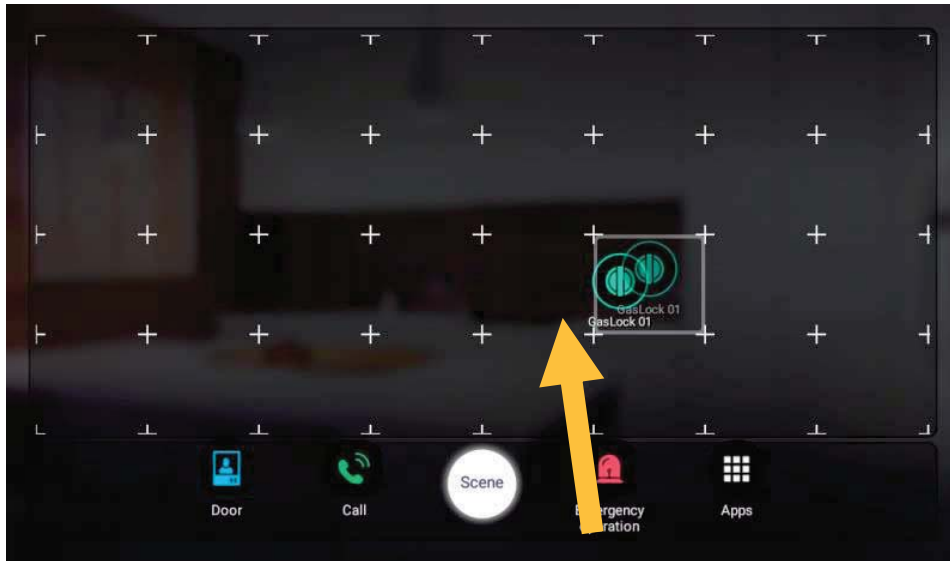

- 1) Press an empty space on background screen for one second

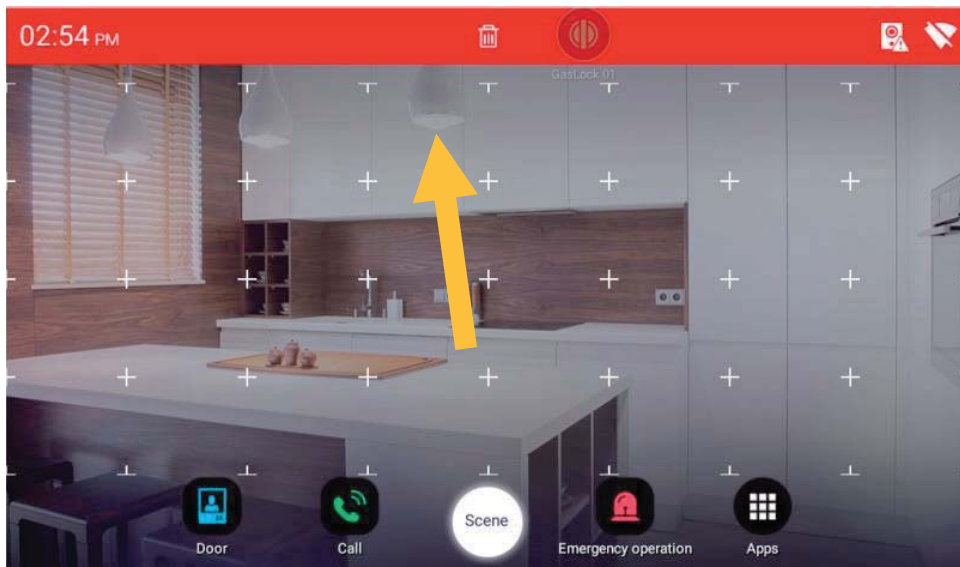

- 2) Press 'Device icon placement'.
- 3) You can move to the desired location by pressing the device you want to move.

- 4) Drag the device, move it to the desired location, and release the device
- 5) To delete a device, press the corresponding icon longer to move to the desired location..

