2-Preparation Work

Please check the keypad batteries before use. If battery is low (e.g. it prompts in red to indicate weak battery by keypad test in the software), please change new CR2032 batteries.

3-System Connection

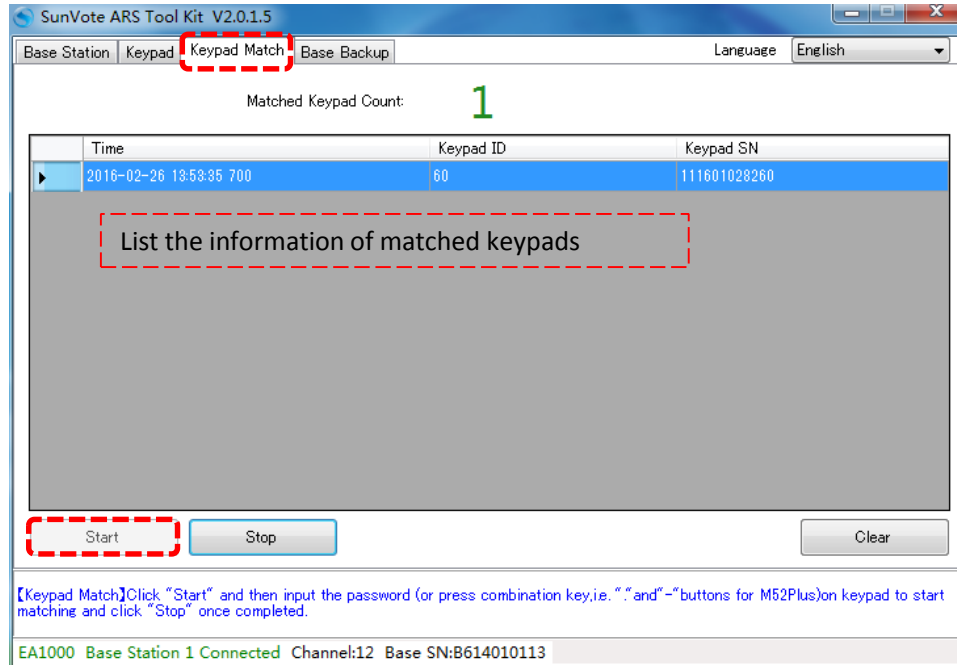

No network connection is required in the Class
The projector and screen are prepared by users.

4.1.1-System Settings : Keypad Match-Match Mode

【 Why to Match 】 Keypad match is to create communication between keypads and base station, and make sure your system is isolated from other similar systems. Match mode is set by default from factory.

【 How to Match 】 Please run **SunVote ARS Tool Kit** , go to **Keypad Match** and click **“Start”** after the base is connected.

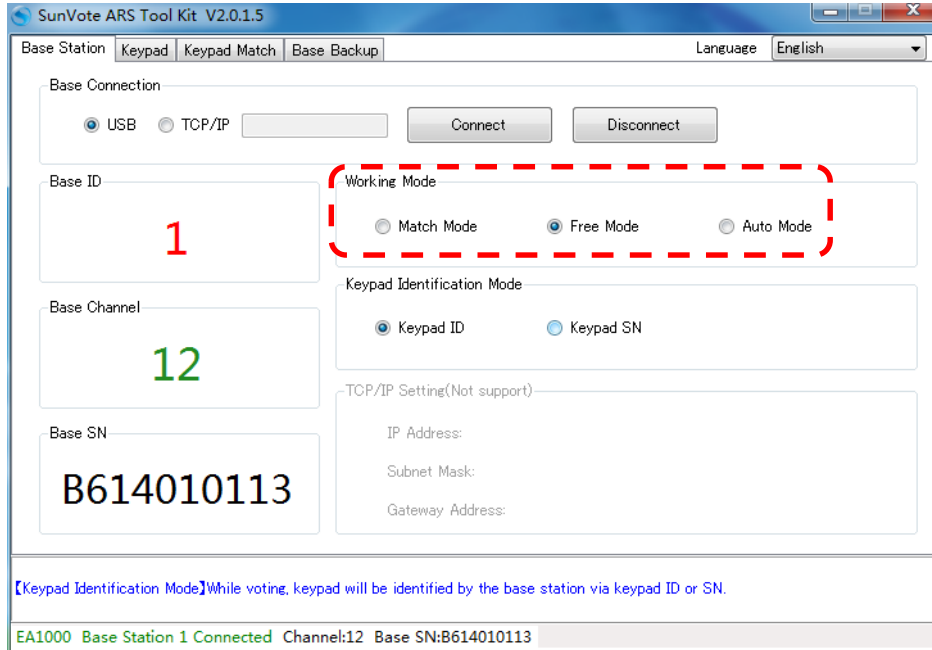

Press **【 . 】** and **【 M 】** at the same time for 3 seconds to match

For end-user, the keypads and base station are matched before delivery.

