## DVD Recorder

**Note 1:**

This model's DVD Drive is VXY2010.

**Note 2:**

This model's VHS Mechanism is R4  
Mechanism Chassis for North America Model.  
 :Order No. VR0404003C1

Model No. **DMR-EZ48VP**  
**DMR-EZ48VPC**  
**DMR-EZ485VP**

Vol. 1

Colour

(K).....Black Type

Manufactured under license from Dolby Laboratories.  
 Dolby and the double-D symbol are trademarks of Dolby  
 Laboratories.

# 1 Safety Precaution

## 1.1. General guidelines

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

### 1.1.1. Leakage current cold check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between  $1M\Omega$  and  $5.2M\Omega$ .

When the exposed metal does not have a return path to the chassis, the reading must be  $\infty$ .

### 1.1.2. Leakage current hot check (See Figure 1 .)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a  $1.5k\Omega$ , 10 watts resistor, in parallel with a  $0.15\mu F$  capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.

4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliampere. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

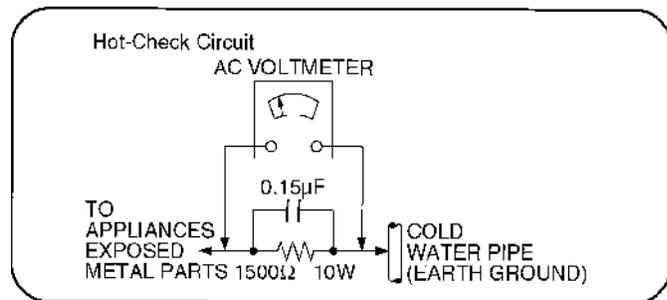

Figure 1

## 1.2. Caution for fuse replacement

(For English)

**CAUTION:**

Replace with the same type fuse:  
(Manufacturer: Hollyland, Type: 50T, 2A, 250V)

## 2 Warning

### 2.1. Prevention of Electrostatic Discharge (ESD) to Electrostatic Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatic Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistor-and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

#### Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device).

#### IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  $\triangle$  in the schematic diagrams, Exploded Views and replacement parts list. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

## 2.2. Precaution of Laser Diode

### CAUTION:

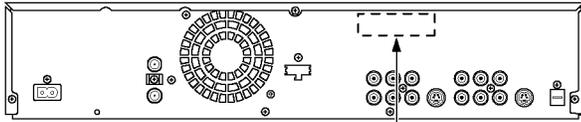

This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.

Wave length: 662 nm (DVDs)/780 nm (CDs)

Maximum output radiation power from pickup: 100  $\mu$  W/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

Product complies with DHHS Rules 21 CFR  
Subchapter J in effect at date of manufacture.  
Matsushita Electric Industrial Co., Ltd.  
Kadoma, Osaka, Japan

### ACHTUNG:

Dieses Produkt enthält eine Laserdiode.

Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

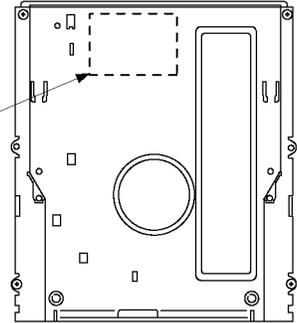

Wellenlänge: 662 nm (DVDs)/780 nm (CDs)

Maximale Strahlungsleistung der Lasereinheit: 100  $\mu$  W/VDE

Die Strahlung der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

<b>DANGER - VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN. AVOID DIRECT EXPOSURE TO BEAM.</b> FDA 21 CFR/Class IIIb	
<b>CAUTION</b> - CLASS 3B VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN. AVOID EXPOSURE TO THE BEAM. IEC60825-1 +A2/Class 3B	
<b>ATTENTION</b> - RAYONNEMENT LASER VISIBLE ET INVISIBLE, CLASSE 3B, EN CAS D'OUVERTURE. EVITER L'EXPOSITION AU FAISCEAU.	
<b>FORSIGTIG</b> - SYNLIG OG USYNLIG LASERSTRÅLING KLASSE 3B, NÅR LAGET ER ÅBENT. UNDGÅ AT BLIVE UDSAT FOR STRÅLEN.	
<b>VARO</b> - AVATTAESSA OLET ALLTAIN LUOKAN 3B NÄKYVÄÄ JA NÄKYMÄTÖNTÄ LASERSÄTELYÄ, VARO ALTISTUMISTA SÄTEELLE.	
<b>WARNING</b> - KLASS 3B SYNLIG OCH OSYNLIG LASERSTRÅLNING NÅR DENNA DEL ÄR ÖPPNAD. UNDVIK EXPONERING FÖR STRÅLEN.	
<b>VORSICHT</b> - SICHTBARE UND UNSICHTBARE LASERSTRALUNG KLASSE 3B, WENN ABDECKUNG GEÖFFNET. NICHT DEM STRAHL AUSSETZEN.	
<b>注意</b> - 打开时有可见及不可见激光辐射。避免光束照射。	
<b>注意</b> - ここを開くと可視及び不可視レーザー光が出ます。ビームを見たり、触れたりしないでください。VOL1J70	

### CAUTION!

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

## 2.3. Service caution based on legal restrictions

### 2.3.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

#### Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	<b>PbF</b>

#### Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.  
(Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at 350±30 degrees C (662±86°F).

