## ABOUT US

***OUR GOAL IS TO SERVE THE CUSTOMER TO THE BEST OF OUR ABILITY EVERY TIME!***

### CAT COMMITMENT:

- We answer the phone with a live voice Monday-Friday 7:30-4:30 PST.
- We strive to ship everything within our product offering within 3-10 days.
- We strive to enter and acknowledge your order within 24 hours.
- We have competent, reachable in-house technical support everyday during business hours.
- We have a customer service department that strives to deliver customer satisfaction.
- We maintain a large inventory of "ready to be modified" Command Access brand, Allegion, Assa Abloy, Best and other manufacturer's products.

**INNOVATIVE SOLUTIONS:** We are committed to finding better, more cost effective ways to furnish the electrified opening. Our commitment to our in-house engineering department supports our goal to provide our customers with the right solution at the right price and the right time. We appreciate all ideas and suggestions from our customer base.

**BUILT IN USA:** Our commitment to American made products started from our humble beginnings with one milling machine and drill press. Moving forward our American owned/operated factory has continued investing in sophisticated US made multi-axis machine centers, allowing us to produce cost effective products right here in the USA.

**LIMITED WARRANTY:** Command Access Technologies warrants that its products are free from defects in workmanship and material under normal use and service. Since CAT does not control product usage, CAT makes no representation as to the degree of security conveyed by the use of any product. This warranty does not cover defects or damage which occur from improper maintenance, improper storage, improper installation, shipping and handling, ordinary wear and tear, misuse, abuse, accidents, unauthorized service, work done by others or consequential damages. CAT will not pay for the cost of repair performed other than in accordance with this warranty. CAT can only perform authorized warranty work at the factory. CAT's only liability, in tort or contract, whether under this warranty or otherwise, is limited to providing repair or replacement of any product or component part which is proven to be defective as covered by the warranty, within three (3) years after delivery from CAT to the original purchaser. Written notice of a product or component part

believed to be defective, as covered by this warranty, should be sent to Command Access Technologies 22901 La Palma Avenue, Yorba Linda, CA 92887. Include Claimant's name, address, phone, and identification of the product, invoice number and date, and a brief description of the defect. Upon receipt of such notice, a CAT representative will contact claimants to where to ship such product or component part, with shipping charges prepaid, for examination and, in the event such examination reveals a defect covered by this warranty, the product will be repaired (existing product installed 6 months +) or replaced (all new installations of 6 months or less). This warranty is in lieu of all other express warranties. To the extent permitted by law, all implied warranties are limited to the duration of this warranty. CAT shall not be liable for any incident or consequential damages. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary, from state to state.

# ELECTRIFIED MORTISE LOCKSETS

- EASY INSTALLATIONS - RELIABLE PERFORMANCE
- GRADE 1, ANSI RATED, 3 YEAR WARRANTY ON ALL ELECTRICAL & MECHANICAL PARTS
- UL, CSA, CSFM LISTED
- QUICK TO SHIP & A FAIR PRICE
- BUILT IN THE USA - DURABLE & DEPENDABLE

• ALLOWS FOR REMOTE KEYLESS ACCESS & EGRESS CONTROL

- MULTIPLE FUNCTIONS AND VOLTAGES TO MEET YOUR REQUIREMENTS
- COMMON APPLICATIONS INCLUDE STAIRWELL DOORS, LOBBY ENTRANCES, COMPUTER ROOMS, CLASSROOMS, INTERIOR & EXTERIOR DOORS IN SCHOOLS, HOSPITALS, OFFICES AND PUBLIC BUILDINGS
- MORTISE LOCKS CAN BE ORDERED COMPLETE, CHASSIS ONLY, OR MODIFICATION ONLY.

