Operation Instruction of the Ipad Keyboard Case

Step I   Place your Ipad into the case

Put Ipad into the case

Stick the holder to prevent the Ipad from slipping off
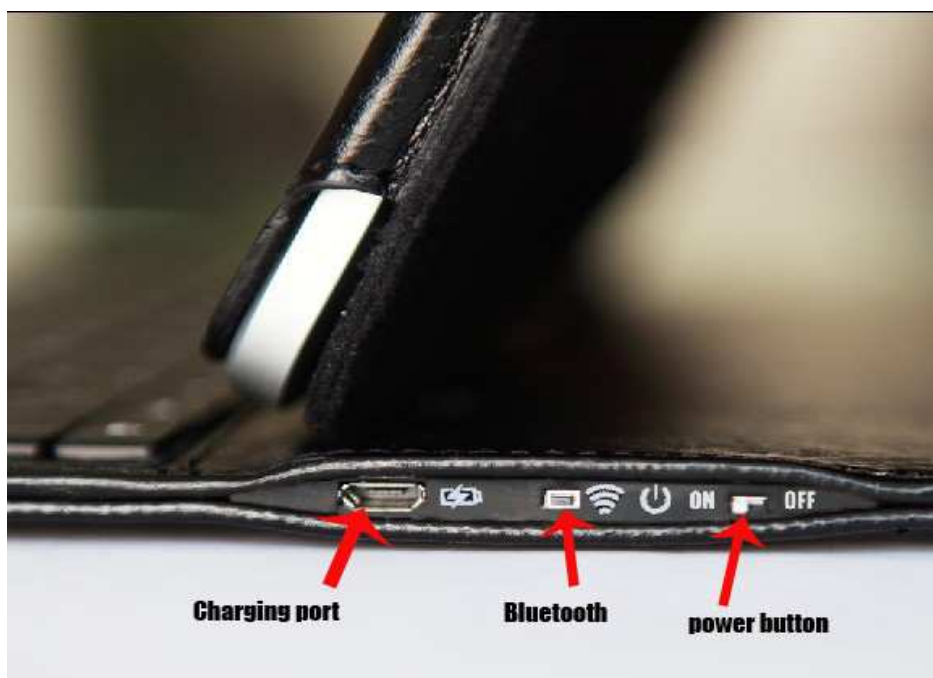

Place the case to a comfortable position

Step II   Turn the keyboard and bluetooth signal on

On the right side of the case, there are charging port, the power and the bluetooth switches。

Charging port   Bluetooth   power button

*The built-in lithium battery will last for 45 days when charged. You should charge the keyboard with the USB cable coming in the kit.

***Turn the power button on and you can start to use the bluetooth keyboard.**

When the power is on, the light on the right top of the keyboard will flash in blue color for a few seconds. When it is recharging, The other blue light will be on.

