## FAQ

---

### ■ What is the battery life for the Signal Control?

For average 2hrs bike riding per day, the remote control can provide up to 14 days battery life. You can press its power button, and its battery level will be show on the backpack screen.

### ■ Can I use the Signal Control in the rain?

Yes, the Signal Control is splash proof, so you can use it even in the heavy rain. However, do not drop Signal Control in the water, and do not use the Signal Control in the rain while charging.

### ■ I am having problem to pair with my Signal Control.

- a. Make sure the Divoom APP is connected with the Backpack.
- b. Make sure the Signal Control remote is ON, and then hold the Ch button for 5 seconds.
- c. After the remote is in the pairing mode, then press the 'Start pairing' on the APP.

\*If step b & c order is reversed, the remote may fail to pair.

d. If none of the above method works, please try restarting both devices, and repeat the remote control pairing steps.

---

## FAQ

---

### ■ Do I need to use the APP to pair the Signal Control every single time?

No, after the first pairing, the signal remote control automatically pair with the backpack. Just power ON both backpack and remote control, they will be paired within 15 seconds.

### ■ What is the connection range for the Signal Control?

Around 5 meters.

### ■ What are the LED means?

- **If it's flashing a single LED**, it means it's waiting to connect with the backpack
- **If it has the solid LED**, it means the Signal Control is paired with the backpack.
- **If it has all three LED flashing**, it means the signal remote control is in the pairing mode.
