Zip® 250MB USB & PCMCIA drive

Secure, protect and share your work with the ultra-thin portable USB Zip® drive

Now available in an ultra-thin, ultra-portable model

The sleek new design makes the Zip® 250MB USB & PCMCIA drive perfect for accessing your data anytime, anywhere. Since the ultra-thin drive fits in your pocket or briefcase, you can use it to move data between locations, or between desktop and notebook PCs.

Convenient connections for your computer

You can attach your Zip® 250MB USB & PCMCIA drive to any USB-enabled desktop or notebook PC (see system requirements for details; PCMCIA cable sold separately). Because it's hot-swappable®, you can connect and disconnect from your desktop computer or notebook PC without having to reboot. With transfer rates up to 0.9MB* per second, it's the ultimate in compatibility and performance.

Save, transport, share and back up valuable files

The Zip® 250MB USB & PCMCIA drive provides additional capacity while staying compatible with over 150 million 100MB** Zip® disks shipped. Take hundreds of megabytes of data home, on the road, to the next office. Or, you can overnight large files to remote co-workers and outside business partners.
What can you do with Zip® drives and disks?

250MB Zip® disks are big enough to handle just about anything – the equivalent of 170 floppies! If you need more disk space, carry around lots of data, like to work at home or on the road, or share files with partners, a Zip® drive is an essential tool. Don’t forget, you can use 100MB Zip® disks in your 250MB Zip drive. Here are just a few of the things you can do with your Zip® disks:

**capture**
- Internet downloads
- 300 to 1200 digital images
- Up to 250 minutes of MP3 audio on a single 250MB Zip disk!
- And share information with co-workers, clients, and service bureaus

**create**
- An automatic backup of your important files using Iomega® QuikSync software
- Copies of your best work
- An archive for all your files (e-mail, client files, pictures, audio and video clips)

**connect**
- And share information with co-workers, clients, and service bureaus
- To 30 million Zip® drives sold worldwide

Want to use your 250MB Zip drive with your notebook PC? The PCMCIA cable is host-powered so there’s no need for an external power supply. Plus, it works with Windows® 95 / 98 (see system requirements for details).
