21. **End All Calls**: Terminates all calls, both on line and on hold.

Multiparty

This option allows a conference call up to 7 parties. Please check with your network operator for the availability of multiparty conference calls.

Before activating a multiparty conference call, make sure that you have established two on-line calls (1 active, 1 on hold).

1. Press (Menu) to enter into the In-call menu.

2. Scroll to "Build Multiparty Call" with and press (Select) to start a multiparty conference call.

 To add a new participant to multiparty conference call:

1. Press (Menu) and scroll to "Hold Multiparty Calls".

Press (Select) to hold the existing

conference call and establish a new call connection with a new incoming call.

2. Press ⬜ (Menu) and scroll to "Build Multiparty Call".

3. Press ⬜ (Select) to start the conference call with the online parties.

⬚ To release a participant from the conference call:

1. Press ⬜ (Menu) and scroll to "End One Call In Party".

2. Press ⬜ (Select) and scroll to the desired party.

3. Press ⬜ (OK) to release the selected participant.

⬚ To have a private conversation with one of the participants:

1. Press ⬜ (Menu) and scroll to "Filter One Call In Party".

2. Press ⬜ (Select) and scroll to the desired party.

3. Press ⬜ (OK) to start your private conversation with the selected participant. The existing multiparty conference call will then be automatically placed on hold.

⬚ To end an active conference call press ⬚:

Other operations

Adjusting the earpiece volume

You can adjust the earpiece volume when calling using ⬚ (louder) or ⬚ (lower) to increase or decrease the earpiece volume.

Input text

The 8055T model provides a number of input methods for you to organize your Phone Book or write messages.

By pressing ⬚ , users may switch between the different input methods.

Predictive Text

Predictive Text input is a much easier way to input a text message in English. For each letter to be entered, you only need to press the corresponding alphanumeric key once. In Predictive Text input, the alphanumeric keys enter words with a single key press instead of multiple key presses. When the first (or second) element is entered, the display shows the most probable word in the suggestion area. The word you select from the suggestion area will move to the text area.

Using Predictive Text input

1. Switch to Predictive Text input by pressing " ⬚ " repetitively until the desire input style appears.

2. For example, to input "Telephone", key in the following:

⬚ → ⬚ → ⬚ → ⬚ → ⬚

3. Press the navigation key to select the desired word and press ⬚ (OK).

4. Press ⬚ repetitively to input a punctuation mark that you need.
