

Warmup Contura EPS Insulation is a routed EPS insulation board for use in conjunction with Warmup Diffusion Plates.

The insulation boards are provided in 2400 x 1200mm sheets and come in 30, 40, 50, 60, 70, 80, 90 and 100mm thicknesses.

This type of insulation is primarily used in new build on upper floors where insulation levels are higher which will lower heat requirements and can be installed under almost any type of floor finish.

## Features:

- Boards are pre-routed at 200mm centres
- Suitable for almost any type of floor finish
- Available in a range of thicknesses
- Can be supplied with or without return ends
- Over joist & moisture resistant boards are also available

## Contured EPS Technical Data:

### EPS150\*

Thermal conductivity (@10°C):	0.035W/mK
Compressive strength (@10% compression):	150kPa
Thermal Resistivity:	28.57mK/W

\* Results based on 100mm thick board