## SPECIFICATIONS

- All 12 or 24 volt solenoids rated for continuous duty . . . whether you're powering for 5 seconds or all week!
- Supplied w/ plug-in rectifier so there is no worry whether you're using AC or DC voltage.
- Low Current draw . . . multiple locks running off one power supply. 700mA @ 12V or 350mA @ 24V
- 3 year "no hassle" warranty issues reliability to the owner
- Available in EL (Fail Safe) or EU (Fail Secure)

## FUNCTIONS

**Storeroom** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). Inside lever is always free for immediate egress.

**Storeroom Clutching** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). Outside lever is freewheeling (clutching) when locked. Inside lever is always free for immediate egress.

**Classroom** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). . Outside lever can be maintained unlocked by key. Inside lever is always free for immediate egress.

**Institutional** – Latchbolt retracted by key on either side. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**).

**Entry w/deadbolt** – Latchbolt and deadbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt and deadbolt (**EU**) or prevents latchbolt and deadbolt from retracting (**EL**). Inside lever is always free for immediate egress.

**Privacy w/deadbolt** - Latchbolt and deadbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**), unless deadbolt is thrown. Inside lever is always free for immediate egress. **Available in EU (electronically unlocked) function only.**

# ELECTRIFIED MORTISE LOCKSETS

## How to Order

### Elements of a Part Number

#### FOR MODIFICATION, CHASSIS ONLY AND COMPLETE LOCKS

##### PREFIX or SUFFIX

**MD** - Modification - Prefix  
**CH** - Chassis Only - Suffix

##### MODEL + FUNCTION

Select a model number and add

**EL** (Fail Safe) - Electronically Locked

**EU** (Fail Secure) - Electronically Unlocked

##### VOLTAGE

**12** or **24** Volts must be specified

**Universal Input 10-30V see CRU**

##### OPTIONAL SWITCHES (Pg 12)

**REX** - Request-to-Exit

**DBM** - Deadbolt Monitor

**DPS** - Door Position Switch

**SLM** - Solenoid Monitor

**LBM** - Latchbolt Monitor

**SCM** - Security Monitor

**NEW**

##### LE-OPTION FOR MORTISE LOCK

Page 7

For Command Access & Schlage model #s only.

- Intelligent auto voltage sensing 12-30 VDC
- Extremely low holding current = to Motors

#### FOR COMPLETE LOCKS ONLY

##### TRIM

 - Tubular  
 - Bent

 - Straight  
 - Curved

 - Escutcheon

##### FINISH (BHMA std)

**613** - Oil Rubbed Bronze

**626** - Satin Chrome

**625** - Polished Chrome

##### SPECIAL ORDER

**605** - Polished Bronze

**612** - Satin Bronze

**606** - Satin Brass

**630** - Satin Stainless

##### KEYWAY

**S** - "C" Kwy Standard

**SFIC** - Small Format I/C Prep

**LC** - Less Cylinder

**LFIC** - Factory Large Format I/C Prep

##### ACCESSORIES

**Faceplates** - Storeroom function in specified finishes

**Strikes** - 4-7/8" ASA Strike in specified finishes

**CRU2** - Current Reduction Unit (AC & DC input)

**CRU3** - Current Reduction Unit (smaller footprint)

**4 Lead** - 4' Wire Lead to switches

**10 Lead** - 10' Wire lead to switches

**QC** - Molex Connectors

**BR1** - Bridge Rectifier w/ 12" lead (included)

**BR5** - Bridge Rectifier w/ 5' lead

Watch the CRU3 in action!

<b>LPM187EUxEL</b> <b>LPM188EUxEU</b> institutional X institutional	<p><b>Latchbolt Control:</b> Latchbolt retracted by key outside or inside (Double Cylinder operation). X Applied power electronically (EU only) retracts latchbolt for push/pull operation.</p> <p><b>Lever Control:</b> <u>Outside Lever &amp; Inside Lever</u> EL - locked electronically: Applied power prohibits both levers from retracting latchbolt. EU - unlocked electronically: Applied power allows both levers to retract latchbolt.</p>

## CONTROLLED ACCESS APPLICATION

The Command Access LPM180 mortise lock may be utilized in conjunction with any access control application using standard mortise locksets. When activated the LPM180 creates a push/pull that satisfies both in-swinging and out-swinging doors. Inside free egress can be attained by turning the inside lever to manually open the door. Outside access is controlled by the access control system or by physical key override.