#### Recommended Lead Free Solder (Service Parts Route.)

- The following 3 types of lead free solder are available through the service parts route.
- RFKZ03D01K----- (0.3mm 100g Reel)  
 RFKZ06D01K----- (0.6mm 100g Reel)  
 RFKZ10D01K----- (1.0mm 100g Reel)

#### Note

\* Ingredient: tin (Sn), 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

## 3 Service Navigation

### 3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

1) This service manual does not contain the following information, because of the impossibility of servicing at component level.

- \* Schematic Diagram, Block Diagram and P.C.B. layout of Digital P.C.B..
- \* Parts List for individual parts of Digital P.C.B..
- \* Exploded View and Parts List for individual parts of DVD Drive.

2) The following category are recycle module part. Please send them to Central Repair Center.

- \* Digital P.C.B. (EZ48VP/EZ48VPC/EZ485VP : RFKB79180C)
- \* DVD-RAM Drive (VXY2010)

### 3.2. Caution for DivX

Please will always pass the customer "Warning for Customers Who Use the DivX Video-on-Demand content." with the product and get it when you unavoidably exchange Digital P.C.B. (When the product is exchanged, it is the same.).

You must use print attached to service part (Digital P.C.B.) or must use copy of print below as "Warning for Customers who use the DivX Video-on-Demand content."

Information needed without fail for the customer for whom it is used continuing DivX Video-on-Demand Service to "Manual for the customer" is recorded.

Appendix:

- \* Parts that memorize user's information are only Nor-Flash on Digital P.C.B..
- \* The registration of Registration Code is possible for half a year up to 6 recorders up to 10 recorders a year.  
Replacement of Digital P.C.B. spends one of this.

Registration Code is memorized in Nor-Flash on Digital P.C.B..

If exchange Digital P.C.B., new registration Code differ from previous Registration Code will be generated.

In this case if your customer uses DivX Video-on-Demand service, he/she will no longer be able to play any content that he/she purchased under that same registration code.

Therefore your customer will need to obtain and register the new registration code.

\*Copy this page and cut on the dotted line and give the lower half to your customer.

---

#### Warning for Customers who use the DivX Video-on-Demand content.

1. The registration code has been changed for the repair of the product or the product exchange.
2. Obtain and register a new registration code, otherwise you will no longer be able to play DivX Video-on-Demand content.
3. Follow the procedure on the DivX Video-on-Demand web site to register at

<http://vod.divx.com/>

- \* If you do not use the DivX Video-on-Demand content, please ignore this warning.

DivX	
Plays all versions of DivX video (including DivX 6) with standard playback of DivX media files. Certified to the DivX Home Theater Profile. GMC (Global Motion Compensation) is not supported.	
DivX Items	
Maximum number of folders	300 Recognizable folders per disc on this unit (including the root folder)
Maximum number of DivX files	200 Recognizable DivX files per disc on this unit *6
MP3	
Compatible compression rate	32kbps - 320kbps
Compatible sampling rate	16kHz, 22.05kHz, 24kHz, 32kHz, 44.1kHz, 48kHz
This unit is not compatible with ID3 tags.	
MP3 Items	
Maximum number of folders	99 Recognizable folders per disc on this unit (including the root folder)
Maximum number of files	999 Recognizable files per disc on this unit *6
JPEG	
Compatible pixels	between 34x34 and 6144x4096 pixels Sub Sampling 4:2:2 or 4:2:0
This unit is not compatible with MOTION JPEG.	
JPEG Items	
Maximum number of folders	300 Recognizable folders per disc on this unit (including the root folder)
Maximum number of JPEG files	3000 Recognizable JPEG files per disc on this unit *6

\*6 : Total number of recognizable file including MP3, JPEG, DivX and other type of files is 4000.

DV Input	IEEE 1394 Standard, 4pin x 1
SD Card Slot	SD Memory Card Slot x 1
Compatible media	SD Memory Card* *Includes miniSD Cards (A miniSD adaptor needs to be inserted.) and SDHC compatible card (Class is not supported.)
Format	FAT12, FAT16* (In case of SD Memory Card), FAT32* (In case of SDHC Memory Card) *Long file names unsupported.
Still picture (JPEG)	
Image File Format	JPEG Conforming DCF (Design rule for Camera File system); Sub sampling 4:2:2 or 4:2:0.
Number of pixels	34 x 34 pixels to 6144 x 4096 pixels
Quick Start for Recording (Quick Start: ON)	1 Sec. Quick Start for Recording on DVD-RAM* *From the power off state, recording on DVD-RAM starts about 1 second after first pressing the Power button and then sequentially pressing the REC button (Quick Start Mode).
Dimensions (W) x (H) x (D)	Approx. 430 (W) x 84 (H) x 37.5 (D) mm [Approx. 16.929" (W) x 3.307" (H) x 1.476" (D)]
Mass	Approx. 5.4 kg (11.90 lbs)
Operating Temperature	5 °C - 40 °C (41 °F - 104 °F)
Operating Humidity	35%–80% RH (no condensation)
Clock unit	Quartz - controlled 12 - hour digital display
Solder	This model uses lead free solder (Pb free).

