4 INSTALLATION

4.1 Installing the App

Search for the DDPAI App in the Google Play Store or Apple App → Install it on your smart phone.

Tap the Allow button in the Authorization Request → Accept App access to your smart phone.

Launch App and explore more.

NOTE
- This App is certified virus free by Google Play Store and Apple App Store, it does not contain malware, please tell it in your trust application list.
- We will collect any kind of personal data, the information collected about you only for register purposes.
- The DDPAI App is available to devices running Android 4.0 and up, iPhone 4 and up, or iOS 7.0 and up.
- Some customized Android smart phones need to turn off mobile data(3G,4G) to connect to Dash Cam via Wi-Fi, please be noted that the Dash Cam keeps working without connecting to smart phone.
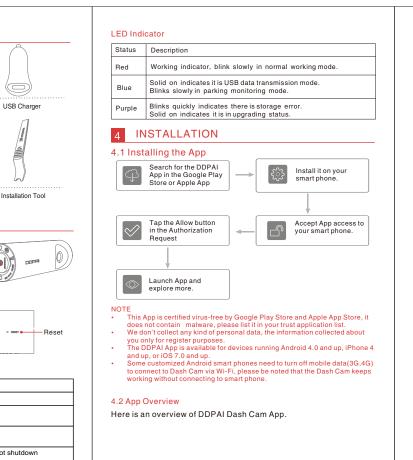

4.2 App Overview

Here is an overview of DDPAI Dash Cam App.

Camera

After connecting your phone with the DDPAI Dash Cam Wi-Fi, open the App, from here you can add/delete Dash Cam, and preview, playback, download, snapshot, cropping etc.

On the Road

DDPAI users community, it only need to connect to your smart phone data or home Wi-Fi. From here you can find nearby users, see the newest activities, user experience, installation tutorial etc.

Sharing on Social Media

Taping on 🔵 icon to share picture or video on social media like Facebook, Twitter.

Albums

View images, videos and emergency clips, you also can edit and share them from here.

Me

Hardware settings, updating and help center.

4.3 Pair Smart Phone
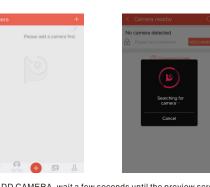

1. Launch App, tap on Camera, then tap on ⊕
2. Choose your DDPAI Dash Cam from the network list (For Android system, App will start to search Dash Cam network automatically. For iOS phone: turn on WALN from Settings > WLAN). The Dash Cam default SSID (or Wi-Fi name) begins with "vYou", ends with it's model (e.g. vYou_DDPai_mini ONE);
3. Enter the password (the default password '1234567890').

---

4. Click ADD CAMERA, wait a few seconds until the preview screen show.

NOTE
Direct Wi-Fi will turn on automatically when the Dash Cam turn on.

5 Installation

5.1 Installing the Dash Cam

1. Clean the area on the windshield where the Dash Cam will be installed, otherwise it may fall off easily in later.
2. Gently push the Dash Cam into the bracket, you will hear a beep sound when it clicks into place.

3. Remove the protective film from the back of the bracket, attach the adhesive side of the mount on the windshield where it has an unobstructed view of the road but does not interfere with the driver's view. As shown below.

---

4. Use the installation tool to lift the edges of the windshield /molding and tuck in the power cable. Connect the Dash Cam to the car charger (plugged into cigarette lighter socket) and power cable.

Tuck in cable

5. Turn on the engine after installation, your will hear "Hello, ding ding pai", Dash Cam power up and start recording, meanwhile, LED indicator blinks slowly in normal mode.
6. Adjust the angle of the lens by rotating the Dash Cam. We recommend pointing the lens slightly downwards (≈ 10° below horizon), so as to record video with a 6:4 road to background ratio. It is recommended to adjust the Dash Cam position while looking at the screen select the best viewing angle.

NOTE
Direct Wi-Fi will turn on automatically when the Dash Cam turn on.To prevent the Dash Cam from falling off or staying, the Dash Cam and bracket are fixed firmly. If you want to take off the Dash Cam to copy data via PC, please hold the bracket with one hand, rotate the Dash Cam with the other hand to pull out. As showing in below figure

Rotate and pull with other hand
Hold the bracket with one hand

6 USING THE DASH CAM

NOTE
When the memory card fills up, the newest video files will start to replace the oldest video files(called loop recording), so you will always have the most recent video files.

6.1 Preview

You can view in real-time the video currently being recorded by connecting your smart phone to the Dash Cam via direct Wi-Fi.
1) Open the DDPAI App, and add your Dash Cam.
2) Select Camera tap, then tap on 🔵 button, this will bring you to preview page.

1. Tap on the album icon▢ located at the bottom middle of the screen.
2. Select or tap on the photos you wish to edit.

---

8 MANAGE FILES VIA PC

1. Access memory card of your Dash Cam from PC with USB data cable.
2. Double click on movable disk, open DCIM folder, there will be 4 folders under it:

Normal: 2017100975657_78.mp4	The dash cam records in normal
200video Time-lapse: S-201710190810231_2460_30.MP4	It continuously recording footage at 1 frame per second, therefore 15 minutes of footage can be reviewed in 30 seconds. The camera activates and starts recording once detected motion.
201photo Motion: G_20171013101728_0003	When motion is detected, it saves a snapshot. L means there is a video related to this photo.
Snapshot: N_20171013101728_0003 _9.jpg	Photos taken by Snapshot Button or App snapshot. X means there is no video related to this photo.
202thumb N_20171023134544_21_1	Thumbnails are automatically shown for event recording files.