# ELECTRIFIED MORTISE LOCKSETS

## OPTIONAL ACCESSORIES

### CRU3 - CURRENT REDUCTION UNIT

Command Access current reduction unit is recommended for "fail safe" or "unlock cycle" applications to reduce heat and extend solenoid life meaning no more "hot levers."

- **CRU3** - Automatically adjusts incoming voltage to maximize the efficiency of our 12 or 24VDC locks.

(see page 21 for full specifications)

### VC2412 - Voltage Convert 24VDC to 12VDC

Voltage converter takes incoming 24VDC and outputs 12VDC to power any locking device, reader & more.

(see page 21 for full specifications)

## MORTISE LOCK SWITCH OPTIONS

A variety of monitoring switches are available for Command Access modified mortise lockset. All switches are SPDT (single pole, double throw) and either mechanical or reed type. Since each manufacturer has different configurations and designs, switch options not available with all mortise locks. Please refer to the dedicated specification page for your desired mortise lock model, or consult the factory for switch application verification. With the exception of a few field installable REX kits, **all other switches must be installed at the factory.** Here is a list of available switches and their definition.

\* For additional switch options refer to specification page at [www.commandaccess.com](http://www.commandaccess.com)

**REXKIT-ML** - Field Installable (Request to Exit or AE switch) for Command Access ML1 (CATREXKIT-ML) series and Schlage L series mortise locks - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area.

**LBMKIT-ML** - Field Installable (Latchbolt Monitor or LM switch) for Command Access ML1 (CATLBMKIT-ML) series and Schlage L series mortise locks - sends a signal to the control panel to monitor the position of the latchbolt.

**REX** - Request to Exit or AE switch available - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area.

**REXBP** - Request to exit by-pass- sends a signal to alert the control panel that the door is about to be opened by someone intending to

exit from within the secured area but switch will be bypassed when the lock is in the unlocked state, preventing false REX signals.

**LBM** - Latchbolt Monitor switch available - sends a signal to the control panel to monitor the position of the latchbolt.

**DPS** - Door Position switch available - sends a signal to the control panel to monitor the position of the deadlatch.

**DBM** - Deadbolt Monitor switch available - sends a signal to the control panel to monitor the position of the deadbolt.

**SLM** - Solenoid Monitor switch available - sends a signal to the control panel to monitor the position of the solenoid.

**SCM** - Security Monitor switch available - uses a combination of switches to send a signal to the control panel to monitor the position of the deadlatch and the solenoid.

## LOW ENERGY OPTIONS

The new Command Access "LE" version uses proven solenoid technology with energy specifications that equal motor driven locksets in the industry. The unit comes with a built-in REX and ability to change from Fail Secure (EU) to Fail Safe (EL) in the field without removing the lid.

### SPECIFICATIONS

- Intelligent auto voltage sensing 11-30 VDC
- Extremely low holding current = to Motors
- Built-in REX switch
- Available for Command ML1 & Schlage ML80 series

# ELECTRIFIED CYLINDRICAL LOCKS

- EASY INSTALLATIONS - RELIABLE PERFORMANCE
- GRADE 1, ANSI RATED
- UL, CSA, CSFM LISTED
- QUICK TO SHIP & A FAIR PRICE
- BUILT IN THE USA - DURABLE & DEPENDABLE
- 3 YEAR WARRANTY ON ALL ELECTRICAL & MECHANICAL PARTS

- ALLOWS FOR REMOTE KEYLESS ACCESS & EGRESS CONTROL
- MULTIPLE FUNCTIONS AND VOLTAGES TO MEET YOUR REQUIREMENTS
- COMMON APPLICATIONS INCLUDE COMPUTER ROOMS, CLASSROOMS, INTERIOR IN SCHOOLS, HOSPITALS, OFFICES AND PUBLIC BUILDINGS
- CYLINDRICAL LOCKS CAN BE ORDERED COMPLETE OR MODIFICATION ONLY (OF CUSTOMER'S LOCK)

