Tips: When the distance between the earphone and phone is beyond effective range, earphone disconnects with phone. Earphone will power off automatically once no active for 20 minutes.

### Safety and care

Using earphone at high to moderate volumes for extended periods of time will result in permanent hearing damage. It is advised you keep volume levels moderate to low at all times for your safety.

Do not use while driving a car, cycling, operating machinery, or performing other activities that require hearing surrounding sounds.

Do not use earphone in thunderstorm weather, the earphone may not work properly in the condition, and increase the risk of being hit by lightning.

Earphone may not work properly under high temperature or high humidity conditions.

Do not use any corrosive cleaner/oil to clean the earphone.

If the earphone comes in contact with liquids, quickly wipe away. If submersed in water, do not turn the earphone on until completely dried. Tips: liquid submersion voids the warranty.

Keep the earphone and packaging out of reach of children.

### Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference,  
(2) this device must accept any interference received, including interference that may cause undesired operation.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:  
—Reorient or relocate the receiving antenna.  
—Increase the separation between the equipment and receiver.  
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
—Consult the dealer or an experienced radio/TV technician for help.

**FCC Radiation Exposure Statement:**  
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.  
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

M14 INSTRUCTION

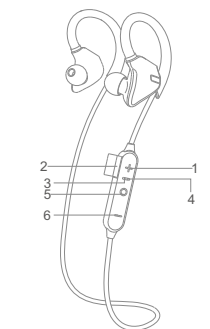

### Start here

Following items are included

Ear cushions      USB cable

### Product overview

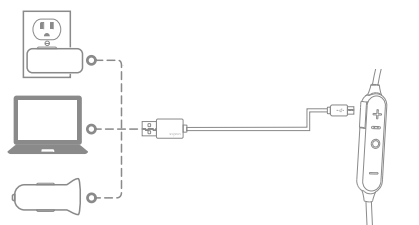

- Volume + / Track forward
- Charge jack
- LED indicator
- Talking mic
- Multifunction button
- Volume - / Track back

### Charging

Your new earphone has enough power to pair and make a few calls. It takes 2 hours to fully charge the earphone; while charging, the battery indicator light is red, the indicator light flashes blue once charging is complete.

Note: The lifetime of the battery will be significantly reduced if your earphone is left uncharged for a long period. We recommend that you recharge your earphone at least once a month.

### Pairing

#### Pair one phone

Note: When the earphone and phone have been paired once, they will automatically connect when the earphone is on and Bluetooth is activated on the phone.

- Make sure the earphone is turned off and within 1 meter of your phone, press and hold the Multifunction button until the LED indicator flashes red and blue alternately (About 5 seconds), then release Multifunction button.
- Activate **Bluetooth** on your phone (See below for more details).

**iPhone**

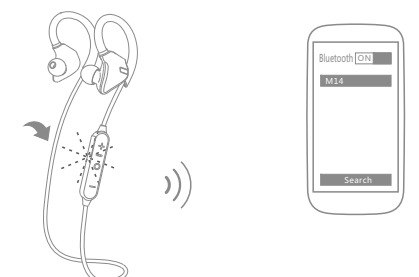

- On your phone, open the **Settings** menu.
- Select **Bluetooth**. If Bluetooth is off, turn it on. The iPhone will search for new devices automatically.

**Android phone**

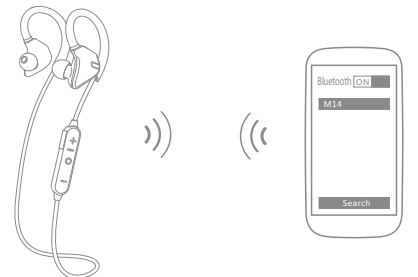

- On your phone, open the **Settings** menu.
- Select **Bluetooth** (For old Android phone, **Bluetooth** is found in the **Wireless & Networks**). If Bluetooth is off, turn it on. Select **Search for Devices** if your phone does not automatically search for new devices.

#### Windows Phone 8

- On your phone, open the **Settings** menu.
- Select **Bluetooth**. If Bluetooth is off, turn it on. The Phone will search for new devices automatically.

- Select "M14". If your phone asks, enter 0000 (four zeros) for the Passcode or accept the connection. The LED indicator stops flashing red and blue once successfully paired, you hear "Connection successful". Some phone list an option to "Play through earphone", select to use the earphones.

#### Pair another phone

Multipoint technology enables you to pair headset to two phones at the same time and take calls from either:

Pair headset to first phone per usual pairing procedure, then switch off headset. Then switch on headset again and enter pairing mode, enable Bluetooth function in second phone, find headset's Pairing Name "M14" and pair to second phone per usual procedure. Switch off headset one more time. Then simply switch on headset, without entering pairing mode (a short press until blue light comes on). The headset should automatically re-connect to the last connected phone (which is the second phone). Then find headset "M14" in first phone's Bluetooth setting, select this to pair to first phone. Both phones should now be paired to the headset.
