

# 823G GigaHub Quick Start/Safety and Regulatory Statements Guide

This document provides general installation practices for the GigaHub model 823G. This document also provides guidance for site preparation, installation, and basic troubleshooting.

Scan the QR code at left to access the installation instructions for this product. All product documentation is available online from the Calix Resource Center ([support.calix.com](http://support.calix.com)).

## Package Contents

- GigaHub - Model 823G
- Power adapter (Optional - may ship separately or with UPS\*)
- Tabletop mounting stand
- GigaHub Quick Start Guide (this document)
- Product identification labels with login credentials (x2)

**\* Note:** For instructions on installing the optional UPS, refer to the GigaHub Installation Guide.

## A Quick Look

## Installation Variables

Before installing the 823G GigaHub, consider what additional services may be implemented. Various Ethernet and telephone ports are available on the back of the unit which may or may not be used. Prior to determining the unit's final location, you need to account for the following variables:

- Where will the telephone lines be routed?
- Where will the Ethernet cables be routed?
- What type of building material is used in the home? Make sure you have the appropriate drills, drill bits and fasteners for routing subscriber services and/or power cables as they pass through walls and the like.

## Tabletop Mounting

The 823G GigaHub can be mounted on a tabletop in a "tower" configuration using the tabletop stand shipped with the product.

Assemble the tabletop stand and the GigaHub as shown in the following diagram.

## Connecting the Equipment

In order to facilitate table-top mounting of the 823G GigaHub, do the following.

1. Remove the 823G GigaHub from its packaging and inventory all parts.
2. Remove the fiber access cover and set aside temporarily.
3. Plug in the power adapter to an available wall socket and attach the other end to the GigaHub's power port.
4. Attach the fiber pigtail to the bulkhead fitting on the GigaHub until it snaps into place. Re-install the fiber access cover.
5. Push the ON/OFF switch (model 823G-2 only) to ON and allow the GigaHub to boot up (about 3 minutes).

**Note:** To ensure proper airflow around the unit, do not block the sides of the GigaHub.

## Connecting Outside Services

Subscriber voice, IP video and data services are attached to the rear of the GigaHub.

1. Locate the telephone, video, and data cables coming from the subscriber's home.
2. Connect the incoming telephone lines to the RJ-11 connectors on the rear of the GigaHub.
3. Connect CAT5 or better Ethernet cables to the LAN Ethernet Ports (RJ-45) for direct attached devices.
4. Secure all subscriber service wiring as appropriate.

## Default Device Settings

Inserted inside the shipping carton of each 823G GigaHub, the inventory label (x2) provides necessary product information that may be attached to a work order or applied to the exterior of the device for future reference.

- Serial Number of the 823G GigaHub
- ONU MAC address
- Default Wi-Fi security type
- Wi-Fi security key (WPA Key)
- Default IP address of the home gateway router (needed at initial turn-up)
- Default login credentials (User Name/Password)

## Getting Started

To turn up network services on the 823G GigaHub, two options are available:

1. Connect an active optical fiber to the 823G GigaHub's bulkhead fitting, power the unit on, and allow the network OLT (for example, a Calix E7) to discover the device as an unprovisioned ONT. At the OLT, the network administrator will provision the GigaHub and provide operational parameters remotely.
2. With the fiber disconnected, access the Smart Activate or Voice Activate application included with the 823G and then enter the Registration ID into the application. With the Registration ID having previously been entered at the OLT, once the fiber is connected, the GigaHub will come up as a provisioned ONT based on the pre-provisioning that was completed for that Registration ID.

## Home Gateway Settings

To turn up home gateway services on the 823G GigaHub, complete the following tasks:

1. Connect your PC to any LAN Ethernet port on the GigaHub using a standard Ethernet cable.
2. Open a browser and enter the IP address of the GigaHub's Embedded Web Interface (EWI): <http://192.168.1.1>.