## SPECIFICATIONS

- UL and CSFM Listings; non-handed 161 prep
- All 12 or 24 volt solenoids rated for continuous duty . . . whether you're powering for 5 seconds or all week.
- Supplied w/ plug-in rectifier so there is no worry whether you're using AC or DC voltage.
- Low Current draw . . . multiple locks running off one power supply. 700mA @ 12V or 350mA @ 24V
- REX switch available on most models
- Available in EL (Fail Safe) or EU (Fail Secure)
- 3 year "no hassle" warranty issues reliability to the owner

## FUNCTIONS

**Storeroom** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). Inside lever is always free for immediate egress.

**Classroom** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). . Outside lever can be maintained unlocked by key. Inside lever is always free for immediate egress.

**Storeroom Clutching** – Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt (**EU**) or prevents latchbolt from retracting (**EL**). Outside lever is freewheeling (clutching) when locked. Inside lever is always free for immediate egress. .

Published: **July 10, 2017**

## OPTIONAL ACCESSORIES

### CRU3 - CURRENT REDUCTION UNIT

Command Access current reduction unit is recommended for “fail safe” or “unlock cycle” applications to reduce heat and extend solenoid life meaning no more “hot levers”!

- CRU3 - Automatically adjusts incoming voltage to maximize the efficiency of our 12 or 24VDC locks.  
(see page 21 for full specifications)

### VC2412 - Voltage Convert 24VDC to 12VDC

Voltage converter takes incoming 24VDC and outputs 12VDC to power any locking device, reader & more.  
(see page 40 for full specifications)

## CYLINDRICAL LOCK SWITCH OPTIONS

All Command Access modified cylindrical lever locks are available with REX monitor switches. All switches are SPDT (single pole, double throw) and either mechanical or reed type. With the exception of a few field installable REX kits, all other REX switches must be installed at the factory. Here is a list of available switches and their definition.

**REX** - Request to Exit or AE switch available (depending on manufacturer) - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area

**REXKIT-CL** - Field Installable REX (Request to Exit ) switch kits are available for a few cylindrical locks. Each kit includes the switch assembly and all necessary items needed for quick field installation.

## LOW ENERGY OPTIONS

The new Command Access “LE” version uses proven solenoid technology with energy specifications that equal motor driven locksets in the industry. The unit comes with a built-in REX and ability to change from Fail Secure (EU) to Fail Safe (EL) in the field without removing the lid.

### SPECIFICATIONS

- Intelligent auto voltage sensing 11-30 VDC
- Extremely low holding current = to Motors
- Built-in REX switch
- Available for Command CL1 only

## SWITCH OPTIONS FOR CYLINDRICAL LOCKS

PART	DESCRIPTION	LIST
REX	Request to Exit Switch installed in cylindrical lock	\$60
CATREXKIT-CL	Request to Exit Switch installed on CAT CL1 series inside spring cage	\$70
SCHREXKIT-CL	Schlage ND series Anti-Rotation Plate with Request to Exit (REX) switch installed	\$70

# ELECTRIFIED EXIT TRIM

molex

- ELECTRIC LOCKING OR UNLOCKING BY A REMOTE SWITCH
- INTERIOR OR EXTERIOR ENTRANCE (INGRESS) WITH MECHANICAL EXIT DEVICE
- WHERE FIRE/LIFE SAFETY CODES REQUIRE A "FAIL SAFE" CONDITION
- STAIRWAY CONDITIONS