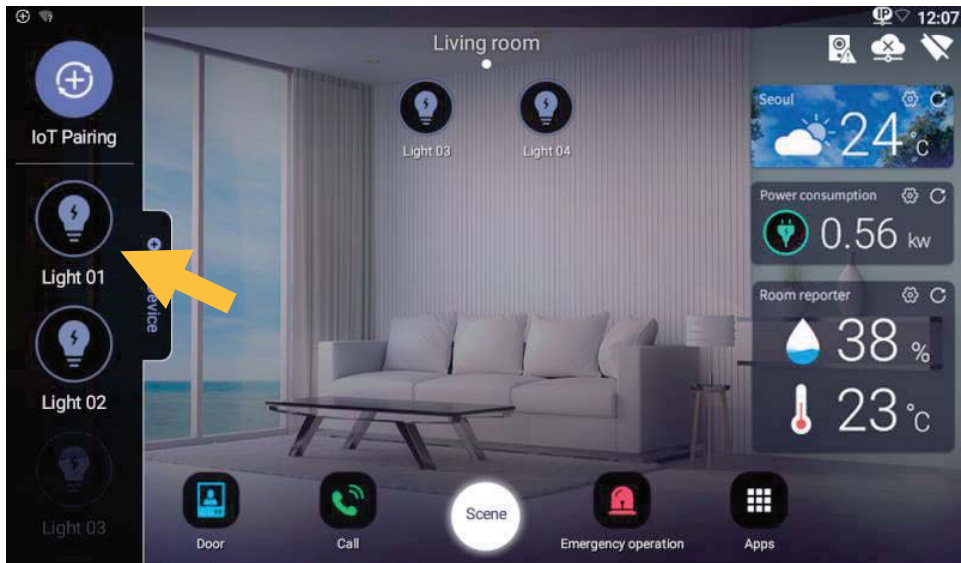

6) To delete a device, press the icon longer and move it to the upper trash...

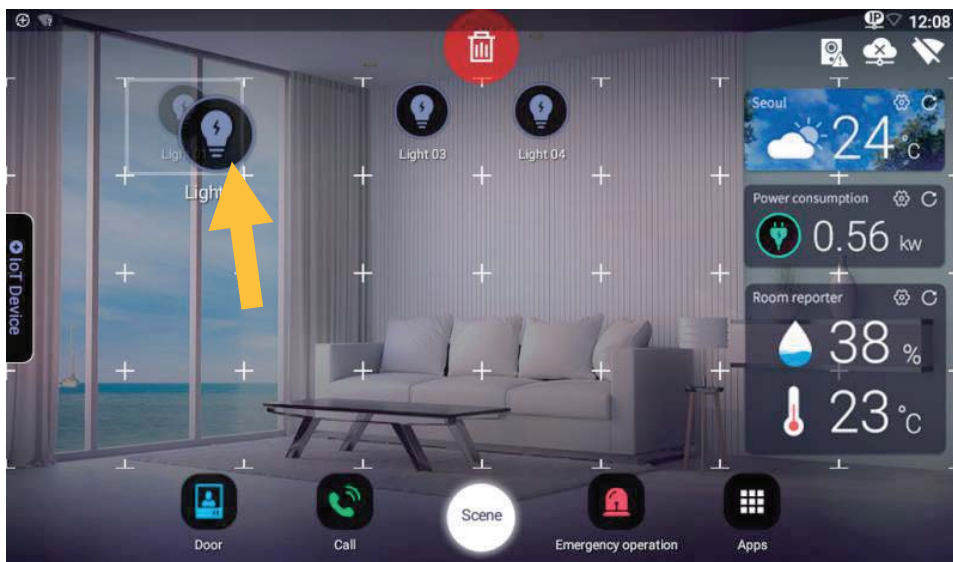

[Device delet screen]

Method 2.

- 1) Drag or click IoT Device ICON leftside on screen

- 1) You can move to the desired location by pressing the device you want to move.

- 2) To delete a device, press the icon longer and move it to the upper trash...

