

Quick Start Guide | CA-3052BT

Product Overview

Choosing Your Source

Bluetooth Connection

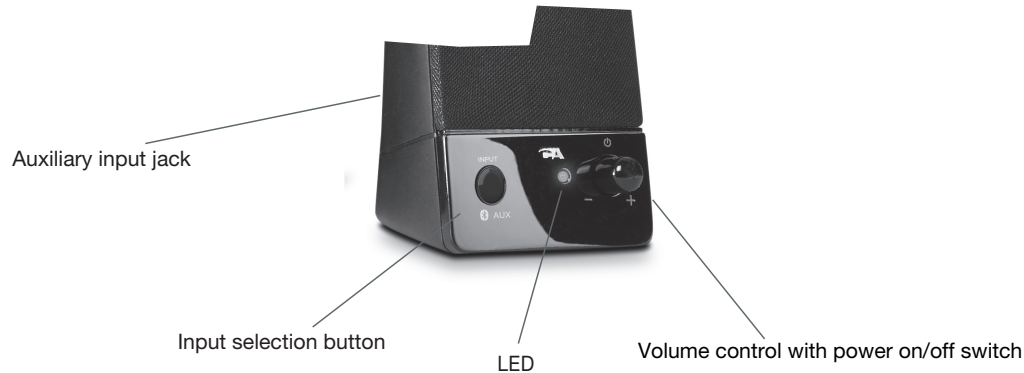

Before you start, make sure the Bluetooth capability of your source device is turned on and ready to discover new items. If needed, see your device's instructions to add or setup a Bluetooth device.

- Power on the device by rotating the power knob
- Device will enter pairing mode directly
- Device entered into pairing mode, the blue LED will start blinking rapidly
- Device will automatically reconnect with last device if it is nearby and detected
- Select device name as "CA-3052BT" on your BT audio source
- When the device connects, the LED will stop blinking and will return to a solid "on" state
- Now you can go to your music applications; start play and enjoy your music
- The speaker system will automatically reconnect with the last BT device it was paired to when in range
