## **Certification Exhibit**

**FCC ID: YWZ-S3I0004**

**IC: 3356F-S3I0004**

**FCC Rule Part: 15.247**

**IC Radio Standards Specification: RSS-210**

**ACS Project: 14-2070**

**Manufacturer: Alpha - High Theft Solutions**

**Model: S3I-0004**

## **User Manual**

## INSTRUCTIONS FOR S3i SPIDER WRAP XL – S3i 2 Alarm XL Spider Wrap (S3I-0004)

### Key Features:

- Dual EAS technology (AM/RF)
- Includes Lithium battery. Note: Battery is factory replaceable.
- If a Cable is cut, the Spider Wrap will alarm for approximately five (5) minutes before it is automatically silenced.
- The sound of the alarm emitted is between 90-95 decibels.
- 132" (335.28cm) cable

### Application:

1. Extend Cables to desired length

2. Lay Spider Wrap out and position merchandise on top

3. Position Cables around the merchandise. Be sure there is one (1) cable on each side of the merchandise. Insert the Locking Clip into Main Housing until you hear it click

4. Lift and turn the Flip-Up Winder Clockwise to snugly tighten the Cables around the merchandise. An audible clicking noise will be heard. Close the Flip-Up Winder

5. Ensure that the Locking Clip is completely secured and the Cables are snug around the merchandise. This completes the application process.

## Removal:

1. Align Detaching Locators into Key Locators. Lay the S3 HandKey or Super XT Key on the Main Housing

2. Fully engage the S3 HandKey or Super XT Key on the main housing as shown above.

3. Push the Locking Clip into the Main Housing until you hear a faint click

4. Once the Locking Clip is released from the Main Housing, pull out completely.

5. Wind up the Cables so the Medallion is engaged with the Main Housing and store in the appropriate bin.

## Alpha High Theft Solutions S3I-0004 (S3I SPIDER WRAP XL)

**Warning: Changes or modifications to this device not expressly approved by Alpha could void the user's authority to operate the equipment.**

### **FCC Information and Compliance**

#### **RF Exposure**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment may operate in direct contact with the body of the user under normal operating conditions. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

#### **For Class A Devices:**

*"NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense."*

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

*Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.*

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

*Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.*
