

# CA-2885BT Bluetooth Speaker

## Congratulations

Your CA-2885BT speaker contains Bluetooth® technology, allowing you to wirelessly play music from nearly any Bluetooth enabled device. Now you can enter the room, select music to play on most smartphones, tablets, or laptops, and control your listening enjoyment from the comfort of your lap. From your device, you can easily control and change music tracks, playlists, adjust volume up or down, or even listen to podcasts, or many other audio applications available on your device.

Owner's Guide with connection

## Caution

- Read Instructions Carefully – All safety and operating instructions should be read before this device is operated.
- Heat – Keep speakers out of extreme heat and away from extreme heat sources, such as, space heaters, radiators, stoves and other devices.
- Water and Moisture – Keep speakers out of the rain and away from water.
- Cleaning – Use a dry cloth for cleaning. Do not wipe any part of the system with cleaning solvents, such as, furniture wax, bleach, benzene, or ammonia.

## Speaker connection

Please read the step by step instructions along with the diagrams provided.

### Charging

- Turn off the sample.
- Plug in the included USB charging cable for charging (micro-USB plug to speaker and standard USB plug to USB power source).
- LED will be white while the speaker is charging.

### Pairing with the speaker the first time

USB cable for charging

### Pairing with the speaker the first time

Before you start, please fully charge up the speaker.

Ensure the Bluetooth capability of your source device is turned on and ready to discover new items. If needed, see your device's instructions to add or setup a Bluetooth device.

Below steps are the guidelines for you to wirelessly connect with the Bluetooth function of your speaker:

1. Switch on the device and it will begin "Bluetooth pairing" mode – blue LED blinking.
2. With your audio source (smartphone, tablet, laptop, etc.), find the Bluetooth device list and look for "CA BT SPEAKER". Select it to pair/connect with the speaker.
3. When the device connects, you will hear a short audible sound, the LED will stop blinking and will turn to a solid "on" state.
4. Now you can go to your music applications; start play and enjoy your music.

Turning off your source device will automatically disconnect your speaker and the speaker will go back to "Bluetooth pairing" mode automatically. If you plan on not using your speaker again for an hour or more, we recommend you turn off the speaker to save battery until you are ready to listen again.

### Force pairing and connection with new devices

- When the system is on, the speaker system has connected to any device. Press and hold the "ANSWER / END" button for three seconds until blue LED begins blinking. Search your device's Bluetooth list for "CA BT SPEAKER" and tap to connect/pair.

### Pairing with the speaker after the first time

Once you've successfully paired your speaker, your device will automatically connect with it when returning to the room it is situated. You will be able to go to the audio application of your choice, select your audio tracks to begin enjoying again.

### Receiving a call hands-free

If receiving a call on a mobile phone connected via Bluetooth, you can make a hands-free call through the speaker. Simply press "ANSWER/END" button to pick up the call, press again to end the call.

### Note:

- When there is a phone call during audio playback using a Bluetooth connection, the speaker will play a ringtone simultaneously.
- Poor mobile phone reception will affect the conversation, make sure the mobile phone is in a place with good reception.
- An area near a wall may cause considerable voice echo. Move away from the wall or lower its volume to minimize this effect.

### Playing Audio via AUX in jack\*

1. Make sure the speaker is fully charged.
2. Power on the device.
3. Plug in a 3.5mm AUX cable into AUX in jack.
4. Connect the other end of the AUX cable with your secondary audio source (often the headphone output jack).
5. Music will play from the speaker system when you start the playback on the secondary audio source.

\* AUX input is prioritized (overrides Bluetooth audio source) whenever a 3.5mm cable is plugged in.

## Trouble shooting

Symptom	Solution
Speaker System Will Not Power	Make sure the speaker is charged up.
Speaker Does Not Produce	Verify the speaker is getting power. Check above steps.
	Verify that all cables and devices are plugged into the correct jacks.
Sound Is	Adjust the sound source's master volume control by balancing the volume until it's centered.

## Trouble shooting Bluetooth connections

### Can't connect for the first time

1. Turn off the speaker.
2. Check your Bluetooth source device and be sure you have found the section that allows you to discover new Bluetooth products. If you see the CA BT SPEAKER on the list, but cannot connect, you may need to try and synch again. To start fresh, with your Bluetooth device, select "Forget this device," to remove the CA BT SPEAKER from the list. You may need to turn off the Bluetooth function on your device to fully clear your list.
3. Turn the speakers back on and go into the "pairing mode".
4. Return to your source device, and re-enable the Bluetooth function. Look for the CA BT SPEAKER speakers to show back up on the list.
5. Select the speaker on your screen, and listen for the audible sound to confirm pairing.

### Can't connect when returning

1. If, for some reason, the CA BT SPEAKER does not automatically reconnect with your Bluetooth device, you may need to physically go into your device's Bluetooth settings and re-select "CA BT SPEAKER" to reconnect.

### Audio is choppy, has erratic static, or keeps disconnecting

1. Be sure to check your room environment. Today's Bluetooth technology has a designed limit of approximately 30 feet, line of sight. This generally means your best results will be limit your source device and speakers to the same room. Extremely large rooms, or rooms with lots of wireless electronics, wi-fi routers, radio transmitters, etc, may affect your ability to pair.
2. Check for obstructions, walls or other objects that might impede the Bluetooth signal.
3. Try returning to the source device to a closer proximity with your speakers.

### Still can't connect

1. Be sure to check your room environment. Today's Bluetooth technology has a designed limit of approximately 30 feet, line of sight. This generally means your best results will limit your source device and speakers to the same room. Extremely large rooms, or rooms with lots of wireless electronics, wi-fi routers, radio transmitters, etc, may affect your ability to pair.
2. Check to see if any other devices are already connected to the CA BT SPEAKER. The speakers can only pair with one device at a time. If you need to unpair, choose "Forget this device" from your source. Then follow the setup pairing options as detailed above.
3. Check the battery life of your source device and charge if necessary. Most rechargeable devices operate best when charged between 20% and 80%.

### Incoming phone calls

When connecting to some Android smartphones (depends on OS version), incoming voice audio may go to this speaker. To ensure you can answer the call through your phone only, uncheck the "Phone Audio" option of the device name under Bluetooth settings. Or you can switch to phone audio manually, when there is an incoming call.

### FCC Information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
