

the espro™ press. a full immersion brewer: the coffee and water are brewed in the vacuum insulated brewer, which maintains temperature and gives you a precise flavour extraction. the unique stainless steel double micro-filter removes the grinds *and* allows the aromatic and flavourful oils through. you get flavourful coffee with great body, that doesn't continue extracting in your cup.

**taste the coffee, not the grounds**

**durable enough for home, coffee shop, and restaurant use**

### **what our customers say:**

*"Clean as paper but with the full body and rich flavors of a press pot."*

*"The quality of the coffee it makes is fantastic and being able to keep the temperature of the coffee hot unlike other presses is a definite plus."*

### **how it works**

the espro™ press is a precision coffee brewer. it preserves all of the freshly brewed flavours and aromas by micro-filtering twice with a unique metal filter. this micro-filter keeps grounds out of your cup, and lets the aromatic oils in.

### **product specifications**

- standard single cup size (about 8 - 9 oz of coffee)
- double micro-filter for an incredibly clean cup
- hot and constant temperature with double wall vacuum insulation
- durable stainless steel
- easy to clean
- 1 year no-questions-asked factory replacement warranty
- US and global patents pending
