2. Basic operation method

1   Installing a Driver

Windows ME/2000/XP user does not have to install a driver.

However, if a driver needs to be installed, install it before connecting to the PC.

① Insert the utility CD into the CD-ROM drive in the PC.

② Select the [Driver] from the utility menu and proceed to install the driver according to the shown instruction.

2   Power On/Off

① Press and hold the ►/■ button.
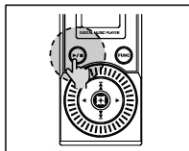

3   Saving the Music File in the Player

① Connect the player to the PC using the USB cable.

② Click the [Windows Explorer] icon on the desktop screen.

    The PC will recognize FY400 as a removable disk. Therefore, you can save/delete the data,

    or create a folder, using the same method as you use the normal hard disk in the PC.

    ⓐ Copy & Paste: "Copy" the data and "Paste" it in the removable disk (FY400).

    ⓑ Drag & Drop: Select the data and then, drag the mouse pointer to the removable disk

      (FY400) and drop it.

③ If you save all files you want, diconnect the player from the PC according to the steps described

    in "Disconnecting the Player from the PC".

4   Disconnecting the Player from the PC

Take the following steps to disconnect the player from the PC safely.

Please be kindly noted that data loss or player function may occur, if you fail to comply with the instructions. PC.

① Move the mouse pointer on the Hot Plug icon on the Windows Task Bar and click the right mouse button.

Click!!

② When the "Safely Remove Hardware" message appears, click it.

    Hardware disconnecting command can vary depending on the Windows OS version.

③ When "Safely Remove Hardware" window appears, select the "USB Mass Storage Device" from the hardware device list window and click the [Stop] button.

④ When the "Stop a Hardware Device" window appears, select the "USB Mass Storage Device" and click the [OK] button.

⑤ When the "Safely Remove Hardware" window appears, click the [OK] button and disconnect the player from the PC.

Windows 98 user

Windows 98 does not provide any command that enables to disconnect the player from the PC safely. Therefore, check the "Mass Storage" Message on the LCD display before disconnecting the player from the PC. Wait if the "Data Transferring" Message appears on the LCD display before disconnecting the player.