[Home](#) | [Help](#) | [Logout](#) | [About](#)

3. Enter the credentials provided on the label shipped inside the GigaHub box.
4. Navigate to the Quick Start Menu and set-up the following:
  - a. Choose how to connect to the Internet
  - b. Set the local time zone (may be automatically set by network)

For more information about device provisioning from the EWI, refer to the GigaHub User's Guide.

## Frequently Asked Questions

- Q:** How do I reset the device without having to unplug the unit?
- A:** If the RESET button is depressed for less than 5 seconds, it resets the unit using the current configuration settings.
- Q:** How do I reset the device back to factory settings?
- A:** Pressing the RESET button on the back of the unit for at least 5 seconds, or access the "Restore Defaults" reset button located in the "Utilities" section of the Embedded Web Interface.

**Q:** How does the WPS button work?

**A:** Pressing the WPS button broadcasts the GigaHubs credentials (network password) to other WPS capable devices for a period of 2 minutes, allowing these devices to gain access to the wireless network.

**Q:** Is the Wireless radio on by Default?

**A:** Yes.

**Q:** Is Wireless Security on by Default?

**A:** Yes, unit is set with WPA2 Key Wi-Fi security type and login/password credentials that are printed on the inventory label and the product label affixed to the device.

**Q:** What if the User Name or login keys are forgotten?

**A:** Try setting up the wired connection and configuring the wireless encryption again.

- Press the reset button of the wireless router for at least five seconds.
- Device reverts to factory default settings
- Custom configuration options (such as SSID names) are reset as well.

**Q:** My Wi-Fi signal strength is lower than I expected?

**A:** A wireless signal degrades with distance and obstructions. Common signal impairments include walls, ceilings, metal, concrete, cinder blocks, fluorescent lights, microwaves, furniture, etc. While the 823G has been optimized to provide wireless coverage for most applications, there may be dependencies based on the location where the device is installed. Please contact your service provider for troubleshooting assistance.

**Q:** What mounting options are available for installing the 823G?

**A:** The 823G should be installed using the tabletop stand or wall mount bracket to ensure best Wi-Fi performance and proper fiber optic cable management. The 823G can be installed in a flat orientation on a desktop independent of the tabletop stand. Please ensure that the fiber optic cable can be properly routed to the device without excessive bends or pinching of the cable.

**Q:** What do I do if I cannot log on to the 823G gateway?

**A:** Contact your service provider.

**Q:** Who do I contact for service and support?

**A:** Contact your service provider.

## Safety Information

The 823G GigaHub is a highly sophisticated electronic device. To get the most out of it, be sure to read the following about product care, safety and efficient use.

- Treat the product with care, keep it in a clean and dust free environment.
- **Do not** expose the GigaHub to liquid, moisture or humidity.
- **Do not** expose the GigaHub to extreme high or low temperatures; refer to the topic Environmental Conditions for more detailed information.
- **Do not** expose the GigaHub to open flames or lit tobacco products.
- **Do not** drop, throw, or try to bend the product, since rough treatment could damage it.
- **Do not** use this product near water, for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool.

- **Do not** attempt to disassemble the GigaHub. A broken warranty seal will void the warranty. The product does not contain consumer-serviceable components. Only Certified Service Centers should perform service.
- **Do not** use any accessories other than those approved by the manufacturer or your service provider. Use of non-original or non-approved accessories may result in loss of performance, damage to the product, fire, electric shock or injury, and may violate regulations. The warranty does not cover product failures that have been caused by use of non-original or non-approved accessories.

## L'information sur la sécurité

Le 823G GigaHub est un appareil électronique sophistiqué. Pour tirer le meilleur parti de celui-ci, assurez-vous de lire ce qui suit sur les soins, la sécurité et l'utilisation efficace du produit.

