Using the Configuration Menu (continued)

Antenna transmit power: you may wish to select less than 100% power for security reasons, depending its proximity to other networks

Antenna Selection: Select Left, Right or both (Diversity) antenna

Use MAC Filters to allow or deny wireless connection to the DWL-700AP.
Select Disable MAC Filters (default) to disable this feature. Select Only allow the MAC address... or Only deny the MAC address... and enter the MAC Address of the selected computer into the field above. Or you can click on the pull-down arrow

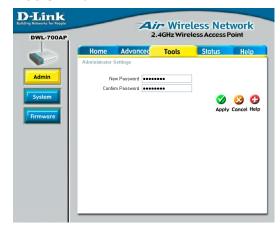

Advanced > Filters

Change your password in this window. It can be up to 14 characters in length. Please keep a copy of your password in a safe place.

Click **Apply**, if you have made any changes.

Tools > Admin

Using the Configuration Menu (continued)

Advanced > 802.1x

Disabled is the default selection for 802.1x protocol. Select Enabled to enable it.

Encryption Key: Select the key length, either 64 bits or 128 bits.

Lifetime: Select 5, 15, 30 minutes or 1 or 8 hours, or 1 day for the authentication period. After this period expires, members of the network will have to re-logon to gain access to the network.

Radius Server 1

IP: Enter the IP Address of the Radius Server.

Port: Enter the port number that your Radius Server uses for Authentication. ☐ The default setting of 1812 is the port setting for many Radius Servers.

Shared Secret: Enter the **Shared Secret**. The shared secret must be the same as the shared secret on your radius server.

Radius Server 2: Optional. If you have a second radius server, you will input the same information as shown above.

Using the Configuration Menu (continued) Tools > System

The current system settings can be saved as a file onto the local hard drive by clicking Save. The saved file can be loaded back on the DWL-700AP by clicking Browse. When you have selected the settings file, click I oad Click **Restore** to return to Factory **Default Settings.**
