SPECIFICATIONS

A DOCUMENT SCANNER THAT MEANS BUSINESS

The Canon DR-3080CII is a durable and reliable scanner, designed for effortless operation yet powerful enough for your busy office environment. This rugged device was engineered to deliver high-quality imaging in a variety of modes and a choice of output formats—all in the blink of an eye. One of the most popular departmental scanners on the market, the DR-3080CII model easily keeps up with your daily document volumes and increases productivity, without breaking the budget.

LEAN AND MEAN IMAGE PROCESSING

The DR-3080CII device incorporates a compact design and blazing scanning speeds of up to 86 images per minute.* It offers a wide choice of scanning modes, such as color, grayscale, black and white, and even advanced text enhancement for documents with text on a dark background. With a daily duty cycle of up to 4,500 documents, the DR-3080CII provides robust document management and reliable paper handling.

AUTOMATED CONVENIENCE FOR OFFICE PRODUCTIVITY

Efficient paper handling begins with the 100-sheet Automatic Document Feeder. Ideal for continuous batch scanning of mixed documents—business card to legal-sized—the Canon DR-3080CII scanner automatically adjusts for varying document sizes and thicknesses, so you won't waste valuable time presorting, rescanning, or clearing frequent paper jams. Featuring Canon's unique Folio Mode, the DR-3080CII allows you to scan 11" x 17" documents. Efficiency is further enhanced with Color Dropout, so you can specify RGB colors for omission during scanning. Best of all, though, is that peace of mind also comes automatically, thanks to the reliable performance you've come to expect from Canon.

Connectivity is a breeze with a choice of Hi-Speed USB 2.0 or SCSI-III interfaces and ISIS® or TWAIN drivers. Each allows the DR-3080CII scanner to be used with today's most popular applications and software solutions. The scanner is bundled with Canon CapturePerfect 3.0 software and Adobe® Acrobat® 7.0, offering a wide range of basic and advanced scanning capabilities, including scan-to-file and scan-to-e-mail. Equally important, you can save files in TIFF, BMP, JPEG, searchable PDF for easier document retrieval, or encrypted PDF for security-sensitive documents.