9 SETTINGS

1. Connect your Dash Cam with DDPAI App.
2. Tap on Me->Settings->Camera Settings.

Camera volume

Use the volume slider to adjust the Dash Cam volume.

Microphone Recording

When turned off, the dash cam does not record audio.

Video with Snapshot

When turned on, the Dash Cam captures a still image and a clip in the 5 seconds prior to and subsequent to an snapshotting.

Date and Time Display

When turned on, There will be date and time display on the video and photo (as watermark).

Start up Sound

Mute the Dash Cam by toggle it off.

Battery Protection for Parked Vehicles

Select a time duration, when your car has been stationary for 15 minutes, Parking Monitoring is automatically activated, stay on for the selected time duration, and automatically deactivated and switches back to continuous recording when there is a motion.

G-Sensor Sensitivity

You can adjust the sensitivity of the motion detection so minor motion caused by wind or rain doesn't trigger a snapshot. Automatic snapshot operates in conjunction with the Dash Cam's inbuilt G-Sensor. In order for this to work correctly, G-Sensor must be ON.

Time-lapse record	Normal recording 15 min	Time-lapse recording	Auto Shutdown after X min/H
			if G-Sensor is triggered
Normal record	Normal recording 15 min	Normal recording	Auto Shutdown after X min/H
			if G-Sensor is triggered

NOTE
- An extra hardwire kit need to be installed, or, no need hardwire kit at all if your car has an active cigar lighter (i.e. when car engine is off, the cigar lighter still supply power)
- Select parking monitoring time duration and turn on/off parking monitoring form App.

11 FAQ

1. Video Recording

Q1: Shall I keep the dash cam connected with my phone when it is working?
A: The Dash Cam starts to record videos automatically when the car is started without needing to connect to your phone. However, if they are connected, you can preview, download, and playback the videos from the App on your phone.

Q2: Why some of the Dash Cam video recordings are missing.
A: Make use the App& firmware are the latest version. If there is "Storage exception" notification means the SD card is corrupted and need to be replaced.

Q3: Why image is not clear in my smart phone?
A: The video downloaded to your smart phone is compressed, you can review HD recordings via PC in MP4 format.

2. Wi-Fi and App Connectivity

Q1: How to change the Wi-Fi name and password of the Dash Cam?
A: Make sure your Dash Cam is connect to App, then go into Me->Settings->Camera Settings, tap on Camera Name to change your Wi-Fi name, tap on Camera Password to change your Wi-Fi password.

Q2: WiFi is always disconnected?
A: Go into Settings > Wi-Fi and hit the menu button, select Advanced, disable "Scanning always available".
If "Scanning always available" checkbox is checked, make sure your smart phone is near the Dash Cam.
Make sure your devices are not surrounded by too many Wi-Fi networks.

Q3: After connected with the Dash Cam Wi-Fi, why can't my Android access it's mobile data.
A: Due to the settings of Android phones, mobile data is no longer available when it is connected to the Dash Cam Wi-Fi.

Q4: Why cannot add camera/ adding camera failed?

Cannot add camera/ adding camera failed

Q5: Why App cannot find Dash Cam Wi-Fi?

App cannot find Dash Cam Wi-Fi

---

1. Video Recording

Q: What if the mount looses it's stickiness?
A: Make sure that it is firmly installed for the first time, otherwise it may fall off easily in later. If it falls off, clean the mounting area before re-attaching it to the windshield with the spare 3M adhesive.

12 UPGRADE APP AND FIRMWARE

12.1 Upgrade the Firmware via App

Our App and camera firmware will be updated regularly, you can update the firmware via App. Please follow these steps to upgrade the DDPAI App and the latest firmware version onto the DDPAI Dash Cam.
1. Open the Wi-Fi settings of your mobile device and connect to the Dash Cam via Wi-Fi.
2. Once you are connected, launch the App. You will get a notification asking you to upgrade, accept to upgrade.
3. If you don't get the notification, you can tap on the Me in the lower right corner of the App to manually upgrade.

Tap on see more to view more information about your Dash Cam. If an update is available, a RED will appear. Tap on the New firmware available to bring up the download page. If the App is the latest vision, a notification of "Current version is the latest" will pop-out.

12.2 Upgrade the Firmware via PC

1. Access your Dash Cam via PC with USB data cable.
2. Download the latest firmware for your camera, unzip and copy the content you have unzipped onto the build-in flash card.
3. Power on the camera and it will apply the firmware automatically.

NOTE
- Your Dash Cam's two LED indicator should blink during the upgrading. Once the dash cam is done upgrading it will tell you that "Upgrade success". Do not power off your Dash Cam until it begins continuous recording as it may cause permanent damage to the Dash Cam.
