# Window Cleaning Glass Scrapers & Blades

Quality Tools for Smart Cleaning™

## Expert Tips – How Professionals Scrape

- Check if glass is scratch-resistant and suitable for scraper use. Unsuitable glass surfaces include: plexiglass, crown glass, solar glass and safety glass (ESG).
- Always follow the manufacturer's instructions.
- Perform a scrape test in advance on a small section.
- Before starting, check the glass for any damage and report it, if necessary.
- Check the blade for damage and change it or reverse it.
- The surface to be scraped should always be wet.
- It is best to use a releasing agent, such as "EasyGlideGlassCleaner."
- Scrape in one direction. Never pull the scraper back as this may cause scratches.