## SPECIFICATIONS

- SUPPLIED W/ PLUG-IN RECTIFIER SO THERE IS NO WORRY WHETHER YOU'RE USING AC OR DC VOLTAGE.
- LOW CURRENT DRAW . . . MULTIPLE LOCKS RUNNING OFF ONE POWER SUPPLY.
- AMPERAGE – 250mA @ 12V OR 150mA @ 24V
- 700mA @ 12V OR 350mA @ 24V (PRECISION ONLY)
- ALL 12 OR 24 VOLT SOLENOIDS RATED FOR CONTINUOUS DUTY . . . WHETHER YOU'RE POWERING FOR 5 SECONDS OR ALL WEEK.
- Use CRU3 FOR UNIVERSAL VOLTAGE INPUT 12-30V
- REE SWITCH AVAILABLE ON MOST MODELS
- AVAILABLE IN EL (FAIL SAFE) OR EU (FAIL SECURE)
- 3 YEAR "NO HASSLE" WARRANTY ISSUES RELIABILITY TO THE OWNER
- FIELD INSTALLATION KIT NOT AVAILABLE FOR COMMAND ACCESS MODIFICATION OF EXIT TRIM

## FUNCTIONS

**STOREROOM (EU)** - Latchbolt retracted by key outside or lever inside. Applied power allows outside lever to retract latchbolt. Inside lever is always free for immediate egress. . Inside push pad is always free for immediate egress.

**STOREROOM (EL)** - Latchbolt retracted by key outside or lever inside. Applied power prevents latchbolt from retracting. Inside lever is always free for immediate egress. . Inside push pad is always free for immediate egress.

## EXIT TRIM SWITCH OPTIONS

Most Command Access electrified/modified exit trims are available with an **REE** (Request to Enter) switch. This switch is a SPDT (single pole, double throw) switch that sends a signal to alert the control panel that the door is about to be opened by someone intending on entering a secured area. *This switch must be installed at the factory.*

HOW TO ORDER

## COMMAND ACCESS ET15/16 SERIES

The Command Access ET series exit device trim is perfect for storefront or stairwell conditions and applications, where electric pullback of the exit device's latchbolt(s) is cost prohibitive or not required. This is especially practical in applications where fire/life safety codes require a "fail safe" condition, which is not an option with electrified latch pullback devices. Since the current draw is quite low there is no need for an expensive power supply to provide the surge current. *We can also modify a variety of exit device trims with the same features and options as the ET15.*

## WHY WE WENT MOTORIZED...

### THE FASTER, QUIETER, POWER EFFICIENT SOLUTION

Years ago in the industry, using motors for latch pullback devices resulted in slow performance and consistent failures. For the past ten years Command Access has pioneered motorized Latch pullback taking them to a new level that allows for a fast, quiet, smooth, and consistent latch pullback. Each motor assembly is designed specifically for the device, rather than taking a "one size fits all" approach.

In addition, we now offer the new MM4S module with our patent pending "PTS" push-to-set technology, & 3 different energy consumption settings from energy conscious to heavy output to get the tough jobs done!

Here is what's great about our "PTS" technology. While we aim to set every exit device correctly at the factory prior to shipping, we cannot account for every condition of every door opening in the field. Instead of our customers having to make several trips out to a job site to re-adjust an exit device, the device can be adjusted at the door by virtually anyone with a credential. After the proper location is set there is switch to lock programming in place to avoid accidental resetting from occurring. Here's how "PTS" works in three easy steps;

### PTS

- **Step 1** – press the device push pad to the desired setting. (this can be fully depressed or less than fully depressed)
- **Step 2** – while depressing the push pad, activate the device. (i.e. presenting the credential to the reader)
- **Step 3** - continue to keep pad depressed, the device will beep 6 times. After the beeps have stopped, release the pad and now the adjustment is complete. If not to your liking repeat the three steps.
- **Step 4** - Once you've found the desired position, flip the switch on the MM4S to lock PTS programming. That's all there is to it.

## TYPICAL LATCH PULLBACK INSTALLATION FLOW CHART

A typical Command Access latch pullback device installation includes the device, the power transfer, and a power supply. The access control company integrates their card reader and controller to send a signal to the power supply that in turn unlocks the device (see example to the right). More advanced installations additionally incorporate auto operators and palm buttons for ADA/Barrier Free and hospital applications (see page 7 for an installation flow example).