4.1.2-System Settings : Keypad Match-Free Mode

【 Free Mode】 Keypad is able to communicate with any base station freely by inputting the appropriate channel of the base.

【 How to Set】 Free mode is controlled by base station. However the base is set as **match mode** from factory, we may change it to **free mode** in the Tool-SunVote ARS Tool Kit as shown on the bottom left.

For end-user, the keypads and base station are matched before delivery.

When the base of free match is online, follow the steps as below to create communication between keypad and base:

Press **【M】** and **【1】**, input the correct channel when “Channel : ” appears on the screen , then press **【OK】** to match . Keypad shows “CH : XX” and “ Matched ” ,to indicate successful match

- 1-Search Class
- 2-Homework
- 3-Message

4.1.3-System Settings : Keypad Match-Shift Match Mode

【 How to Shift 】 Input 00 on keypad in free mode to change back to previous match mode. It's suitable for students who may have class in different classrooms.

Follow the steps below to shift from free mode back to match mode

Press **【M】**

Select 1 to show

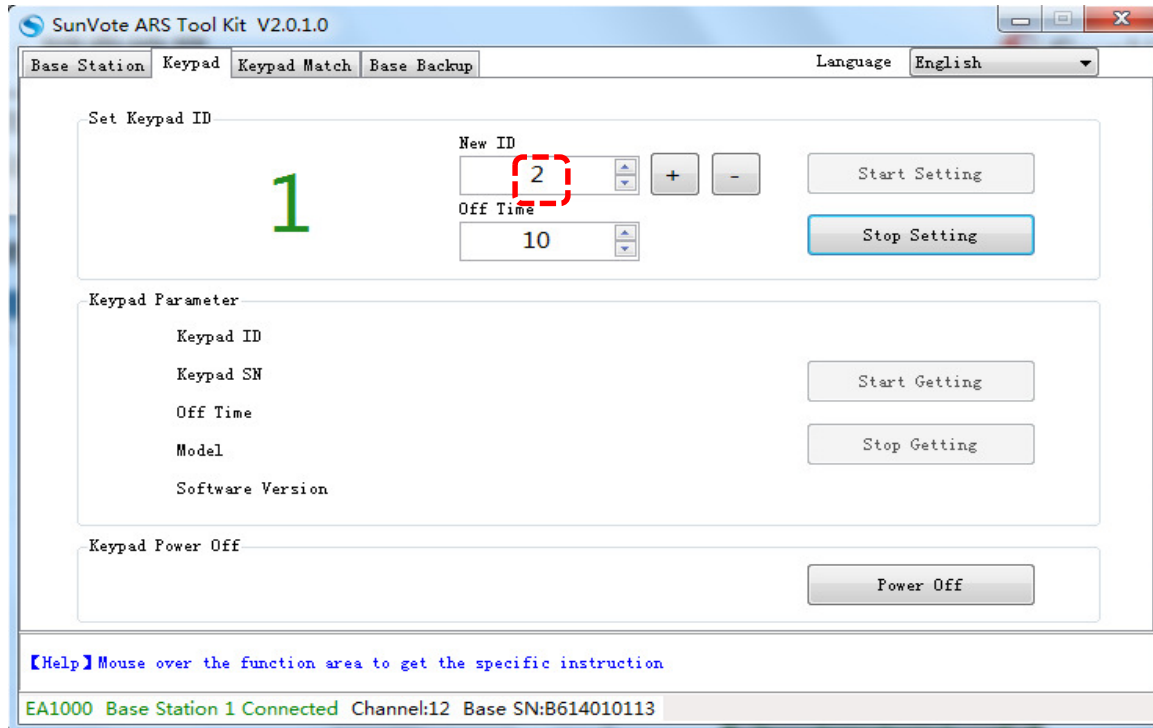

Input channel:00 and press **【OK】** to change

4.2- System Settings: Set ID

【 Why to Set ID 】 Keypad ID is convenient for device management, test and troubleshooting. ID should be unique

【 Set Single ID 】 Open Tool-SunVote ARS Tool Kit, click **start Setting**, and set the initial ID in the Keypad setting window, then press **OK** on the keypad. if set successfully, the ID number will be indicated on both keypad and toolkit, and the number in Tool-SunVote ARS Tool Kit will add one automatically, so please press another keypad to set its ID in ascending order.

For end-user, ID is set before delivery.

