

## **FCC regulatory information for products with radio device.**

### **Federal Communications Commission Statement**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference; and
- (2) This device must accept any interference received including interference that may cause undesired operation.

### **FCC Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

### **FCC Radio Frequency Exposure statement**

This radio device has been evaluated under FCC Bulletin OET 65C and found compliant with the requirements as set forth in CFR 47 Sections 2. 1091 addressing RF exposure from radio frequency devices. The radiated output power of this radio device is far below the FCC radio frequency exposure limits. Nevertheless, this device shall be used in such a manner that that potential for human contact during normal operation is minimized to ensure RF exposure compliance. In order to compliant with RF exposure limits established in the ANSI C95.1 standards, the distance between the antennas and the user should not be less than 20cm (8inches).

## USE YOUR LYFT APP TO SET UP AMP

### 1. POWER

Turn Amp on by pressing the power button on the back.

### 2. PAIR

Open the Lyft app. Follow the onscreen instructions to pair Amp with your phone.

## POSITION

Clean your dashboard with the wipe. Set your Amp onto the base, remove the base's adhesive backing, and mount them onto your dash.

## PLACE

Practice mounting your Amp. It should be centered and as close to the windshield as possible, with logos lined up and facing out.
