HYDRO-GUARD AUTOMATIC FLUSHING SYSTEM

Model HG-4

AUTOMATIC FLUSHING SYSTEM

- ▶ Drinking water conservation and savings (MAMOT Strategy)
- ▶ Protection of the water system against freezing
- ▶ Improvement in water quality
- ▶ Sampling capabilities
- ▶ Autonomy with battery
- ▶ System Management Assited by Remote Telemetry (S.M.A.R.T.)

HG-4 Typical installation

Model HG-6

Data transfer via infrared

Easy access to controller

Model HG-4 - The components

HG-4 Installation manhole head

Eliminates water pipe clogging,
Hydro-Guard can help you!

OUR EXPERTS AT YOUR SERVICE

DIRECTOR APPROVED FIRE HYDRANT REPAIR AND MAINTENANCE TRAINING COURSE

On-site training by our technicians, certified by all major fire hydrant manufacturers. The truck is equipped with all the necessary tools required to dismantle a fire hydrant.

This course is approved by the *Ontario Environmental Training Consortium*.

**CEU (value):
0.7 unit**

FIRE HYDRANT RESTORATION AND EXTENSION INSTALLATION

Have your fire hydrants and valves restored by our certified technicians

- avoid unnecessary excavation;
- no lost time, no "Out of Service" fire hydrant;
- no need to have an inventory of fire hydrant parts.

LOWERING OF FIRE HYDRANTS

Lowering, without excavating, of most models of fire hydrants using our specialized tools. Repair damaged or broken intermediate sections.

REFURBISHING OF IMPACTED FIRE HYDRANTS

We can cut and groove a damaged hydrant barrel. Refurbishing, without excavating, of the intermediate section of a broken fire hydrant flange. Perfect solution for any hydrant that have been damaged by snow removal equipment or hit in a vehicle collision.
