3. Insert buckle strap into slot at the bottom back of the seat pad.
4. Locate zipper on the back of the seat pad and locate the zipper in the seat bite of the stroller. Zip seat pad to stroller.
5. Insert harness straps with hooks and harness straps with buckle tongues through slots on back of seat pad.
6. Attach hook & loop fastener on top of seat pad to stroller.

Removing & Attaching the Front Swivel Wheels

Place front swivel wheel assembly on the swivel shaft. The assembly is secure when it locks onto the shaft.

To remove the Swivel Wheels

Press in the square release button located at the bottom of the wheel holder while pulling the assembly off of the swivel shaft.

Release Button

Swivel lock MUST be locked before folding and storing stroller to avoid damage.

Removing the Basket

CAUTION

Do not place more than 10 lbs. in either basket. Remove all items from the basket before folding the stroller.

1. Unhook and unloop the fasteners from the front and back of the stroller basket.
2. Slide the basket off the basket frame.

Routine Maintenance

Store in a cool and dry area, especially in summer. To avoid damaging stroller, NEVER place items on top of stroller during storage.

Seat Cushion:

The seat cushion is machine washable. Set to gentle cycle using cold water and a mild detergent. Do not use bleach. Lay seat cushion flat to dry in shaded area. Do not machine dry. To prevent color fading, do not leave soaking for a long period. If the seat cushion is frayed or unraveling, discontinue use and call Consumer Affairs for further instruction.

Canopy, Waist Belt, Fixed Seat Base and Basket:

Hand wash with brush. Wipe out excess water with a dry cloth and dry in a shaded area. For stubborn dirt, dilute a mild detergent and apply directly to the dirty area. Wipe out the detergent.

Stroller Frame (Main Body)

Briskly wipe off any mud and dirt. Wipe with a damp cloth then wipe out any traces of moisture on the body with a dry cloth. If fabric is not dried completely, mold or mildew could occur.

Excessive exposure to the sun could cause premature color fading of stroller plastic and fabric.

Wheel Assemblies:

After prolonged normal use, the wheels of your stroller may not swivel as easily as when the stroller was new. This is usually due to buildup of dirt in the swivel mechanism. Before adding lubrication, remove the swivel wheels by pressing in the release button and wiping off mud and dirt. Do not use soap and water to wash wheels. Periodically check that all screws, bolts and nuts are tight.

Avoid lubricating the swivel wheels whenever possible. Excessive lubrication or adding lubricant to swivel wheels when new may cause them to develop a shimmy or wobble that may quicken their deterioration. Add a silicone* to the wheel assemblies in small amounts.

NEVER use lubricants because oil attracts dust and would hinder the movement rather than improve it.

*Silicone spray is available at most hardware stores.

Trouble Shooting

Stroller will not fold:

- Ensure waist belt is not caught in the side.
- Make sure front swivels are locked.
- Remove all items from the basket.
- Make sure the seat back is in the upright position.

Difficult to steer or Stroller pulls to one side:

- NEVER hang items from the handle.
- Make sure weight in basket is distributed evenly.
- Check that the brakes are not in the locked position.
- Clean wheels and silicone to wheels, if necessary.

Difficult to get up curbs:

- Pulling stroller backward makes going up a curb difficult, and could pose a safety hazard. Pull the handle up to lift the rear wheels onto the curb, then pull the stroller backward until the front wheels clear.
