

Steps to run ARMSim# on your system:

- 1) You need a GCL account to login into the respective desktop PCs in the lab.
Login using GCL account.
- 2) Create or append this in your .bashrc file in your /home/btech/<user>/ with the following settings:
 > export PATH=\$PATH:/opt/ARMSIM
 > export ARMSIM_PATH=/opt/ARMSIM
- 3) Run the following command
 > source /path/.bashrc
- 4) Run the following command at your terminal to open the ARMSim GUI:
 \$ ARMSim

This should open the ARM Simulator GUI, ready to use.

<The user guide for using ARMSim has been posted separately on Moodle. Please go through the user guide before your first lab to get acquainted to the simulator. >