2.4. Controlling devices

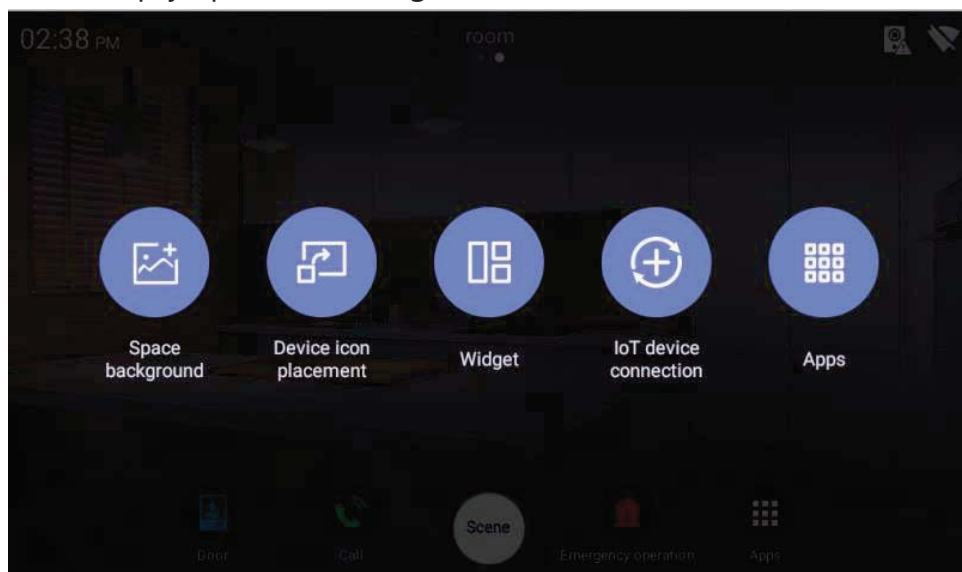

- 1) Move to the space to control.
- 2) You can turn the device on / off by pressing the device you want to control..

[The device control screen]

2.5. Widget Area

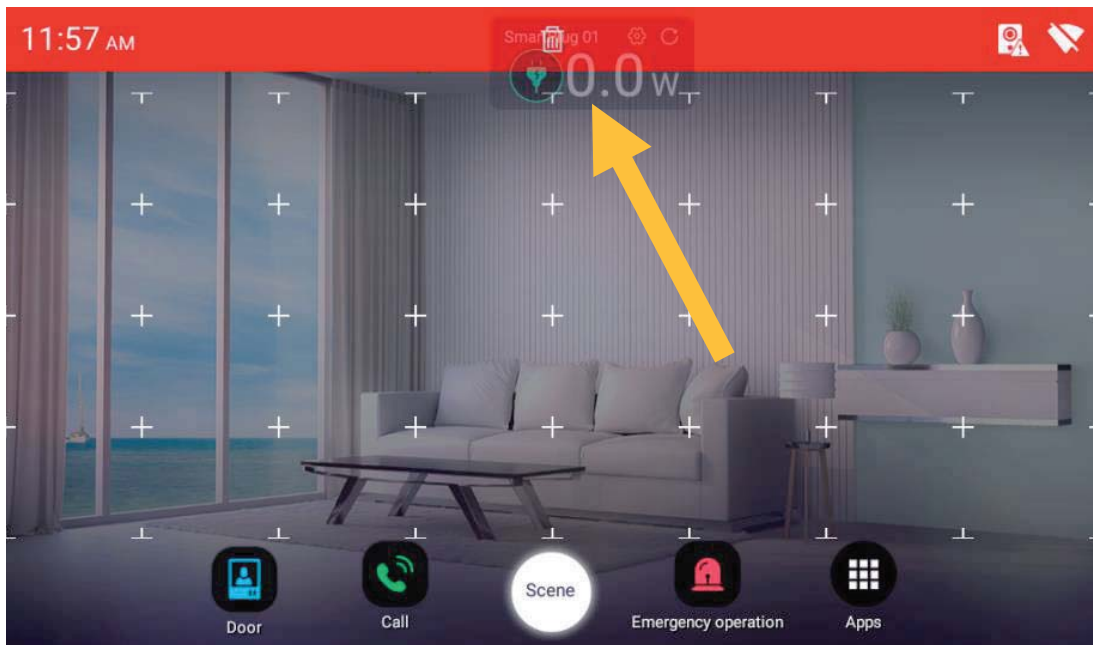

- 1) Provide a summary of our home environment and external environment information at present..
- 2) Press empty space on background screen for one second.

- 3) Press widget .
- 4) Select and drag the widget you want to display on the background

- 5) To delete a widget, press the widget longer and move it to the upper trash.

3 House Reporter

We provide value information on the screen that allows us to understand our home environment and external conditions..

[The house reporter screen]

3.1. Edit house reporter

- 1)  Press edit "buttonu
- 2)  Press the "(On / Off)" button and you can select the value information item to be displayed..
- 3)  OK "button to save the changed item.

[The house report edit screen]

3.2. Setting the weather area

- 1) 'Press the "Today's weather information" button.
- 2) Enter the name of the area to search.
- 3) Press the "Search" button..
- 4) Select one of areas from search list .

[The weather area setting screen]

4 Control

4.1. Control lighting

- 1) Go to the Lighting tab.
- 2) When you press power button of whole lightings, all lightings are turned on.
- 3) When you press power button of whole lightings, all lightings are turned off.
- 4) Press the power button of the lighting you want to control to turn the light on or off.

[Lighting Control Screen]

You can use it for calculation.

