Finally, microphones as tough as you are. These microphones offer the following exciting features*

- Windporting feature dramatically lessens noise caused by high winds and other severe weather conditions. The same technology prevents water from clogging the microphone port and distorting transmit audio, ensuring a user's confidence of clear communication.
- When a user speaks directly into a noise-canceling remote speaker microphone, the noise-canceling acoustics utilize a directional microphone that is designed to eliminate ambient noise—ideal for outdoor communication.
- IP57 submersibility ratings on the microphone head provide reliable communications even in wet conditions.
- Audio jack on the head of the microphone enables user to receive discreet audio communication with an additional earpiece accessory.
- A volume toggle switch enables the user to adjust the radio volume without having to access the radio.