4.3-System Settings: Management

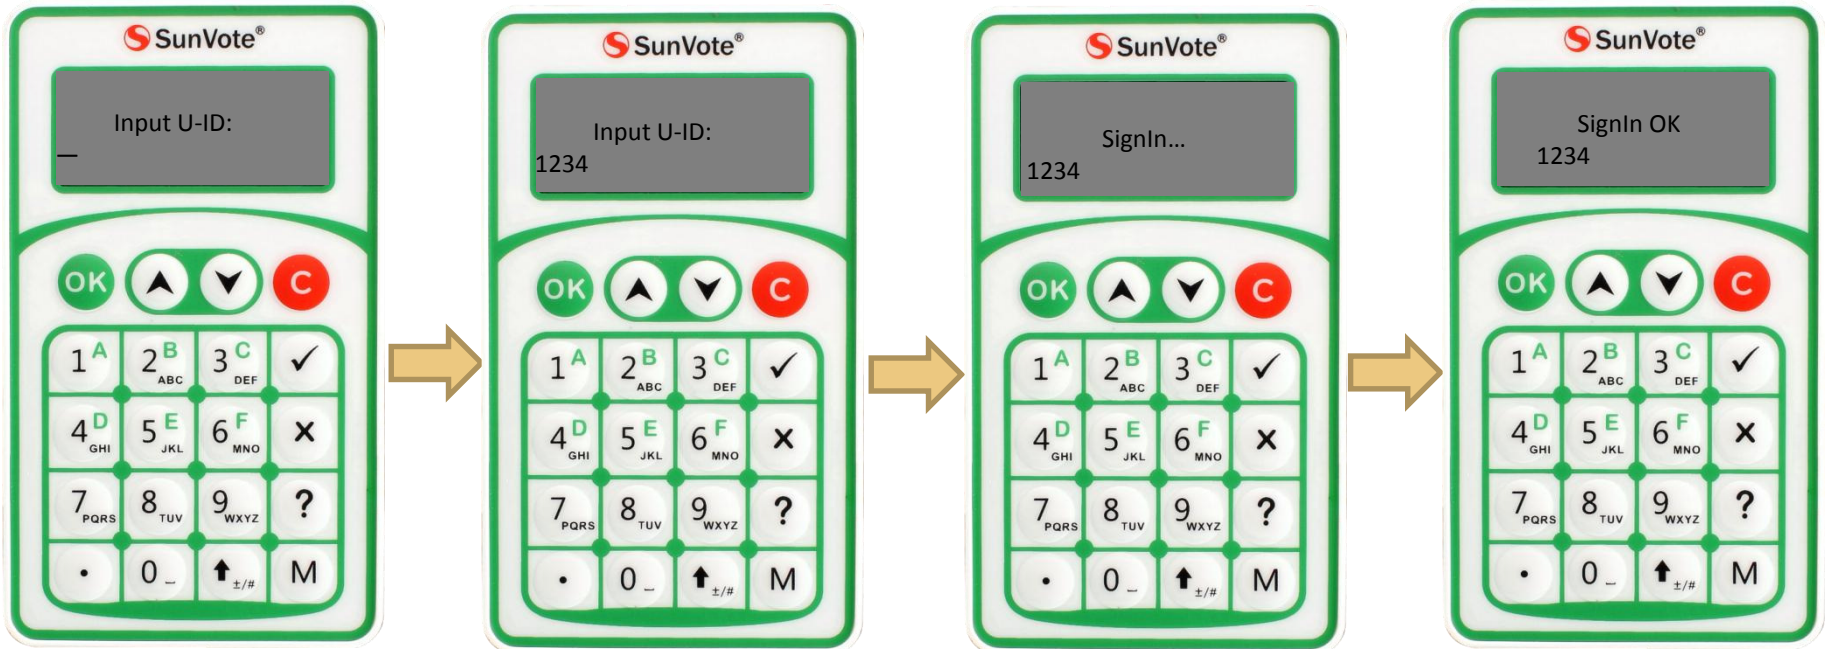

1. **Language** : Support Chinese-English shift. Use software to Set ;
2. **Modification Mode** : Use software to allow or not allow to modify the answer. Press **【C】** to modify after submitting under modifiable mode. Press the appropriate functional buttons to resubmit directly for single choice/judge and vote;
3. **Confidential Mode** : Use software to enable or disable the confidential mode . Once enabled, LCD will only show “Received” without the exact voting value (i.e.. Yes/No/Abstain) for confidence ;
4. **Submitting Mode** : Use software to allow or not allow to submit less than the selectable options. Eg.: if the answer of a multiple choice is ABC, you may submit AC if it’s allowed; otherwise, only the answer with 3 options like BCD is acceptable ;
5. **Right or Wrong Notification with/without Correct Answer**: Set it in software to notify right or wrong with /without correct answer on keypad for choice, true or false, sequence and vote only ;
6. **Download Answer** : Set it in software to download answers on keypad for examination and homework only ;
7. **Identification Mode**: Each keypad has a unique and inalterable 12-digit serial number. Set it in software or Tool-SunVote ARS Tool Kit to identify keypad by SN/ID. If set as SN mode, the keypad SN will show in software when polling.
