Safety Instructions

⚠️ **WARNING:**

STRANGULATION HAZARD – Keep the unit and adapter cord more than 3 feet from the crib and out of baby's reach.

NEVER place camera or cords within the crib.

Secure the cord more than 3 feet away from baby's reach.

Never use extension cords with AC Adapters. Only use the AC Adapters provided.

CAMERA SET UP & USE

1. Determine a location for the CAMERA that will provide the best view of your baby in his cot
2. Place the CAMERA on a flat surface, such as dresser, table, or shelf
3. NEVER place camera or cords within cot.

WARNING

This baby monitor is compliant with all relevant standards regarding electromagnetic fields and is, when handled as described in the User's Manual, safe to use. Therefore, always read the instructions in the User's Manual carefully prior to using the device.
- Adult assembly is required. Keep small parts away from children while assembling.

- This product is not a toy.

- This baby monitor is not a substitute for adult supervision.

- Keep this user manual for future reference.

- Do not place the camera or cords in the crib or within reach of the baby (the camera and cords should be at least 3 feet away)

- Keep cords out of reach of children

- Do not use this baby monitor near water

- Do not install the baby monitor near a heat source

- Only use the cables and power adapters provided. Do not use other cables or power adapters as this may damage the device.

Getting Started

Turning on your nabi Cam

1. Detach the stand from the camera

2. Connect the Baby Monitor to a power outlet using the cable and power adapter provided.

3. Attach the camera to the stand

4. Press and hold the Power button for 2 seconds to turn the Baby Monitor on.

5. Press and hold the Power button for 2 seconds to turn the Baby Monitor off.

Registration (Pairing)
To start using your nabi Cam, please follow the procedure below

1. Read and agree with the nabi Cam EULA

2. Plug nabi Cam into a wall outlet. Make sure nabi Cam and your device are within range of your Wi-Fi network. Click "Pair" when ready

3. Enter a name for nabi Cam. This name will help you identify this camera on your network

4. **Set Password.** Enter a password for this camera

Using the nabi Cam

Setting up

- Place the nabi Cam in a convenient location (e.g. on the table) and point the camera lens towards the area you want to monitor

- Adjust the nabi Cam by rotating the camera up and down until you are satisfied with the image in your device

Night Vision Mode

The nabi Cam has 4 high-intensity infrared LEDs for picking up clear images in the dark. When the sensor detects a low level of light, the LEDs will automatically activate.

Talk Mode

Tap the 🎤 icon to enable 2-way communication with the camera. Tap again to disable.

Speaker

Tap the 🔊 icon to mute sounds from camera. Tap again to enable sounds

Zoom

Tap the 🔍 icon to zoom in. Zoom levels range from 1X to 5X. After 5X, user will be reverted back to 1X.

Multi-Cam

Tap the ⊞ icon to be taken to the multi-camera screen to view multiple cameras at once

Settings

Tap the ⚙ icon for nabi Cam settings. Add a new camera, set up your camera, or to go into Cloud Mode.

Camera Control

Add (pair) a camera

1. Tap the ⚙ icon to go into nabi Cam settings

2. Tap "Add Camera"

3. Look for the icon that says "+ camera" and tap it

4. Follow the on-screen instructions to complete the process

View a camera

1. Tap the ⊞ icon to view the connected cameras.

2. Select the camera you want to view by tapping on the screen with the camera you want to view

Renaming your camera

1. Tap the ⚙ icon to go into nabi Cam settings

2. Tap the ⊞ icon to view the connected cameras.

3. Select the camera you want to set up by tapping on the image

4. Tap the arrow next to the name of the camera to rename the camera

Deleting your camera

1. Tap the ⚙ icon to go into nabi Cam settings

2. Tap on "Add Camera"

3. Next to the camera's name is a white dash "-". Click on that and follow the on-screen instructions

FCC and IC Regulations

FCC Part 15

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.
