Note: This information is intended for end users. When ordering ink cartridges please use the item code.

This document describes the compatibility of ink cartridges noted with F, H, or FH.

### Ink Cartridge Notation Issue Update:

Current ink cartridges in the market have been marked with F, H, or F/H on the ink cartridge label. In the printers' users manual and reference guide, the user is instructed to use a specific ink cartridge, according to a letter noted on the label. With the introduction of new letter notations on some ink cartridges, there may now be more than one ink cartridge that is compatible with a printer. In order to determine the ink cartridge compatibility for each printer, please refer to the following charts.