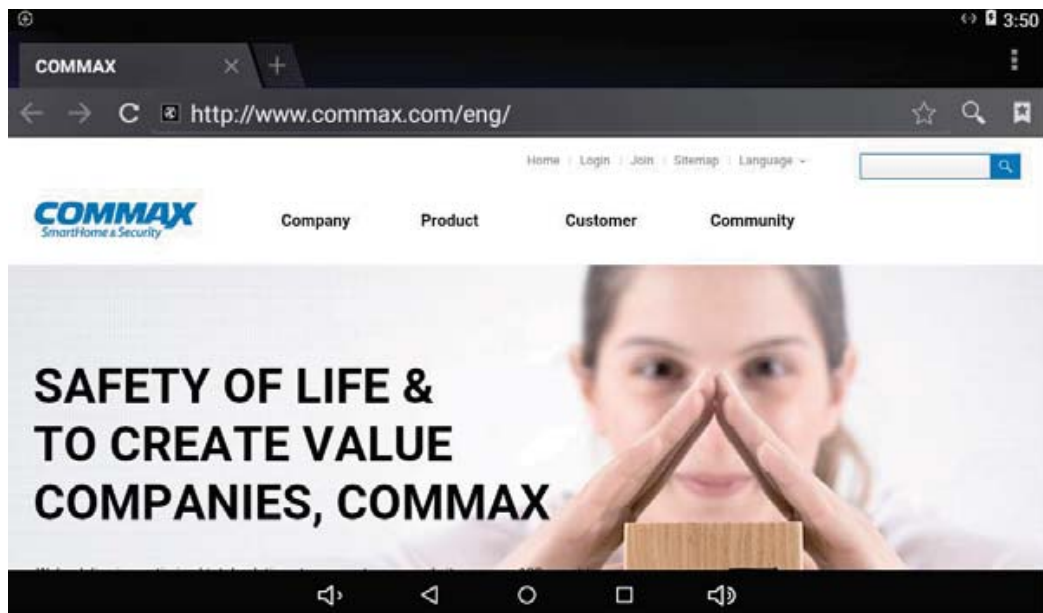

[Display for calculation]

5.6.2. Brower

This is the web browser for internet.

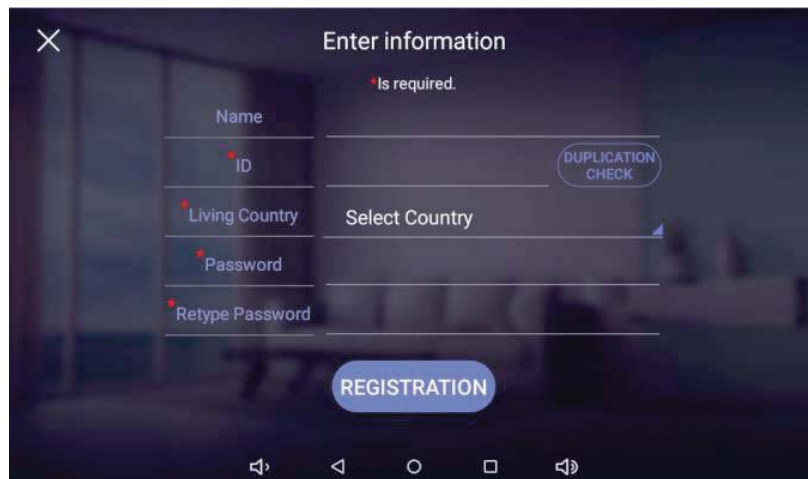

5.6.3. Sign up

Sign up / Edit / Initialization

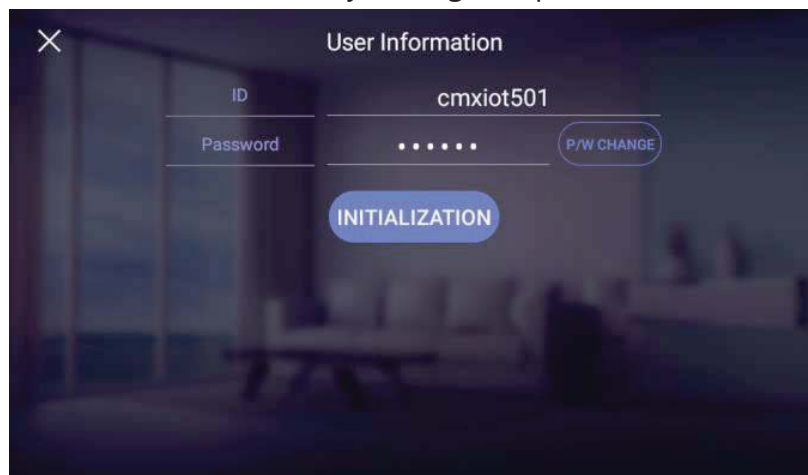

- 1) Enter 'ID' and clicc 'Duplication check'.
- 2) Select the living country.
- 3) Enter 'Password', 'Retype Password' and click 'Registration'.

