1600VESBCC	ESBC COURSE	8/31/2015	12/31/9999	OTHER	EN TRAINING CLASSES	TRAINING	This course is designed for those students who will be using ADTRAN NetVanta Routers or IP Business Gateways (IPBG) to provide VoIP SIP Trucking applications. SIP Trunking means there is an Internet Telephone Service Provider (ITSP) delivering SIP Services to a customer site in which there is a premise-based IP Phone System. These Service Providers often require a demarcation point between their SIP implementation and the customer's implementation of SIP which is where an Enterprise Session Border Controller SEGIS in needed. The sEGIS provides call forwarding logic, security, SIP Normalization, RIP Anchoring, and Transcoding as necessary. This course will include interactive lecture as well as lab exercises are designed to reinforce the class content with installation, configuration and troubleshooting procedures associated with the NetVarita Routers and IP Business Cateway products. This part number providers 3 days of training at customer site for up to 12 students.	USD	8,100.00
1600VHOSTC	HOSTED VOIP COURSE	8/31/2015	12/31/9999	OTHER	EN TRAINING CLASSES	TRAINING	This course is designed for those students who will be designing, implementing, and supporting applications using using ADTRAN IP Business Gateways (IPRG) products as a SIP Proxy for Potast Voice applications.  This allows customers to take advantage of SIP as a means of accessing the PSTN along with having access to business class phone features without having a PRX on site. IP Phones are deployed at the customer's site and all call features and connectivity are handled upstream in the cloud". This course will include interactive lecture as well as lab exercises. Integrated lab exercises are designed to reinforce the call continuation of the course of	USD	8,100.00
1600VHOSTE	HOSTED VOIP TRAINGING	8/31/2015	12/31/9999	OTHER	EN TRAINING CLASSES	TRAINING	This course is designed for those students who will be designing, implementing, and supporting applications using using ADTRAN IP Business Gateways (IPRG) products as a SIP Proxy for Flosted Voice applications.  This allows customers to take advantage of SIP as a means of accessing the PSTN along with having access to business class phone features without having a PRS not site. IP Phones are deployed at the customer's site and all call features and connectivity are handled usptarem in the cloud."  This course will include interactive lecture as well as lab exercises. Integrated lab exercises are designed to reinforce the collection of the course, the student should be able to install and maintain the ADTRAN NetVanta IP Business Gateway products. This part number provides 1 enrollment in Hosted VoIP Instructor-foll training event.	USD	1,080.00

1600VSIPTC	SIP TO TDM COURSE	8/31/2015	12/31/9999	OTHER	EN TRAINING CLASSES	TRAINING	This course is designed for those students who will be designing, implementing, and supporting ADTRAN IP Business Gateways (IPBG) products as a SIP to TDM Conversion appliance.  The ADTRAN IPBG functions as a SIP to TDM Conversion Appliance which allows users to take advantage of SIP Trunks without replacing their legacy TDM infrastructure. The IPBG converts SIP signaling packets and RTP audio packets into: analog voice for integration with analog phones/key systems or digital voice with ISDN PRIJNES IT Trunks for integration with existing TDM based PMSs or Channel Banks.  The existing CPE does not need to be reconfigured, the IPBG simply emulates Telco by providing battery and dial-tone to analog devices or emulating at Class 5 Switch to digital appliances. This application is often the first planes for users keen on transitioning entirely to VoIP as it provides a steeping stone to migrate individual TDM components to either IP Phones for "hosted Voice" or to an IP PBX.  This course will include interactive Icelura as well as is allowercies. Integrated table exercises are designed to reinforce the class content with installation, configuration and troubleshooting procedures associated with the NetVanta IP Business Gateway products. You will have access to ADTRAN equipment with tent Internet through our remote training lab. This part number provides 3 days of training at acustomers life for up to 12 students.	USD	8,100.00
1600VSIPTE	SIP TO TDM TRAINING	8/31/2015	12/31/9999	OTHER	EN TRAINING CLASSES	TRAINING	This course is designed for those students who will be designing, implementing, and supporting ADTRAN IP Business Gateways (IPBG) products as a SIP to TDM conversion appliance.
