4.2. Heart Rate

The device supports heart rate detection. Tap HOME key

and enter Heart Rate Detection interface, hold for one

second, the Watch will automatically detect heart rate.

Please stand still during the detection, so that the Watch

can output heart rate data accurately. (The Max. data for

he day, the Min. data for the day, resting heart rate and

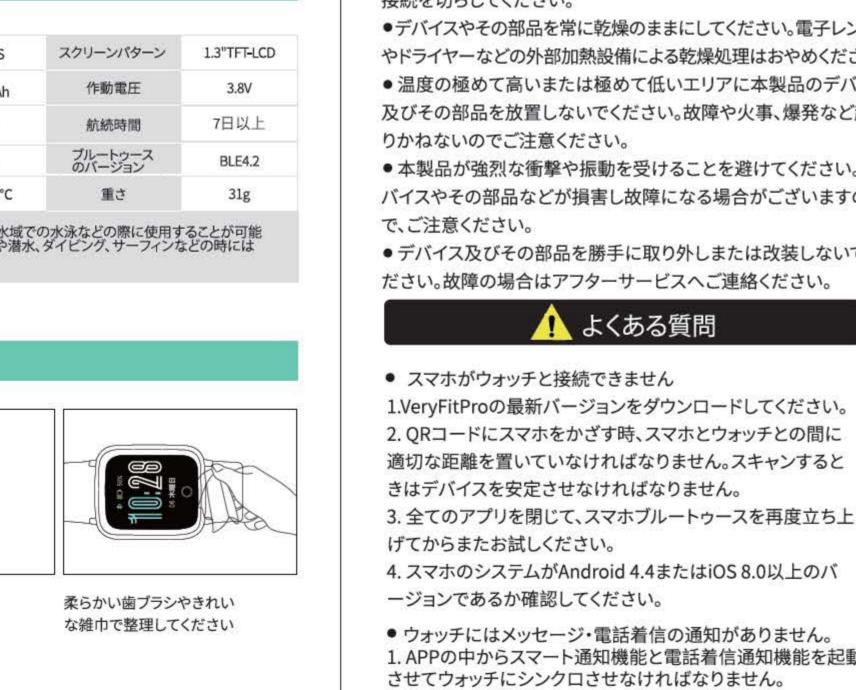

Note: To improve the accuracy of heart rate detection,

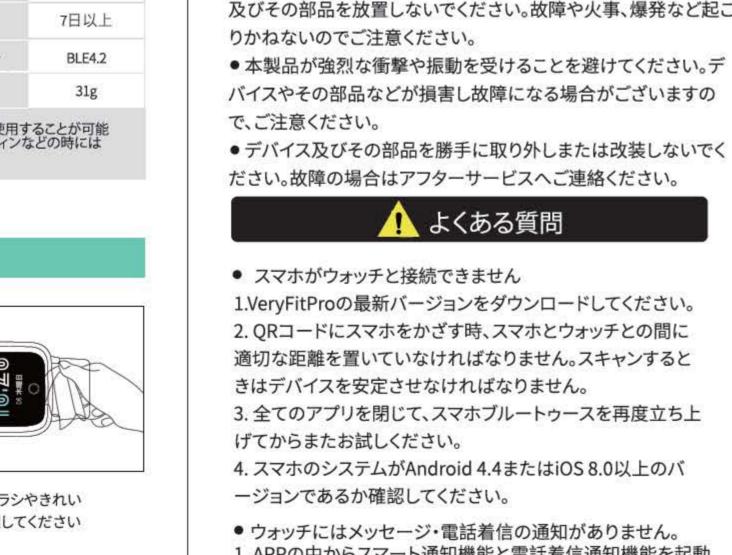

please wear the device correctly and keep the wearing

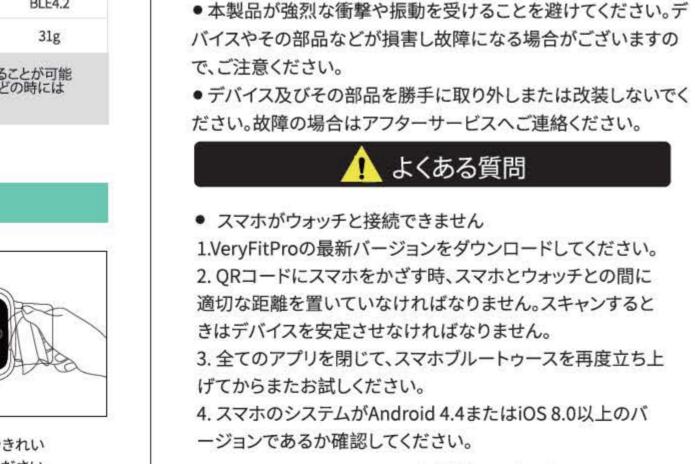

parts clean. Prior to the occurrence of new heart rate value,

real-time heart rate are displayed on the interface.)