[Display for Sign-up]

Edit & Initialization

- 1) If you have already sixed up, you can see the current ID on the display. You can change the passward to click 'P/W change' button..
- 2) When you click 'Initialization', all your sixed up information will be deleted

5.7. Wallpad setting

You can set the user information, wallpad, controlling devices, Door camera and other devices.

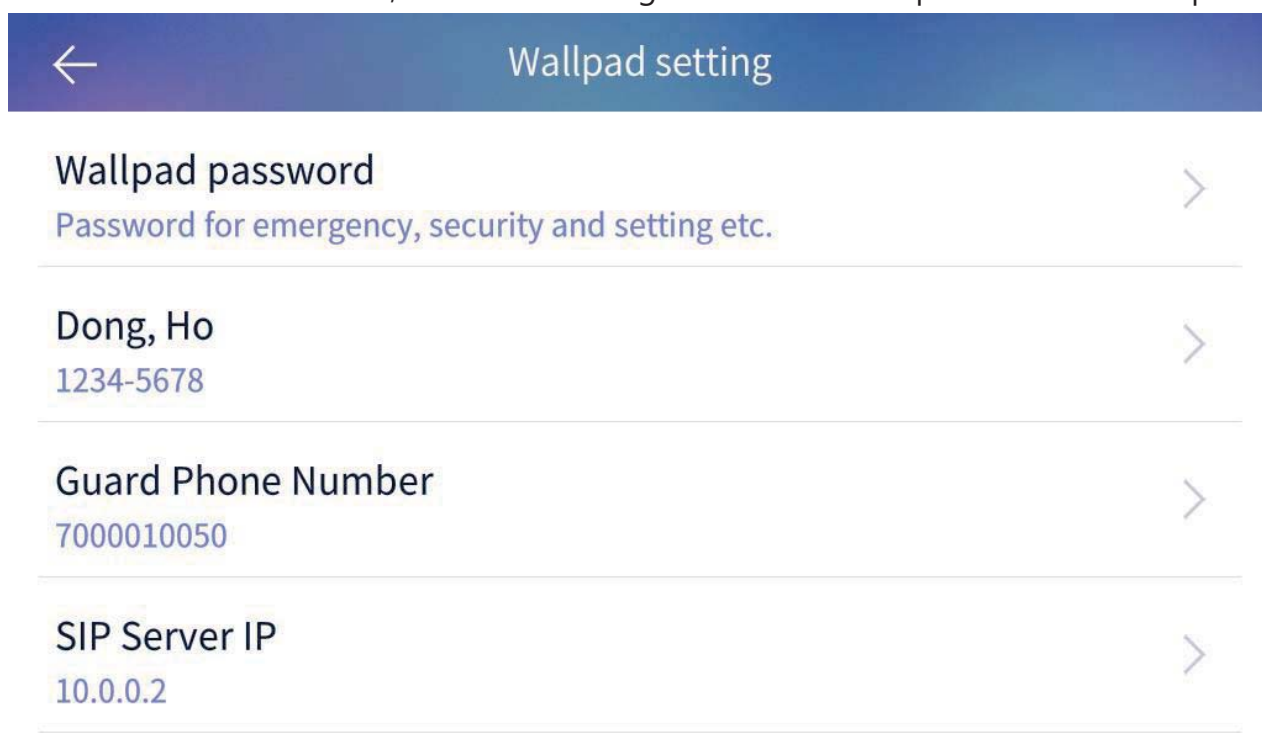

- 1) Click "Wallpad setting" icon, you can see the display.

[Display for Wallpad setting]

5.7.1. Wallpad setting

You can set the SIP server, call number of guard station and passwords for wallpad.

* Wallpad type setting

- You can set wallpad using Master or Slave

- If wallpad sets Slave, input IP of Master wallpad and select Slave number (501 ~ 510)

※ If you are a member of COMMAX, you need to initialize the member information before setting it as Slave.

※ After the setting of the wall pad type is completed, it is automatically rebooted.

Note) a. When operating master and slave in the cab, make sure all the IP of the wall pad is set to fixed IP

(When set to DHCP, synchronization between master and slave may not be possible.)

B. When the slave malfunctions or power is off, communication delay between master and slave occurs and all devices may slow down

There is.

