- Custom billing reports
- Print, schedule, email and export reports
- Detailed call logs
- Connect up to 8 networked Communications Servers simultaneously

CALL ACCOUNTING APPLICATION SOFTWARE

Gain insight and understanding about your organization's performance and customer experience with Call Accounting application software. Call Accounting logs incoming, outgoing and internal calls into a database, allowing you to create a variety of historical reports to give you the information you need to manage your business via controlling expenses, distributing costs and increasing employee productivity.

Among its many benefits, Call Accounting allows for more accurate cost allocation among departments and reduces call burden on agents. Once implemented, Call Accounting can provide detailed call logs to help improve budgeting, planning and forecasting and lower telephony bills. Combined with the other benefits, the ability to prevent phone system misuse and abuse increases employee productivity across the board.

CO BASED CALL LOG