- Traitez le produit avec soin, gardez-le dans un environnement propre et exempt de poussière.
- N'exposez pas le GigaHub au liquide ou à l'humidité.
- N'exposez pas le GigaHub à des températures extrêmes élevées ou basses. Se référer à la partie Conditions environnementales pour des informations plus détaillées.
- N'exposez pas le GigaHub à des flammes nues ou à des produits du tabac allumés.
- Ne laissez pas tomber votre appareil, ne le lancez pas et ne tentez pas de le plier, car un traitement brutal pourrait l'endommager.
- N'utilisez pas ce produit près de l'eau, par exemple, près d'une baignoire, un lavabo, un évier ou un lavoir, en sous-sol humide, ou près d'une piscine.
- N'essayez pas de démonter le GigaHub. Un sceau de garantie brisé annule la garantie. Le produit ne contient pas de pièces réparables par le consommateur. Seulement les centres de service agréés devraient effectuer des réparations.
- N'utilisez pas d'accessoires autres que ceux approuvés par le fabricant ou votre fournisseur de services. L'utilisation d'accessoires non originaux ou non approuvés peut entraîner une perte de performance, des dommages au produit, un incendie, des chocs électriques ou des blessures et peut contrevenir aux règlements. La garantie ne couvre pas les pannes provoquées par l'utilisation d'accessoires non standards ou non approuvés.

## Potentially Explosive Atmosphere

Do not use the GigaHub in an area where a potentially explosive atmosphere exists.

## Atmosphère potentiellement explosive

N'utilisez pas le GigaHub dans un endroit où existe une atmosphère potentiellement explosive.

## Intended Use

This product is classified as telecommunication equipment not intended for direct purchase by the public.

This product is designed and approved for use in an indoor location only.

**CAUTION!** Use of any controls, adjustments, or procedures other than those specified herein may result in hazardous radiation exposure.

## Utilisation prévue

Ce produit est classé comme équipement de télécommunication non destiné à l'achat direct par le public.

Ce produit est conçu et approuvé pour utilisation en intérieur uniquement.

**MISE EN GARDE !** L'utilisation de contrôles, réglages ou procédures autres que ceux spécifiés dans ce manuel peut entraîner une exposition dangereuse à des rayonnements.

## Power Supply

Ensure that a suitable AC power outlet is situated near the GigaHub and easily accessible.

Connect the power supply cord only to the AC power outlet that meets the specifications marked next to the appliance AC power inlet on the GigaHub.

Never alter the AC power cord. If necessary have the correct outlet installed by a qualified electrician or call your service provider for assistance.

To reduce the risk of damage to the electric cord, remove it from the outlet by holding onto the AC power adapter rather than the cord. Make sure the cord is positioned so that it will not be stepped on, tripped over or otherwise subjected to damage or stress.

**WARNING!** Do not use any other power adapter except the one that accompanies this unit or a power supply identified in the list below. Use of another adapter could result in damage to the unit. To prevent electrical shock, please do not open the cover. The following power adapter is qualified for use with this GigaHub.

### **823G-1 Power Supply Specification**

*This GigaHub must be powered by Amigo*

*AMS157-1202000FU or equivalent UL Listed LPS power source rated at:*

*Input: 90-264 VAC, 47/63 Hz, 1A,*

*Output: Nominal 12 VDC, 2A Maximum, 24W*

### **823G-2 Power Supply Specification**

*This GigaHub must be powered by Amigo*

*AMS157-1202000FV or equivalent UL Listed LPS power source rated at:*

*Input: 90-264 VAC, 47/63 Hz, 1A,*

*Output: Nominal 12 VDC, 2A Maximum, 24W*

## RF Port Grounding

Metallic coaxial cable shielding, if used, must be connected to earth ground in accordance with ANSI/NFPA 70.

## RF Port Type

The RF port on the 823G GigaHub must be directly connected to a TV or a Video device inside the same building. The RF cable is not to be routed outside the building or to a cable distribution system. This port is considered a Safety Extra Low Voltage (SELV) port.

