

iPOD Shuffle FM Transmitter RFT-1000S Quick Guide

Shuffle FM Transmitter

- 1 Open the battery cover of the FM Transmitter. Install the batteries.

- 2 Plug iPod Shuffle in and replace the battery cover. Turn on the power.

- 3 Tune your car or home stereo frequency to a channel with a weak broadcast signal. The ideal channel is one that is not broadcasting a radio program.

- 4 Press the < or > button on the top of the FM Transmitter to select the transmission frequency chosen in Step 3 for broadcast. Press and hold either button for fast-forward or backward tuning.

Note: Once you determine a channel and you don't change it within 2 minutes, the selected channel will be locked automatically so as not to be changed by accident. When you want to change the channel again, you simply press and hold either button to release it by 5 seconds.

- 5 Adjust the volume on your iPod Shuffle and your FM radio to the desired listening level.

Federal Communications Commission Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications:

Changes or modifications made to this equipment not expressly approved by Cellink may void the FCC authorization to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
