

Addendum to the User Manual for the Cubic Transportation Systems, Inc. Tri-Reader 2

### **IMPORTANT FCC NOTICE**

When the Tri-Reader 2 is installed into a device, such that the FCC ID number on the Tri-Reader 2 is not visible from the outside of the device, an additional label must be provided. This additional label must be placed on the outside of the device so as to be visible before installation of the device.

This label must show the following wording:

“Contains FCC ID: LVCMTTR01”

This must be a permanent label that has a life expectancy at least equal to that of the life of the equipment to which it is attached. The text must be legible, with good contrast and a minimum of 8 point type size.

This is a mandatory legal requirement of the FCC. Failure to provide such marking invalidates the FCC’s authorization for operation of the Tri-Reader 2.
