

**FIVE LIVE™**  
*Laser Perimeter Alarm*

# Installation & Operator's Manual DRAFT

# IMPORTANT SAFETY INSTRUCTIONS

1. There is NO replacement for direct adult supervision of children. The Prevent Laser Perimeter Alarm was designed as an early warning system in the event a child should slip away from your supervision or that an unexpected child should gain access to the protected area.
2. Prevent is not a security system, but an additional layer of protection. When used in conjunction with other “layers,” Prevent is an early warning system to let you know that someone or something has entered a restricted or dangerous area.
3. Prevent is intended for operation by adults only. Do not allow your children to operate the system.
4. Do not explain the system to children. Do not refer to the system as a “beam to be avoided” rather a device that watches and tells on them if they get too close to the water.
5. The Prevent beam can be adjusted to allow for change in elevation and child height. If you have a crawling toddler, adjust the beam height accordingly. If older children, adjust beam higher.

**Refer to Page 8 for a list of Tools and Materials Required**

## READ THIS NEXT, PLEASE!

We know you are anxious to install your new Prevent Laser Perimeter Alarm system as soon as possible, but we strongly urge you to take a few minutes to become familiar with the various components of the product, and to take advantage of the installation hints and instructions included in this manual.

A good place to start is to unpack the shipping cartons. Separate all of the parts from the packing materials and check each item against the parts list and illustration on the right.

If parts are missing, or have been damaged in shipment, do not attempt to complete the installation until all of the correct parts are on hand.

Become familiar with the names we call each item. We will use those same names throughout this manual, and in any correspondence or conversations that might be required in the future.

## THE NEXT STEP...

is the planning of your installation. On the next three pages we have provided you with information that will make the installation of your system go more smoothly. A few minutes spent in planning can save hours later on.

Pay particular attention to the Typical Installation diagrams on pages 4 and 5. Find a diagram that comes close to depicting your yard and use it as a guide for placing the various system components.

## WHEN ALL ELSE FAILS...

get in touch with someone that can help. You may contact us directly at 1-800-\*\*\*

## Parts Included

Your prevent system includes everything you need for a variety of installation methods. Included in your system are the following parts:

Item	Name	Qty.
A	Prevent Transceiver	1
B	Mounting Post - Transceiver	1
C	Mounting Base -Transceiver	1
D	Power cable assembly – 50'	1
E	Swivel Mount	4
F	Remote Controller	1
G	Mirrors 4"x6"	2
H	Reflectors 4"x4"	2
J	Mounting Post – Mirror/Reflector	4
K	Mounting Base –Mirror/Reflector	4
L	Mounting Post Cap	4