## Alimentation électrique

- Assurez-vous qu'une prise de courant C.A. appropriée est située près du GigaPoint et qu'elle soit facile d'accès.
- Connectez le câble d'alimentation uniquement à une prise de courant qui correspond aux spécifications indiquées à côté de l'entrée d'alimentation du GigaHub.
- Ne modifiez jamais le câble d'alimentation. Si nécessaire, faites installer la bonne prise de courant par un électricien qualifié ou Contactez votre prestataire de services pour assistance.
- Pour réduire le risque de dommage au câble électrique, retirez-le de la prise de courant en tenant l'adaptateur secteur plutôt que le câble. Assurez-vous que le câble est positionné de manière à éviter qu'il soit possible de marcher ou trébucher dessus, ou de l'endommager.

**Attention !** N'utilisez pas d'autre adaptateur secteur que celui qui accompagne cet appareil ou une alimentation électrique autre que celle identifiée dans la liste ci-dessous. L'utilisation d'un autre adaptateur pourrait endommager l'appareil. Pour éviter les chocs électriques, n'ouvrez pas le couvercle. L'adaptateur électrique suivant est qualifié pour être utilisé avec le GigaHub.

### **Spécifications de l'alimentation du 823G-1**

*L'adaptateur électrique suivant est qualifié pour être utilisé avec le GigaHub*

*Ce GigaHub doit être alimenté par un adaptateur Amigo AMS157-1202000FU ou une source d'alimentation équivalente certifiée UL LPS de capacité:*

*Entree: 90-264 VCA, 47/63 Hz, 1A,*

*Sortie: Valeur nominale 12 VDC, 2A Maximum, 24W*

### **Spécifications de l'alimentation du 823G-2**

*L'adaptateur électrique suivant est qualifié pour être utilisé avec le GigaHub*

*Ce GigaHub doit être alimenté par un adaptateur Amigo AMS157-1202000FV ou une source d'alimentation équivalente certifiée UL LPS de capacité:*

*Entree: 90-264 VCA, 47/63 Hz, 1A,*

*Sortie: Valeur nominale 12 VDC, 2A Maximum, 24W*

## **Mise à la terre du port RF**

Le blindage métallique des câbles coaxiaux, s'il est utilisé, doit être relié à la terre conformément à la norme ANSI / NFPA 70.

## **Type de port RF**

Le port RF du GigaHub 823G doit être directement connecté à un téléviseur ou à un appareil vidéo dans le même bâtiment. Le câble RF ne doit pas être acheminé à l'extérieur du bâtiment ou à un système de distribution par câble. Ce port est considéré comme un port de très basse tension de sécurité (SELV).

## **Class 1 Laser Device**

---

**WARNING! Optical Safety for Fiber Optic Modules.** Never look at the transmit laser while it is powered on. Never look into the fiber optic port when the device is powered on. Never look into the end of the fiber optic cable at any time.

---

## **Appareil laser de Classe 1**

---

**Attention ! Sécurité optique pour les modules de fibre optique.** Ne regardez jamais l'émetteur laser lorsqu'il est sous tension. Ne regardez jamais dans le port de fibre optique lorsque l'appareil est sous tension. Ne regardez jamais dans l'extrémité du câble de fibre optique.

---

## **Children**

Do not allow children to play with the GigaHub. It contains small parts that could become detached and create a choking hazard.

## **Environmental Conditions**

Maximum environmental values during use:

Temperature: 0° C to +40° C (32° to 104° F), Humidity: 5% - 95% RH, non-condensing

## **RoHS Compliance**

This 823G GigaHub meets the requirements detailed in the European RoHS Directive (2011/65/EU).

## WEEE Directive

Requirements according to WEEE directive (2012/19/EU)

Disposal of old electrical and electronic equipment (Applicable in the European countries with separate collection systems).

This symbol on the product indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. Calix offers take-back and recycling services for products in many locations around the world. The customers are advised to contact the local Calix representative for further information.

## Federal Communications Commission (FCC)

### INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

### NON-MODIFICATIONS STATEMENT

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

**CAUTION:** This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

For product, available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures.

### ADDITIONAL CONSIDERATIONS

The country code selection is for non-US models only and is not available on any US models. Per FCC regulations, all Wi-Fi products marketed in the US must be fixed to US operational channels only.

