When a child is able to sit, kneel or to pull itself up, the product should not be used anymore for this child. Before use in 'bedside sleeper' mode (fixed to the bed), make sure the product is securely anchored and positioned.

When the product is used in 'bedside sleeper' mode (fixed to the bed), make sure the connection belts are hooked and tensioned properly, before laying child in the sleeper. The product must be secured to the parent's mattress and no gaps between the product and the adult's mattress must be present.

DO NOT use the sleeper without the support frame. Keep the fastening belts out of reach of children.

The thickness of the uncompressed mattress shall not exceed 25mm. The upper surface of the non compressed mattress must be at least 191mm lower than the upper surface of the lowest side of the bedside sleeper.

If you purchase a mattress separately, ensure that it is suitable for the product.

DO NOT leave any object inside the product that could reduce it's depth.

Be aware of the risk of open fires and other sources of strong heat, such as electric bar heaters, gas fires etc.

The product is ready for use only when all locking mechanisms are engaged. Check carefully that these are engaged before use.

Failure to follow these warnings and instructions could result in serious injury or death.

NEVER use the Sleeper bassinet in Sleeper position without the anchor plate attached and locked as shown.

Failure to use this anchoring system could result in serious injury or death to the infant. Make sure all straps are secured and tight. Check straps before each use.

SUFFOCATION HAZARD: Discard all packing materials immediately after opening. Plastic bags and ties may cause suffocation or choking.

FALL HAZARD: To help prevent falls, do not use this product when infant begins to push up on hands and knees or has reached manufacturer's recommended maximum weight of 9kgs, whichever comes first.

⚠ WARNING ⚠

**SUFFOCATION HAZARD - INFANTS HAVE SUFFOCATED IN GAPS BETWEEN EXTRA PADDING AND SIDE OF BASSINET/CRADLE AND ON SOFT BEDDING.
USE ONLY THE PAD PROVIDED BY MANUFACTURER.
NEVER ADD A PILLOW, COMFORTER OR ANOTHER MATTRESS FOR PADDING.**

If a sheet is used with the pad, use only the one provided by CNP Brands.

To reduce the risk of SIDS, paediatricians recommend healthy infants be placed on their backs to sleep, unless otherwise advised by your physician.

A bedside sleeper is designed to provide a sleeping area for an infant until he or she begins to push up on hands and knees or approximately 5 months of age. Move your child to another sleeping product when your child reaches this stage.

STRANGULATION/SUFFOCATION HAZARD: The top edge of the lowering bar must be level with or below the top of the adult mattress when used as the bedside sleeper. The level of the bedside sleeper bassinet mattress must be a minimum of 10cm below the top edge of the lowering bar. **NEVER** raise the level of the cosy time sleeper bassinet mattress.

NEVER use plastic shipping bags or other plastic film as mattress covers not sold and intended for that purpose. They can cause suffocation.

Make sure all straps are secured and tight when used in the bedside sleeper position. Tighten straps periodically.

⚠ WARNING ⚠

ENTRAPMENT HAZARD - TO PREVENT DEATH FROM ENTRAPMENT, BEDSIDE SLEEPER MUST BE PROPERLY SECURED TO ADULT BED USING THE ATTACHMENT SYSTEM

There must be no more than 1/2 inch (13mm) gap between bedside sleeper and adult bed.

Check tightness before each use by pulling bedside sleeper in a direction away from adult bed.

If gap exceeds 1/2 inch (13mm) **DO NOT** use product. **DO NOT** fill the gap with pillows, blankets or other items that are suffocation hazards.

Always read and follow assembly instructions for each product use mode (bedside sleeper, bassinet, play yard).

Always use ALL required parts for each use mode. Check instruction manual for a list of required parts. Periodically check product for loose, damaged, or missing parts.

The anchor plate and straps assembly must always be used in bedside sleeper mode.

NEVER use this product if there are any loose or missing fasteners, loose joints, broken parts, or torn mesh/fabric. Check before assembly and periodically during use. Contact CNP Brands for replacement parts. Never substitute parts.

Assemble product according to manufacturer's instructions for ANY use mode - bedside sleeper as well as the bassinet.

To avoid death from the infant's neck being caught on the top rail on the side that is next to the adult bed, the top rail must be no higher than the adult bed mattress.

NEVER permit bedding from the adult bed to extend into the bedtime sleeper.

NEVER leave your infant in the product without the TOP HORIZONTAL RAIL installed in the upper most position, unless securely attached to the adult bed.

Failure to use this securing system will allow the cosy time sleeper to move away from the adult bed and could result in the infant falling out of the bedside sleeper bedside bassinet.

STRANGULATION HAZARD: When anchor plate and strap assembly are not in use, store in a safe place not accessible to children.

DO NOT place product near a window where cords from blinds or drapes may strangle a child.

Keep the bassinet away from stoves, heaters, campfires and other hazards.

DO NOT allow children to climb or play on or under unit in any configuration.

FALL HAZARD: Remove infant from the cosy time sleeper before starting any conversions.

Always make sure all top and bottom rails are securely locked, in all configurations, before putting an infant child into the unit.

To prevent serious or fatal injury from falls always keep child within arm's reach. Never leave your child unattended.

Strings can cause strangulation! Do not place items with a string around a child's neck, such as hood strings over a bassinet or cradle or attach strings to toys.