### APPLICATIONS INCLUDE:

- Hospital entrances and hallways
- Universities and institutions
- ADA compliance
- Barrier Free compliance

# ELECTRIFIED LATCH PULLBACK KITS

molex

- UL LISTED
- OPTIONAL REX ADD-ON
- QUICK & EASY INSTALLS WITH STEP BY STEP VIDEOS TO HELP
- WE'VE TESTED OUR LATCH PULLBACK DEVICES TO OVER 2 MILLION CYCLES!
- LONG WIRE RUNS WITH 18/2 WIRE TO POWER SUPPLY, SAVES COST.
- LOW CURRENT DRAW- SOLENOID ~1.5 AMPS; MOTORIZED ~900mA
- 6' CABLE WITH QUICK CONNECT
- 3-YEAR "NO HASSLE" WARRANTY ISSUES RELIABILITY TO THE OWNER

## ELECTRIFIED KITS

SEE PAGE 33 FOR QUICK REFERENCE

### SPECIFICATIONS

**MOTORS** - Motor driven drive pulls back the exit device latch/latches from the locked position.

- Fast, quiet and smooth operation - You'll feel the difference
- MM4S module is compatible with most LINEAR 24VDC, 1A (or greater) **regulated & filtered power supplies.** *But for best results use our PS series locking hardware power supplies.*
- Electric dogging - Full push-pad retraction
- Push to Set "PTS" - Easy electronic adjustment for latchbolt travel.
- If push pad is pulled from open position, motor will re-set itself & pull back the latch without fail
- Adjustment screw for easy Electronic latchbolt adjusting.
- On-board audible self diagnostics for fast & easy troubleshooting at the opening.

**SOLENOIDS** - Solenoid driven drive pulls back the exit device latch/latches from the locked position.

- Extended duration latch pullback capability for "continuously on conditions"
- Includes the patented PM300 interface power modules programmed to maximize the efficiency and life of the solenoid
- Up to 700' wire run with 18/2 wire to power supply, saves cost.
- New optional switch for "High Output" mode.
- Loud activation provides audible confirmation door is un-locked

### FUNCTIONS

**LPEU (FAIL SECURE)** - Exit device latch(es) retracted with switched power allowing for outside access or auto operator integration. Without power, the device and latch(es) are secured (locked). Inside push pad always allows for free egress.

## COMMAND ACCESS PD25/26 SERIES

LINK

The Command Access PD25 architectural exit device is a high quality, grade 1 solution for new and retrofit applications. This device is offered in numerous designs in both the 613 and 626 finish. As a retrofit solution, the PD25 standard template retrofits over Von Duprin 98/99 series and a majority of the typical architectural devices on the market. Additionally, the PD25 standard templating retrofits over a majority of the typical architectural devices in the market. If you need latch retraction in an architectural exit device application, the PD25 offers a high quality and aesthetically pleasing design in a low cost package.

## EXIT DEVICE SWITCH OPTIONS

Command Access offers a variety of factory and field installable exit device monitoring switches. Each mechanical switch is SPDT (single pole, double throw) and capable of .5 amp @ 24 volts. Common applications employ these switches to monitor egress and device positioning to ensure the most secure assembly possible.

**REX** - Request to Exit switch - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area. **Field Installable REX (Request to Exit ) switch kits are available for a variety of exit devices.**

**LBM** - Latchbolt Monitor switch - sends a signal to the control panel to monitor the position of the latchbolt. **Field Installable LBM (Latchbolt monitor ) switch kits are available for exit devices.**

## ACCESSORIES & REPLACEMENT PARTS FOR EXIT DEVICES

PART	DESCRIPTION	LIST
<b>8' Lead</b>	8' power lead for Exit Devices	\$28
<b>QC or CON</b>	8-pin or 12-pin Molex Connectors added to locking device to retrofit ElectroLynx® or Allegion Connect®	\$40

# POWER MODULES & ACCESSORIES

## PM300

The patented PM300 (taking over from all PM200 & PWM200 units) power booster module is an interface module that connects between the solenoid circuit of a latch-pullback exit device and the power supply.