### FCC RADIATION EXPOSURE STATEMENT

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

## Industry Canada Requirements - English

The manufacturer declares that this product is in conformity with the requirements and other relevant provisions of the following Canadian standards:

- CAN ICES-3 (B)/NMB-3(B)
- This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
  - (1) This device may not cause interference, and
  - (2) This device must accept any interference, including interference that may cause undesired operation of the device.

**IMPORTANT NOTE - IC RADIATION EXPOSURE STATEMENT:** This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body.

## Industrie Canada Exigences - français

Le fabricant déclare que ce produit est conforme aux exigences et aux autres dispositions pertinentes des normes canadiennes:

- CAN-ICES-3 (B)/NMB-3(B)
- Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
  - (1) l'appareil ne doit pas produire de brouillage, et
  - (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

**REMARQUE IMPORTANTE - EXPOSITION AUX RADIATIONS IC:** Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20cm de distance entre la source de rayonnement et votre corps.

## For Radio Equipment Only

You must set the correct country code with the set WLAN country-code command to avoid violating local radio spectrum laws. This command sets the selectable channel range and transmit power level so that a WLAN connection can be established. For more information about country codes, see the hardware guide for your device.

This device complies with the essential requirements of the Radio Equipment directive: 2014 / 53 / EU. The following test methods have been applied to prove presumption of conformity with the essential requirements of the Radio Equipment directive: 2014 / 53 / EU:

EN 300 328 (2.4 GHz), EN 62311:2008, EN 50385, EN 301489-1, EN 301489-17, IEC 60950-1, IEC 60825-1.

FREQUENCIES	MAX POWER	INDOOR/OUTDOOR
2400-2483.5	100 mW	Indoor

### RADIATION EXPOSURE STATEMENT

The minimum distance between the user and/or any bystander and the radiating structure of the transmitter is 20 cm.

				NOTICE OF WIRELESS RADIO LAN USAGE IN THE EUROPEAN COMMUNITY
BE	BG	CZ	DK	This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France where restrictive use applies. This device may not be used for setting up outdoor radio links in France and in some areas, the RF output power may be limited to 10 mW EIR P in the frequency range of 2454 –2483.5 MHz. For detailed information, the end-user should contact the national spectrum authority in France. This equipment may be operated in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, OL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY
DE	EE	IE	EL	
ES	FR	HR	IT	
CY	LV	LT	LU	
HU	MT	NL	AT	
PL	PT	RO	SE	
SK	FI	SE	UK	
U	IS	NO	TR	
CH				

### Usage Notes

- To remain in conformance with European National spectrum usage regulations, frequency and channel limitations will be applied on the products per the country where the equipment will be deployed.

## Declaration of Conformity

Language	Declaration of Conformity
български [Bulgarian]	С настоящото Calix Inc. Това декларира тази Wireless Broadband Терминал за достъп е в съответствие с Директива 2014/53 / ЕС. Пълният текст на ЕС декларацията за съответствие е достъпна онлайн от сайта на декларациите на Calix ( <a href="https://www.calix.com/declarations">https://www.calix.com/declarations</a> ).
hrvatski [Croatian]	OoVime Calix Inc. To izjavljuje ovaj bežični širokopojasni pristup terminala u skladu s Direktivom 2014/53 / EU. Puni tekst izjave o sukladnosti za EU je dostupan online od kaliks web deklaracije ( <a href="https://www.calix.com/declarations">https://www.calix.com/declarations</a> ).
English	Hereby, Calix Inc. declares that this Broadband wireless Access Terminal is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available online from the Calix Declarations site ( <a href="https://www.calix.com/declarations">https://www.calix.com/declarations</a> ).

## License Information

### Open Source Software Utilization Notice

The 823G GigaHub uses Open Source Software Programs. Such software programs are made available subject to certain third party terms and conditions.

The fact that you are about to begin using or have purchased this product requires that you be informed of the use of these software packages and or libraries and in some cases, the third party terms and conditions applicable to such software. This information can be found on the manufacturer's support portal. Refer to the appropriate software release notes for additional information on Open Source Software Programs used by this product.