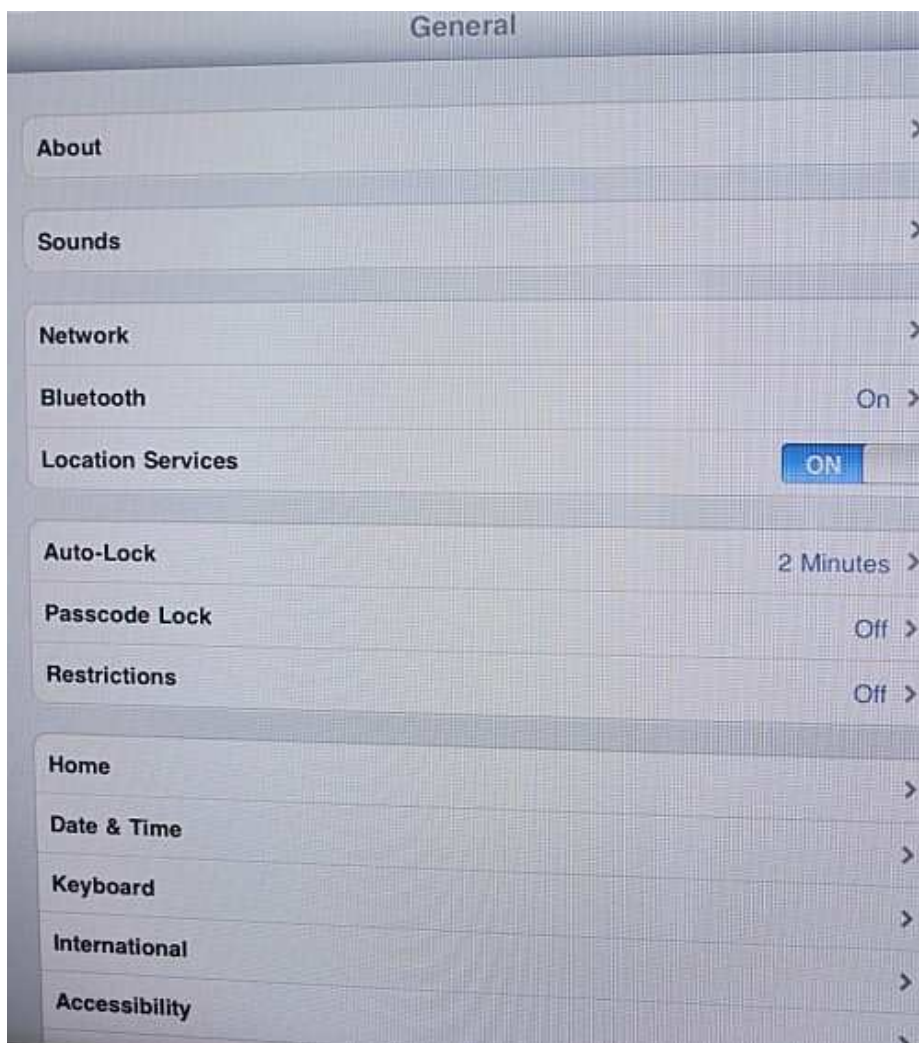

*If it's your first time to use this keyboard, you also need to complete the following step.
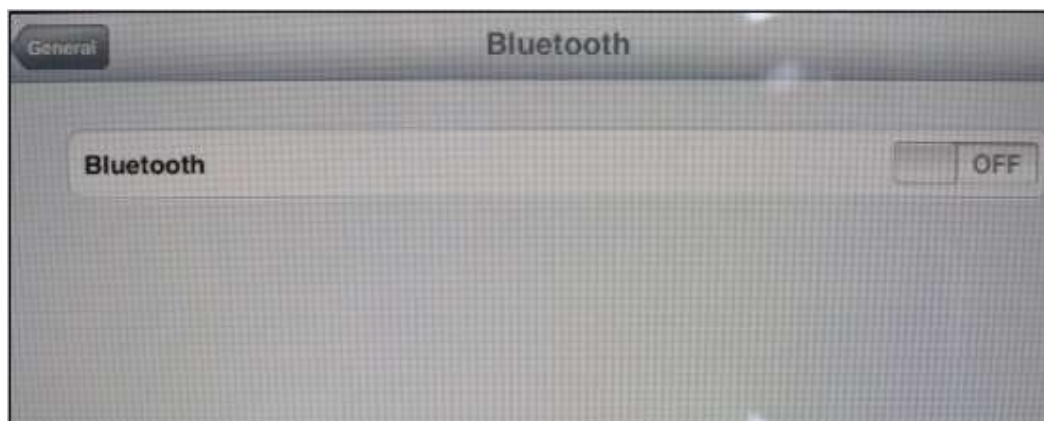

Step III Pair the bluetooth keyboard to your Ipad

Press the bluetooth key to send bluetooth signal

Charging port   Bluetooth   power button

Turn your Ipad on, and tap "Setting"
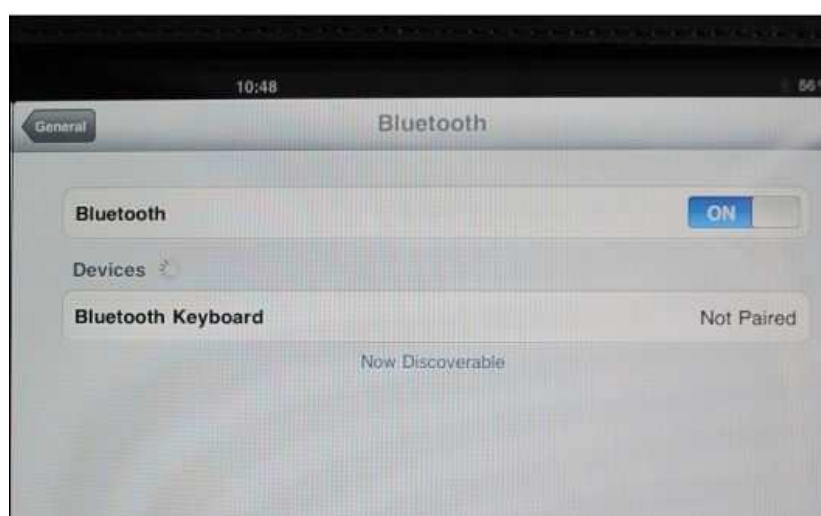

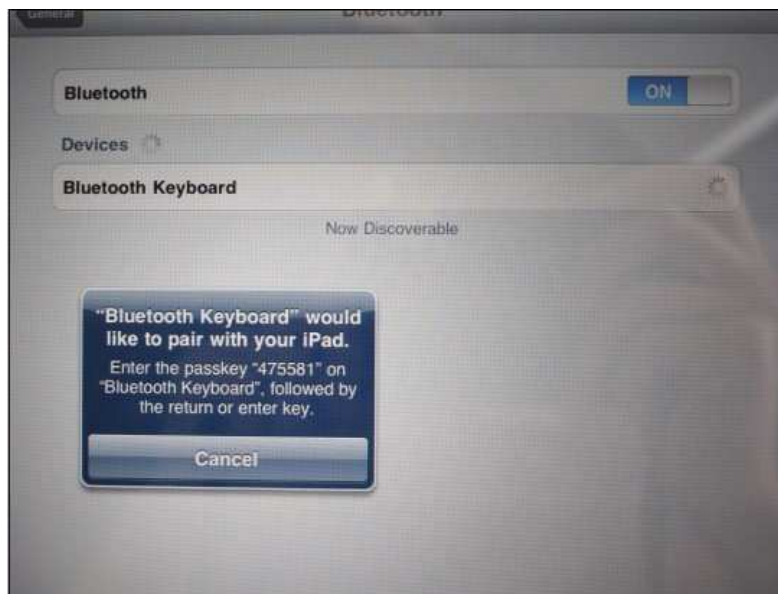

Tap "Bluetooth"

