Tools required for assembly and service may not be included.

AWARNING

Read this material before using this product. Failure to do so can result in serious injury. SAVE THIS MANUAL.

The Solar Mole Chaser is effective at repelling burrowing pests such as moles, gophers, and other rodents by emitting a sonic pulse which pests find extremely piercing thereby repelling them. Pests perceive a danger zone causing them to evacuate the area covered by the vibrating sonic sound. The vibrating sonic sound pulses at 30-second intervals and covers a surface area of over 6000 sq.ft.

The Solar Mole Chaser emits a vibration in all directions. For best results, it is recommended to use 2 units approximately 60 ft. apart in the highest risk area.

The Solar Mole Chaser works with a solar charged battery. The solar cell charges the battery during the day (even works under cloudy conditions!) and runs the unit – while night time operation is powered by the high efficiency battery.

SPECIFICATIONS:

Rated voltage: 1.2V Battery: 1 X 1.2V 600mA Ni-Cd rechargeable battery

Frequency: 400Hz-1000Hz Range: >6000 sq. ft

NOTES:

- 1. Remove unit in extreme weather conditions like hail, ice, snow, or flooding. Although unit is weatherproof, avoid direct exposure to sprinkling systems.
- 2. For Hard Earth Locations, It is recommended to dig small opening to place solar mole chaser into the earth.
- 3. Do not use a hammer or mallet or excessive force to insert the solar mole chaser this may damage the unit.
- 4. Clean the solar cell cover periodically with a damp cloth to ensure maximum sun exposure.

WARNING:

- 1. Always wear ANSI approved safety goggles when setting up this product.
- 2. Never allow children to play with this product.
- 3. Live moles, gophers and other rodents can be dangerous to approach, and may carry diseases.

INSTALLATION PROCEDURES (SEE DIAGRAM BELOW):

- 1. Press the ON/OFF button underneath the head. You can then hear sound, which indicates the product is under proper working condition. It is recommended to charge the product for at least one full sunny day before its first operation.
- 2. Insert spike into lawn paying attention not to damage unit. The spike should be firmly planted while leaving the base of the head at approximately one inch from ground level.
- 3. NICd BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY. Do not short, incinerate or open battery.
- 4. The built-in battery might need to be replaced once every year. Release the 6 screws besides the ON/OFF button, remove the cover, and then replace the old battery with a AA size **rechargeable** battery. Please put the cover back on and tighten the screws after battery is replaced.
