The DELL Orbiting receiver

Plug it. Forget it. Add to it. Your new DELL product ships with a DELL Orbiting receiver. Did you know you can add a compatible DELL wireless device that uses the same receiver as your current DELL Orbiting product? Are you Orbiting-ready?

If you have a DELL wireless device that's Orbiting-ready, you can pair it with additional Orbiting devices. Just a look for the orange Orbiting logo on the new device or its packaging. Build your ideal combo. Add something. Replace something. It's easy, and you'll use only one USB port for up to six devices.

English

Help with setup
*Is the trackpad powered on? If not, move the I/O slider to the I position. *Is the Orbiting receiver securely plugged into a computer USB port? Try changing USB ports.

*If the Orbiting receiver is plugged into a USB hub, try plugging it directly into a USB port on your computer.
*Did you install the battery? The trackpad uses two AAA alkaline batteries.

*Try moving the Orbiting receiver to a USB port closer to the trackpad. *Try reconnecting the trackpad and Orbiting receiver using the

DELL Orbiting software.