### Slide the button to "On" and your Ipad will start to search the Bluetooth devices

### When it finds the bluetooth keyboard, tap the "Bluetooth Keyboard" option

Then a blue window comes out

Enter the password showing on the blue window and press the "enter" key on the

keyboard

Then the Bluetooth keyboard is successfully connected to your Ipad

**StepIII is only needed when you first use this keyboard case. After the first connection, the keyboard is automatically connected to your Ipad every time when you turn the power on. You can active the keyboard by pressing any keys on keyboard.**
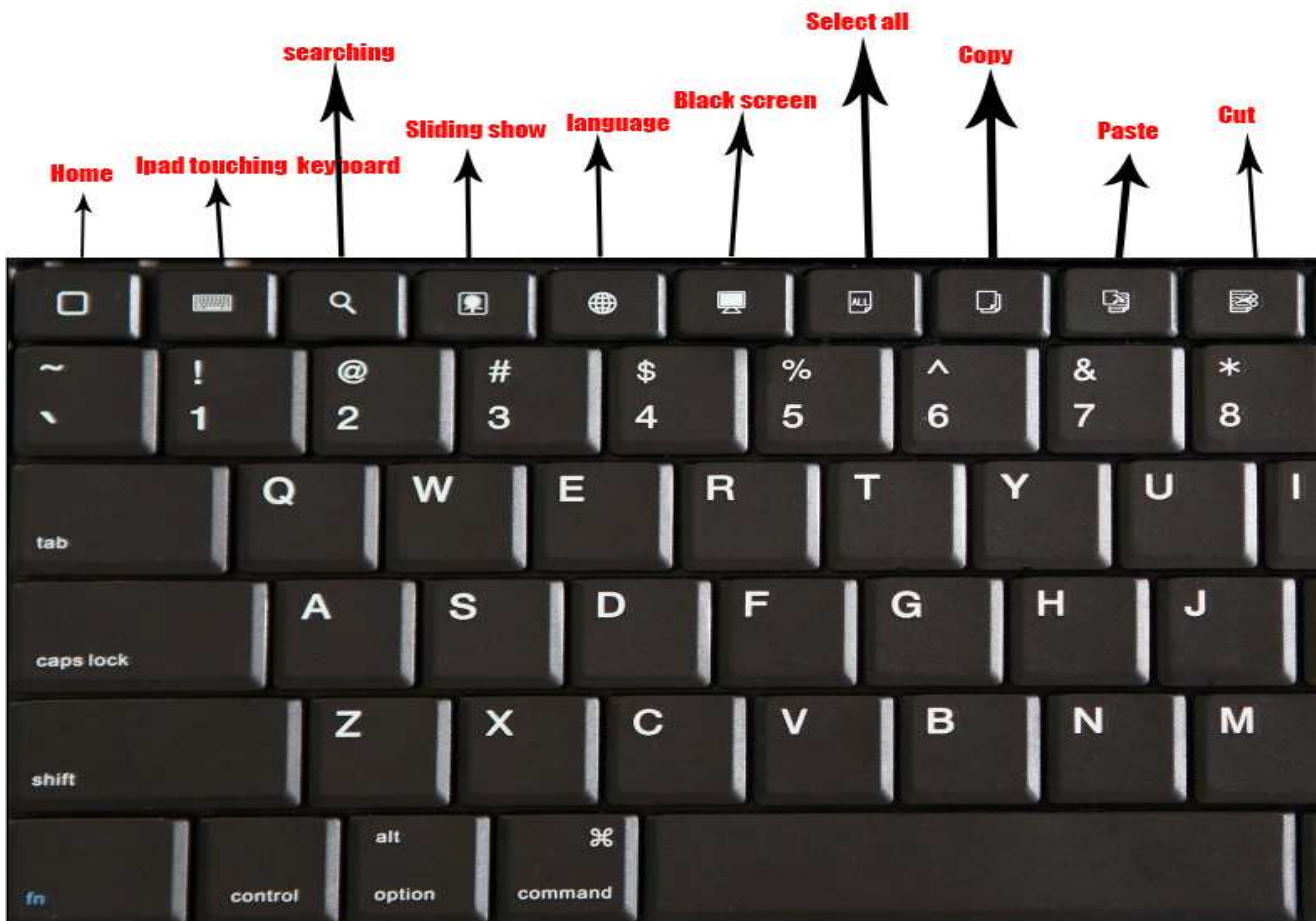

Then you can start to use the Bluetooth keyboard