- POWER BOOSTER MODULE PROVIDES LOCAL POWER BOOST TO SOLENOID DRIVEN LATCH PULLBACK DEVICES
- INCREASES WIRE RUNS UP TO **700'** ON **2-18GA** WIRES
- GIVES ANAEMIC POWER SUPPLY/EXIT DEVICE A BOOST - EXTENDING THE LIFE OF THE OPENING!
- WORKS WITH MOST **1.5A** POWER SUPPLIES - ELIMINATES THE NEED FOR A EXPENSIVE "SPECIALITY" POWER SUPPLY

HEAR THE BOOST!

## CRU3

- INCREASED SOLENOID LIFE
- IMPROVED EFFICIENCY FOR CONTINUOUS DUTY APPLICATIONS
- SOLVES "WARM" LEVERS ON EL (FAIL SAFE) OPENINGS
- SIGNIFICANT ENERGY \$\$ SAVINGS WHEN USED ON CONTINUOUS DUTY APPLICATIONS
- HOLDING CURRENT AS LOW AS **40 mA**
- HIGH FREQUENCY PULSE SENT TO ENSURES NO SOLENOID DROPOUT
- SMALLER FOOTPRINT VS CRU2

SEE IT IN ACTION!

## VC2412

- CONVERTS 24VDC TO OUTPUT 12VDC
- WORKS WITH ANY 24VDC POWER SOURCE
- EURO CONNECTOR ON 12VDC SIDE
- MAY ELIMINATE NEED FOR ADDITIONAL 12VDC POWER SOURCE
- POWERS LOCKING DEVICES, PRI'S, CARD READERS, CAMERAS & MORE

SEE IT IN ACTION!

## POWER MODULES & ACCESSORIES

### VD2

[LINK](#)

- RETROFIT BOARD FOR DISCONTINUED **VD873** RELAY BOARD (871-2 CARD)
- MOUNTS UP TO EXISTING SCREW HOLES - NO NEED TO PURCHASE A WHOLE NEW POWER SUPPLY
- EURO CONNECTOR FOR EASY WIRING VS SCREW TERMINALS

### DS1

- BI-DIRECTIONAL SEQUENCING MODE
- 3 ADJUSTABLE DELAYS, UP TO 30 SECONDS MAXIMUM
- IDEAL FOR LATCH PULLBACKS ON AUTO OPERATOR OPENINGS
- EASY POTENTIOMETER ADJUSTMENTS
- LEDs FOR VISUAL RELAY CONFIRMATION
- ACCEPTS WET OR DRY INPUTS
- ONE SHOT DESIGN FOR SECURITY OR MAINTAINED OUTPUT FOR SMOKE EVACUATION
- SPDT CONTACTS RATED AT 3 AMPS @ 30VDC
- LED'S FOR VISUAL RELAY CONFIRMATION
- INPUT FOR CONNECTION FOR TELEPHONE ENTRY SYSTEM

# TERMS & CONDITIONS

**PRICES:** All LIST prices are subject to change without prior notice and are not guaranteed. All prices are per unit (each) unless otherwise specified and do not include sales or local taxes. All shipments will be made at prices prevailing at time of shipment.

**EXPEDITE FEE:** A customer may request that an order be expedited. An additional charge of up to 25% of the cost of the expedited items may be charged. Expedite lead times are subject to availability. Please call for approval.

**PAYMENT TERMS:** The standard credit terms of Command Access Technologies (herein called CAT) are 2% 10 days net 30. Net 30 means the check shall be received at CAT on or before 30 days from the date of the invoice. Interest will be charged at the rate of 2% per month on past due accounts.