C. If the IP address of the slave is changed, be sure to reboot the master wall pad to synchronize the master / slave.

D. If changing the slave wall pad to Master, be sure to reboot the existing Master Wall Pad to synchronize Master / Slave

It will be canceled.

✕ Wallpad type

Master Slave

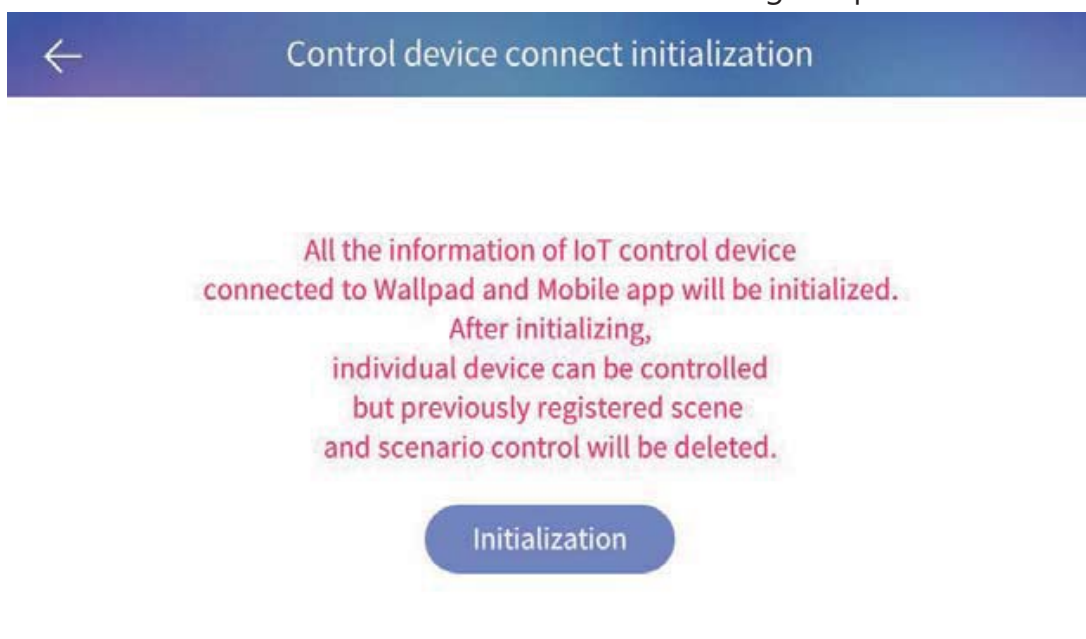

Master wallpad IP
Localhost(Master)

Extension number
100(Master)

- 1) You can change the password for disarming emergency and Away mode.
 - Enter the new password.
 - Re-enter the same password.
 - If passwords are same, it has been changed.
 - ※ Initial password is 1234.
- 2) You can change the building & household number.
 - ※ If you change those number, you need to reboot the wallpad.
- 3) You can change the number for guard station.
- 4) You can change the SIP server IP.
 - ※ If you change the IP, you need to reboot the wallpad.
- 5) You can change the update server IP for wallpad.
- 6) You can re-execute the installation wizard.

