

UA-702 Manual Inflation

One of the most technologically advanced yet affordable blood pressure monitors available in the marketplace today.

The Manual Inflation monitor combines ease of use and affordability. This monitor combines the software technology of our automatic inflation monitors, but leaves cuff inflation control up to the user. The Manual Inflation monitor can assist in the management of hypertension, improve patient compliance to treatment of high blood pressure, and be used as a tool in a preventative health management program.

- Large, easy to read 16mm digital display
- Audible tone indicates proper inflation level
- Available in small, medium or large cuff sizes (cuffs can also be purchased separately)
- Large-print instruction guide with illustrations and quick start card in English, French and Spanish
- Four week blood pressure logbook included

UA-702 Manual Inflation

To obtain an accurate reading, it is important to use the correct cuff size. A cuff that is too small will result in a higher than expected reading and a cuff that is too large will result in a lower than expected reading. The UA-702 Manual Inflation unit comes in three different cuff sizes to accommodate your customer's needs.
