# Voice Record

VOICE RECORD

❶ After moving to "VOICE RECORD LIST" by using the JOG key, press the JOG key for selection.

❷ Press the REC button to start recording.
- While recording, the current file name and progress time are displayed at the top of the list.
- When done, press the STOP button to exit the recording.
- The recorded files are displayed in the voice record list by name so that you can select one from the list and play it.
- All operations are locked while recording.

Press the MENU button to move to the menu screen.
The menu screen will be displayed.

Playback

Move to a file from the voice record list and press the JOG key to select it.

- This plays the voice record file that you selected.

- You can use the JOG key to move to another file during playback.

- Press the STOP button to stop playback and switch to the file list.

Repeating Playback

Press the REPEAT button to change modes.

OFF : Automatically plays the next file when the current one is over.

ONE: Plays the current file repeatedly.

ALL: Plays all files in the voice record list repeatedly.

Search

❶ Move and hold down the JOG key to the left or right to move the current file to the previous or next position.

❷ It supports up to 16X search, during which no sound emits.

❸ Even while searching, you can play a file by pressing the JOG key.

Repeat Section

❶ This plays a selected section of the current file repeatedly.

❷ Press and hold down the MENU button once to select the start point (A point) of a section.

❸ Press and hold down the MENU button again to select the end point (B point). This will start playing the section (A-B).

❹ During the section repetition, press the MENU button again to deactivate it.

Deletiog a File

❶ Use the JOG key to select a file that you want to remove from the file list and press it again for more than 2 seconds.
(When you want to delete all files in the list, press and hold down the REPEAT button for more than 2 seconds)

❷ Press the Stop button and select OK to delete the files in the list sequentially.

❸ You can deselect the selected file for deletion in the same way as for file selection.
(Press and hold down the JOG key and then the REPEAT button for more than 2 seconds to deselect the file)
