3. Install the software

Step 1: Charge Your Headset

You are recommended to charge your headset before it is used for the first time. Connect your headset to your computer using the USB cable, or connect it to a power supply via an adapter (available separately). The LED will light in red when charging.

Using Your Headset While Charging

During subsequent charges, you can use your headset while it charges. The LED will light in red while charging and return to its last status when fully charged.

You can also check the status of the battery via the battery indicator at the top right corner of the Sound Blaster JAM Control Panel. Please refer to **Using the Software** for details.

Note:

The low battery tone will start beeping to inform users of its status 15 minutes before the headset is completely powered off.

Step 2: Connect Your Headset

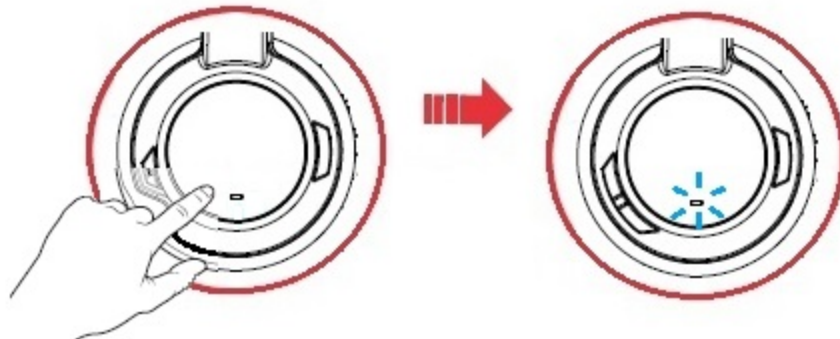

Turn on your Sound Blaster JAM by pressing the **Multifunction** button.

- Turn **ON**: Press and hold 2 seconds
- Turn **OFF**: Press and hold 4 seconds

Bluetooth Pairing

1. Activate pairing mode on the headset

Turn on your headset. If the headset has not been paired with any devices previously, it will go into *Bluetooth* discoverable mode. Otherwise, it will be automatically paired to previously paired devices.

The *Bluetooth* discoverable mode is only available for 60 seconds after the headset is turned on. To activate *Bluetooth* again, press the **Multifunction** button for 2 seconds. The LED will begin to blink quickly in blue for 60 seconds while waiting to be connected.

2. Activate pairing mode on your device

Activate *Bluetooth* on your smart device. From the list of discovered *Bluetooth* devices, select "**Sound Blaster JAM**".

Note:

Bluetooth pairing between these devices may vary depending upon the model type. Consult your device's manual on how to pair.

3. Pairing success

When the headset and the *Bluetooth* device are paired, the LED will flash slowly in blue to indicate successful pairing before returning to its default / last status.

Pairing Multiple Devices

The Sound Blaster JAM is able to pair up to two smart devices at the same time! To have the second device paired, repeat steps 1 to 3. If a user wishes to pair the headset with a third smart device, one of the two devices that are currently paired with the headset has to be unpaired.

Note:

Only one of the devices is able to play music at one time. The last paired smart device takes precedence over the other device.

When there's an incoming call, the call takes precedence over audio playback -- music fades out and the ringtone will be heard.

NFC Pairing

Bring your NFC-enabled device close (20mm) to the NFC zone / **Multifunction** button. The LED will blink slowly in blue and a 3-note tone will be heard to indicate successful pairing. Play music from your device and experience superb audio realism and stunning 3D surround effects.

If you wish to unpair the devices, simply tap your NFC device on the headset again.

USB Connection

Connect your headset to a computer using the USB cable. Turn it on by pressing and holding the **Multifunction** button for 2 seconds. The LED will light in green when it is successfully turned on. You can stream audio from your computer through the USB connection.

- **SBX Surround** - designed to work best when you connect a pair of headphones to the Sound Blaster JAM, this technology provides immersion control to enhance the natural sense of audio depth and spaciousness by creating virtual surround sound channels. Stereo content or multichannel content will sound as if its coming from all sides while voices remain centered in front and original balance and timbre is preserved.
- **SBX Crystalizer** - restores the natural dynamic range that is lost when music files (iTunes and MP3) gets compressed. This makes the music sound as good as the artist originally intended, and adds an enhanced level of realism for movies and games.
- **SBX Bass** - fills in the missing low frequency tones and gives the extra impact for a better entertainment experience. Consumers no longer have to tolerate a lack of bass in speakers as the SBX Pro Studio Bass technology dramatically improves the sound experience even in the absence of a subwoofer.

- **SBX Smart Volume** - addresses the problem of abrupt volume level changes during playback and between songs by continuously measuring volume automatically, applying gain and attenuation intelligently to compensate for any changes.
- **SBX Dialog Plus** - enhances the voices in movies for clearer dialog, allowing the listener to hear the dialog over the rest of the soundtrack and over ambient noise in the listening environment.

Earphones

- When a conductive apparatus, such as earphones, is used in close proximity with a CRT television or CRT monitor, the latter may emit an electrostatic discharge. This electrostatic discharge can be felt as a static shock. While this static shock is usually harmless, it is good practice to avoid close contact with CRT devices when using earphones.

- Do not listen to your audio device at high volume when driving, cycling or crossing the road, especially in heavy traffic or any other traffic condition where such use will hinder safe travel on the roads. We recommend that consumers be extremely cautious when using this device on the road.

Avoid Hearing Damage

Permanent hearing loss may occur if the headphone is used at high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use the headphone at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

IMPORTANT — A LIRE AVEC ATTENTION

Ecouter de manière prolongée, à un très haut volume sonore de la musique (au dessus de 80 decibels), aumoyen d'un casque ou d'écouteurs, peut entraîner une détérioration irréversible et définitive de vos facultés auditives. L'usage répété et habituel d'un casque ou d'écouteurs à un niveau de volume sonore trop élevé peut donner l'impression à l'utilisateur que le volume sonore émis par l'appareil n'est pas suffisant. L'utilisateur sera tenté d'augmenter, petit à petit, son réglage habituel, risquant ainsi d'atteindre un niveau dangereux pour ses oreilles. Afin de protéger votre santé, et vos oreilles, veillez à maintenir le volume de la sortie casque de votre appareil à un niveau adapté et à interrompre son utilisation régulièrement et particulièrement si des symptômes, comme des troubles de l'ouïe, se manifestent.

N'utilisez pas le casque ou les écouteurs pendant la conduite d'une voiture, d'une bicyclette ou de tout autre véhicule motorisé, afin d'éviter tout accident de la circulation. En outre, il est interdit dans certains pays d'utiliser un casque ou des écouteurs en conduisant. Il peut être également dangereux d'écouter à volume élevé tout en marchant, spécialement aux passages piétons. Soyez toujours extrêmement prudent et cessez d'utiliser cet appareil dans les situations présentant des risques d'accident.

Evitez d'utiliser le casque ou les écouteurs à volume élevé. Les médecins spécialistes de l'audition déconseillent une écoute continue à volume trop élevé. Si vous percevez un sifflement dans les oreilles, réduisez le volume ou cessez l'écoute.

Maintenez un volume d'écoute modéré. Vous pourrez ainsi entendre les sons extérieurs et être attentif aux gens qui vous entourent.

Votre produit Creative accompagné des écouteurs fournis, est conforme à la réglementation française concernant les baladeurs musicaux (Arrêté du 24 Juillet 1998). Les caractéristiques techniques de ces écouteurs se trouvent dans le manuel en ligne et/ou sur le site internet de Creative.
