

SCOPE OF ACCREDITATION TO ISO/IEC 17025:2005

TUV SUD AMERICA INC.¹
1775 Old Highway 8 NW, Suite 104
New Brighton, MN 55112
Mr. Barry Quinlan bquinlan@tuvam.com
Phone: 978-573-2528

ELECTRICAL

Valid To: September 30, 2019

Certificate Number: 2955.11

In recognition of the successful completion of the A2LA evaluation process, accreditation is granted to this laboratory at the location listed above, *as well as the satellite laboratory location listed below*, to perform the following EMC (electromagnetic compatibility) and Telecommunications tests:

Test Technology:

Test Method(s) ^{2,3}:

Emissions

Conducted

FCC 47 CFR, Part 15, Subpart B (using ANSI C63.4:2014);

Product Safety Tests ⁵

Test Method(s) ^{2,3:}

EXCLUDED MEASUREMENTS in Product Safety:

Abrasion Resistance Test
Bottom Fire Enclosure (Hot Flaming Oil)
Cathode Ray Tubes
Concentration of Flammable Vapors
CRT Strength
Hand-Transmitted Vibration
High Vacuum Devices
Human Exposure to UV Radiation
Integrated Circuit (IC) Current Limiters
Ionizing Radiation
Laser (including laser diodes)
Light Emitting Diodes (LEDs)
Mandrel Test
Materials Group Classification
Microwave Radiation
Partial Discharge Test
Pressure Vessels
Prevention of Electrostatic Charges
Resistance to Environmental Stress
Softening Temperature (ISO 306)
Tracking Index CTI
Ultrasonic Pressure
UV Radiation
Oscillating Hoop IP Test
Dust Test
Shock and Vibration Test
Oxygen Bomb Test
Altitude Test

² When the date, revision or edition of a test method standard is not identified on the scope of accreditation, the laboratory is expected to be competent in the use of the current version within one year of the date of publication of the standard test method., per part C., Section 1 of A2LA R101 - *General Requirements- Accreditation of ISO-IEC 17025 Laboratories*.

³ The laboratory is only accredited for testing activities outlined within the test methods listed above. Reference to any other activity within these standards, such as risk management or risk assessment, does not fall within the laboratory's accredited capabilities.

⁴ Laboratory utilizes RADHAZ procedures for high level testing.

⁵ Field testing services are available for this test and this laboratory meets A2LA R104 – General Requirements: Accreditation of Field Testing and Field Calibration Laboratories for this test.

Testing Activities Performed in Support of FCC Declaration of Conformity and Certification in Accordance with 47 Code of Federal Regulations and FCC KDB 974614, Appendix A, Table A.1 ⁶:

Unintentional Radiators Part 15B	ANSI C63.4:2014	40000 MHz
Industrial, Scientific, and Medical Equipment Part 18	FCC MP-5 (February 1986)	40000 MHz
Intentional Radiators Part 15C	ANSI C63.10:2013	40000 MHz
U-NIII without DFS Intentional Radiators Part 15E	ANSI C63.10:2013	40000 MHz
General Mobile Radio Services (FCC Licensed Radio Service Equipment) Parts 22 (non-cellular), 90 (non-microwave), 95, 97, and 101 (non-microwave)	ANSI/TIA-603-D; TIA-102.CAAA-D	40000 MHz

⁶ Accreditation does not imply acceptance to the FCC equipment authorization program. Please see the FCC website (<https://apps.fcc.gov/oetcf/eas/>) for a listing of FCC approved laboratories.

Accredited Laboratory

A2LA has accredited

TUV SUD AMERICA INC.

New Brighton, MN

for technical competence in the field of

Electrical Testing

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2005 *General requirements for the competence of testing and calibration laboratories*. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated 8 January 2009).

Presented this 5th day of January 2018.

A handwritten signature in black ink, written over a horizontal line.

President and CEO
For the Accreditation Council
Certificate Number 2955.11
Valid to September 30, 2019

For the tests to which this accreditation applies, please refer to the laboratory's Electrical Scope of Accreditation.
