 - 6.35 mm (0.25 in.) each for all paper sizes except A4
 - 3.37 mm (0.133 in.) each for A4 size paper
- Top margin:

- Use a different brand of paper. Every paper brand accepts ink differently and prints with slight color variations.

Auto-cropping of scanned image is unsatisfactory

To clean the scanner glass:

1. Dampen a clean, lint-free cloth.
2. Gently wipe the scanner glass.

Edges of copied documents are cut off

If you are using your All-In-One without it being attached to a computer and scanning a document that is getting cut off on the edges:

1. Move the document to a different place on the glass.
2. On the operator panel, press the Reduce/Enlarge button repeatedly until Fit to Page appears.
3. Press Select.

If you are using your All-In-One attached to a computer:

1. Move the document to a different place on the glass.
2. From the software, select a copy setting with autcrop on (Color Photo or Black and White Photo) to make sure that autcrop finds the object and prints it completely.

 **NOTE:** When autcrop is on, the object (wherever it is placed on the glass) will be printed in the upper left corner of the page. This may make your copy look different from the original.

Copied objects appear in a different location on the page

This will only happen if your All-In-One is attached to a computer. When the default for auto crop (Color Photo) is on for copying, any object found on the scanner glass will be positioned at the top left corner of the page.

To fix this:

1. Open the Dell All-In-One Center. For help, refer to your *Owner's Manual*.
 2. From the Copy... section, select Color Document or Black and White Document (these settings have auto crop turned off).
-

2. Make sure the default, Auto Detect, is selected.
3. Press Select.
4. On the operator panel, press Reduce/Enlarge repeatedly until Fit to Page appears.
5. Press Select.
6. On the operator panel, press Options until Blank Paper Size appears.
7. Press + until your blank paper size is displayed.
8. Press Select.

The scanner will pre-scan to determine the size of the original, and then fit it onto the specified Blank Paper Size and begin scanning to perform the copy.

Auto detect is set but not working properly

- Make sure the glass is clean.
 - Turn off Auto Detect and specify the size of the original.
-

Fax function does not work

In order for the FAX button to function properly:

- Your computer must be connected to a data/fax modem.
- The data fax modem must be connected to an active analog phone line.
- The printer must be connected to the computer with a USB cable.
- The memory may be full. Wait until the faxes in memory have been sent, and then send the current fax again.

NOTE: You cannot fax with a DSL (digital subscriber line) or cable modem. See "Faxing" in your *Owner's Manual* for more information.