**ACCEPTANCE OF ORDERS AND/OR QUOTATIONS:** Possession of prices from CAT does not commit CAT to accept any order. CAT reserves the right to refuse any order and will not be bound to fulfill any order until it has been accepted by a representative of CAT and confirmed by a written acknowledgement. Quotations are valid for ninety (90) days following the date of the quotation.

**OPEN ACCOUNT STATUS:** CAT reserves the right to decline or discontinue direct sales to any customer.

**ACKNOWLEDGEMENTS:** An acknowledgement is an exact copy of a customer's order as entered by CAT and should be verified by the customer. If the acknowledgement does not agree with said customer's understanding CAT should be advised within (3) three days or the order will be billed as acknowledged. CAT's sales terms shall apply irrespective of any special stipulation appearing in customer order, unless specifically acknowledged and accepted by CAT.

**RETURNED GOODS:** The customer must advise customer service at CAT of merchandise to be returned and a Returned Goods Authorization (RGA) will be issued. CAT will not accept goods returned without an RGA. Full credit against further purchases or a replacement will be made at the option of CAT if upon investigation reveals that goods were shipped in error or if goods are defective in workmanship or material. Otherwise, a restocking fee of not less than (25) twenty-five percent will be charged. All merchandise must be PREPAID AND PROPERLY PACKED. All C.O.D. orders shipped to CAT will be refused. Returned goods must be packed in their original boxes. If product has been installed it cannot be returned but only repaired, please consult factory for repair costs (unless under warranty). No credit will be given for product not in its original form unless, upon CAT's inspection, product is found to be defective. If product is returned as defective and is found to be operational, product will be returned to customer (C.O.D.) and no credit will be issued.

**MINIMUM CHARGE:** No order will be invoiced for less than \$25.00 net plus shipping charges.

**CHANGES OR CANCELLATIONS:** When a special order is accepted, and entered, no change can be made and the order is non-cancellable. Cancellation for items already packed for shipment will be removed if possible. A twenty-five percent (25%) restocking fee will apply.

**CLAIMS OR SHORTAGES:** Every possible care is taken in the final examination of packing of goods, and no complaints will be accepted unless made promptly upon receipt of goods. No claim will be allowed for work done by others, consequential damages or other expenditure, and CAT's understanding to repair or replace defective goods is its only liability. No claim for damage shortage or loss in transit will be accepted unless notice is given in writing to the carrier and to CAT within (10) ten days of receipt of goods.

**BACK CHARGES:** CAT is not responsible for, does not authorize, and will not accept any charges for the cost of labor, travel or material incurred by anyone other than CAT for any installation, repair, service, or replacement unless incurred with CAT's prior written consent and agreement.

**FREIGHT CHARGES:** All goods are invoiced F.O.B. CAT, Yorba Linda, California. Freight charges are prepaid and are added to invoice. Consignee pays C.O.D. freight charges when delivered to the Freight Company the shipment becomes the property of the purchaser, who assumes the risk of loss or damage in transit. If invoice exceeds \$1,000.00 net, full service freight by FedEx or our choice within the continental U.S.A. (excluding Hawaii, Alaska, Guam & Puerto Rico) is deductible, provided invoice is paid within set terms. Not all products qualify for freight deduction. Airfreight and other special shipments are not deductible. CAT does not ship directly to Canada, for all Canadian destinations please contact Connection Network Agencies at 905-823-3002.

**PRODUCT CHANGES OR CANCELLATIONS:** CAT reserves the right to modify or discontinue any price, product, design, function and finish without prior notice. **PRODUCT FINISHES:** Although CAT modifies products with the finest protective coatings, they do have their limitations. In time, they might deteriorate from extremes in climate, frequency of use, perspiration, or other factors. CAT does not consider excessive wear or tarnishing of the finish because of any of the above conditions as a defect. It is considered a normal process, which cannot be avoided. Thus, CAT cannot guarantee product finishes and will not repair or replace finishes under this warranty.