5.7.2. Initialization for connecting control devices

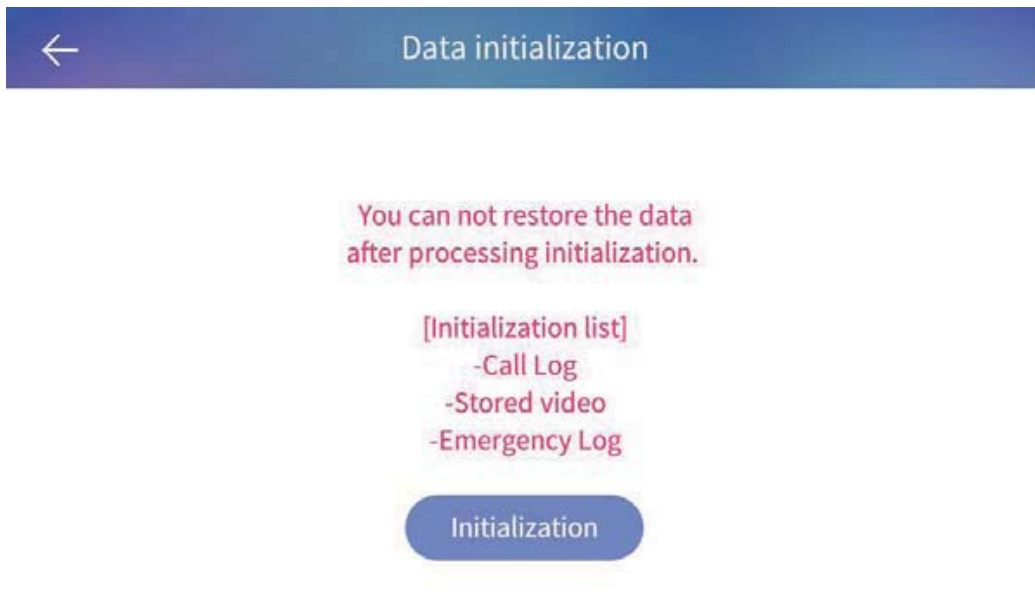

You can initialize the control devices for connecting wallpad or mobile app.

When you click the "Initialization" button, all the connecting IoT devices will be initialized. After initialization, individual devices can be controlled but all the scenario or scenes will be deleted.

5.7.3. Data initialization

You can initialize all the data from wallpad.

After initialization, you can not restore the data.

[List for initialization]

- Call log
- Saved image
- Saved movie clip
- Emergency log

5.7.4. Door camera setting

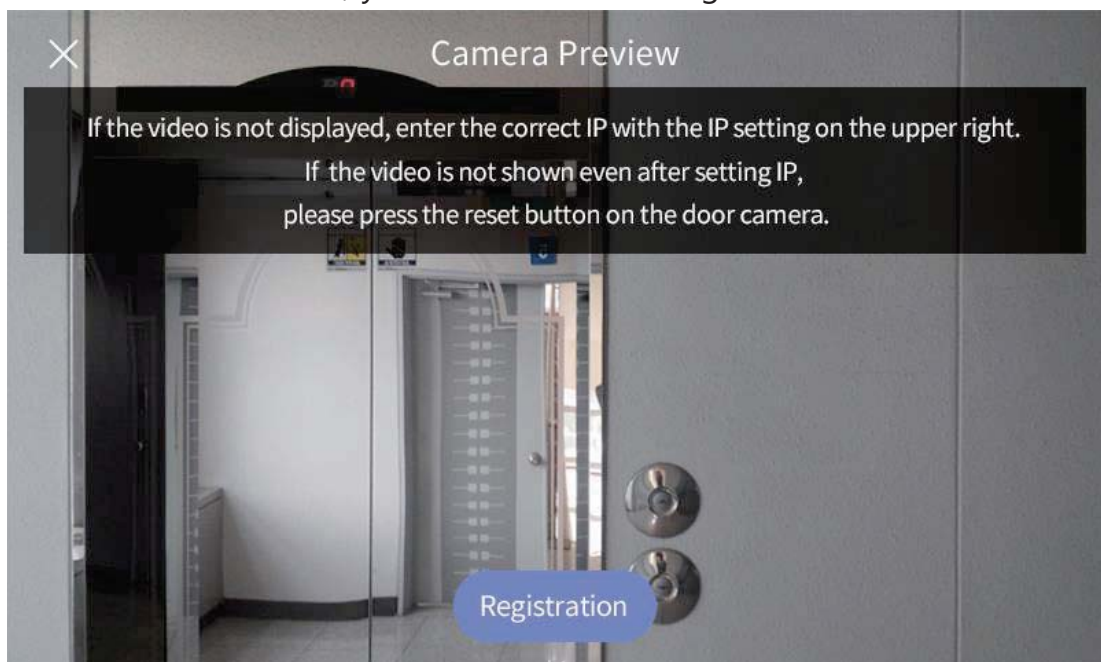

You can register IP door camera.

- 1) Click "Door Camera Setting", push the button of door camera for 5 seconds, the camera image will be displayed automatically.

- 2) Click "Camera Preview", you can check the image of door camera.

- 3) Click 'Registration' button, the door camera will be registered to wallpad automatically.
- 4) You can change the name of door camera to click "Edit" button.

