The wireless phone has a powerful voice communication function, almost at any time, anywhere communications and liaison. But there are a number of important respons ibilities, have the advantage of the wireless phone, each

user must fulfill these responsibilities.

While driving, driving is your primary duties, answer the phone while driving should be vigilant and keep in mind the following tips:

■ Understanding of the wireless phone and its features, such as speed dial and redial. If these features can help you make a call, rather than to make your driving hours of heart.

■ If hands-free device, you should use a hands free. If possible, use either supply hands-free accessories that you can improve the convenience and security of wireless phone use.

■ Wireless phone is placed in an easy-to-find place. Do not need to divert attention from the road, you can use the phone. If you receive an incoming call at an inconvenient time, as much as possible to apply the voice mail answers the phone.

■ Told to call each other in your car; hang up when necessary, in the case of traffic jams or bad weather. R

ain, sleet, snow, ice and even heavy traffic is very d
angerous.

■ Airbags, brakes, speed control system and fuel injecti
on system should be free from the influence of wirele
ss transmission. If you are experiencing the problems
mentioned above, please contact the car dealer.

■ Please turn off your phone when refueling, the same
situation also applies to prohibit the use of two-way
wireless devices. Please do not flammable, explosive
materials and the phone on with the internal spark m
ay cause a fire.

■ Turn off the phone before the plane took off. In order
to prevent interference with aircraft communications
systems, never allowed to use the phone in flight. Co
nsent in accordance with the safety requirements for
the crew to allow before take-off of the aircraft did n
ot use the phone.

➢ Set to flight mode of the phone will not communic
ation system of the aircraft interference can not s

hutdown.

2.3. Use of the environment

■ Should comply with this no matter where the special provisions, and turn off the phone when in use or m ay be dangerous.

■ When connected to the mobile phones and other dev ices, you should read the user manual to learn more about the safety instructions, you cannot connect wit h incompatible products.

■ As with other mobile radio transmitting equipment, it i s recommended that users: For satisfactory use of th e equipment and personnel security, and should only be used in the normal work location.

2.4. Electronic equipment

Most electronic equipment is shielded from RF signals. However, some electronic equipment may not be shielde d against the RF signals generated by the wireless hand set.

■ Pacemakers

> When the phone is switched on, must be kept aw ay from pacemakers six inches (15cm) above the distance;

> phone should not be carried in a breast pocket;

> use of the pacemaker on the other side of the ea r to answer, may cause interference to reduce to a minimum.

■ Hearing aids

Some digital wireless phones may interfere with some he aring aids, if there is such interference, the deliberations of substitutes can be used with your hearing aid manuf acturer.

■ Other medical devices

If other personal medical devices, please consult the dev ice manufacturer, to confirm these equipment is shielded from external RF energy. Physician can help you obtain this information.

■ Posted notice of the place

Posted a notice to shut down places to turn off the pho

ne.

2.5. Other important information

■ Use only the first wife or by the manufacturer approv
  ed accessories. The use of any unauthorized accesso
  ries, there may affect the use of the phone's perform
  ance, damage your phone, and even lead to physical
  danger or violation of the relevant provisions of the
  national communication terminal products.

■ Clean your phone use a slightly damp or antistatic cl
  oth, do not use dry or easy to produce static cloth.
  Clean the surface of the phone, be careful not to us
  e cleaning agents, chemicals. Cleaning your phone, p
  lease turn off.

  e do not place magnetic storage medium such as co
  mputer disks and the like. Use the phone near the te
  levision, telephone, radio and personal computers and
  other electrical equipment may cause interference, th

us affecting the performance of the phone.

- Do not your mobile phone exposure in strong sunligh t, avoid heat.

- Avoid all kinds of liquid into the phone's internal, so as not to cause damage.

- Do not drops, knock the phone Rough handling can break internal circuit boards.

- Please do not connect with other ancillary equipment.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ -Reorient or relocate the receiving antenna.
- ▶ -Increase the separation between the equipment and receiver.
- ▶ -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ▶ -Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This SMART PHONE meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations

through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: ILU

(FCC ID: 2AIYZSSPILU) has also been tested against this SAR limit. The highest SAR value reported under

this standard during product certification for use at the ear is 0.442W/kg and when properly worn on the body is 0.998W/kg. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