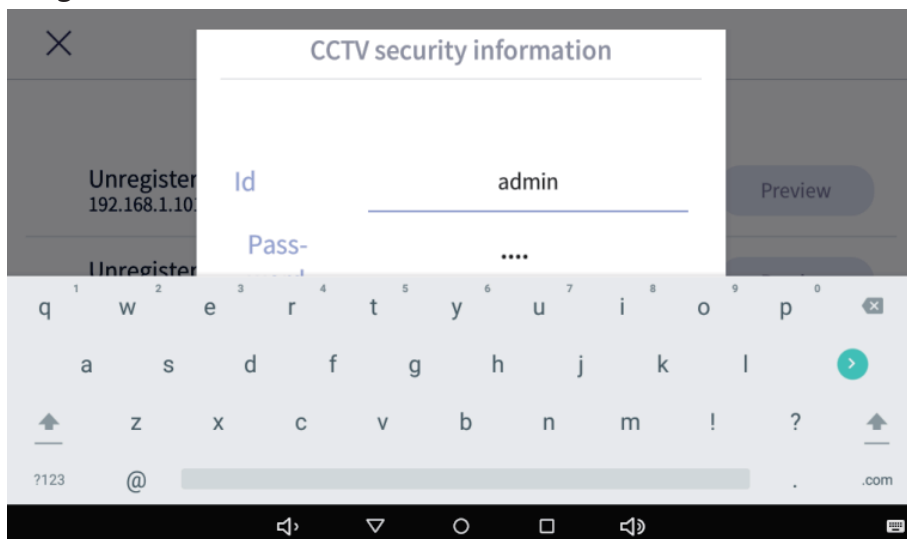

5.7.5. CCTV Registration

You can register IP type CCTV camera.

- 1) Click "CCTV camera register' button, you can see the list of CCTV camera on the display..

- 2) Click "Preview" button and enter the ID & Password, you can check the image of CCTV camera.

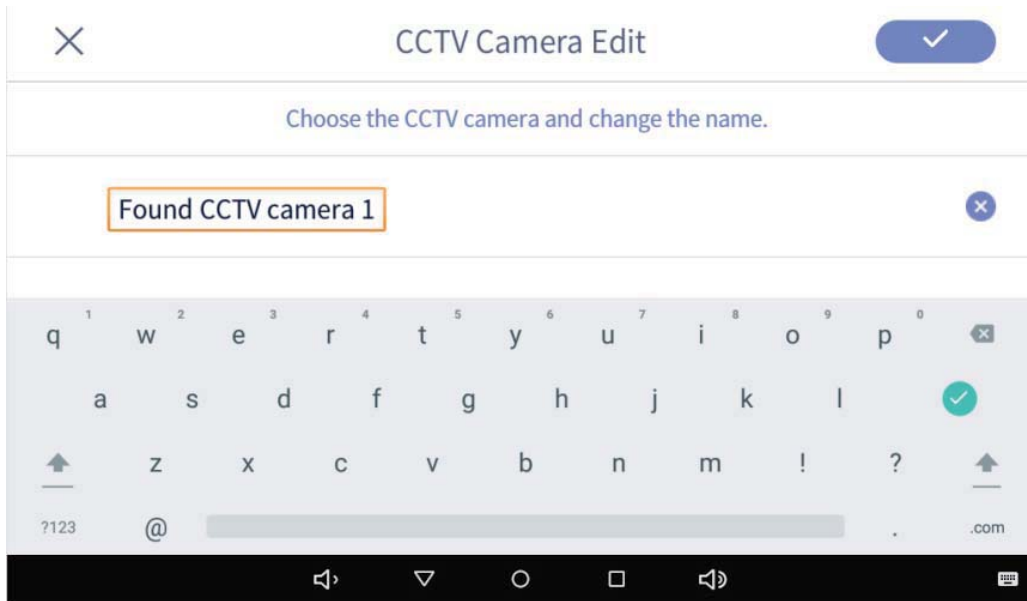

3) Click "Register" button, that CCTV camera will be registered.

- 1) Move to Booking window.
- 2) On the list, you can activate the options using toggle buttons ('☑').

PRODUCT

SPEC / MODLE	CIOT-1020M
LINE	UTP (CAT.5e)
VOLTAGE	INPUT : PoE DC 36V ~ 54V / DC5V
POWER	STANDBY :5W , MAX : 10W
TELECOMUNNICATION	AUDIO : VoIP, VIDEO : H.264, H.265
LINE & DISTANCE	STANDARD UTP (CAT.5e) 70m (FROM THE PSE)
TEMPERATURE	0°C ~ +40°C

SPECIFICATION

CPU	Quad-Core ARM Cortex-A53
MEMORY	1G DDR3 RAM (512M *2)
FLASH	8G eMMC Flash
LCD	7" TFT LCD, 1024 x 600
POWER	PoE

INSTALLATION

PACKAGE CONTENTS.

CIOT-1020M

Bracket for wall mount

Manual

T4 X 18(4EA)
Screw for wall mount

M3 x 6(1EA)
Screw for body

FCC approval

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

This device should be installed and operated with minimum 20 cm between the radiator and your body.

This device contains certified modules.

Contains FCC ID: CCEW8188R511K

Contains FCC ID: CCECMX-ZG03