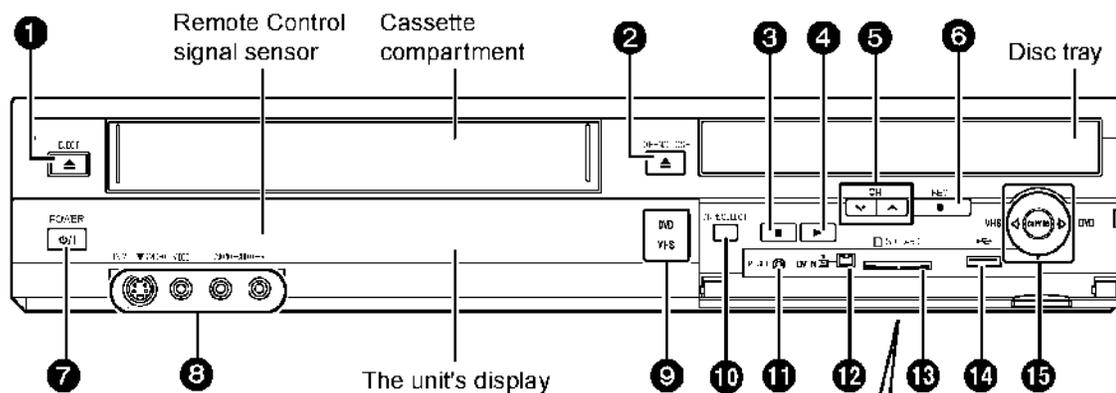

**Notes: Mass and dimensions are approximate.**

**Specifications are subject to change without notice.**

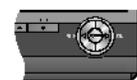

## 5 Location of Controls and Components

### 5.1. Each Buttons

#### Main Unit

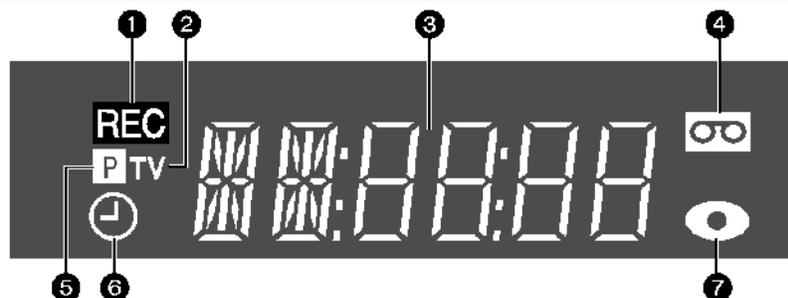

Opening the front panel

Pull down.

# Remote Control

- 1 Turn the unit on or off
- 2 Select drive (DVD, VHS or SD)
- 3 Select channels and recording numbers etc./ Enter numbers
- 4 Delete /Reset the tape counter
- 5 Basic operations for recording and play
- 6 Skip the specified time/ Jet rewind button
- 7 Direct Navigator
- 8 Selection/ OK, Frame-by-frame
- 9 Show sub menu
- 10 Select audio [A] for Recordings screen
- 11 Show DVD on-screen menu [B] for Album View screen
- 12 Start recording
- 13 Change recording mode
- 14 Transmission window
- 15 TV and Set Top Box operations
- 16 Channel select/TRACKING/V-LOCK
- 17 Input select (TV, IN1, IN2, DV)
- 18 Sub channel access for digital broadcasts
- 19 Favorite
- 20 Skip 1 minute forward
- 21 Show scheduled recording list
- 22 Show FUNCTIONS window .....(→ below)
- 23 Return to previous screen
- 24 Select VCR/TV
- 25 Create chapters
- 26 Show status messages
- 27 Start Flexible Recording

# FUNCTIONS Window

By using the FUNCTIONS window you may access the main functions quickly and easily.

- 2 ▲, ▼ to select a menu item, then
  - If you select "Other Functions", press [▲, ▼] to select a menu item and press [OK].

## 6 Operation Instructions

### 6.1. (DVD) Taking out the Disc from RAM-Drive Unit when the Disc cannot be ejected by OPEN/CLOSE button

#### 6.1.1. (DVD) Forcible Disc Eject

##### 6.1.1.1. (DVD) When the power can be turned off.

1. Turn off the power and press [STOP], [CH UP] keys on the front panel simultaneously for 5 seconds.

##### 6.1.1.2. (DVD) When the power can not be turned off.

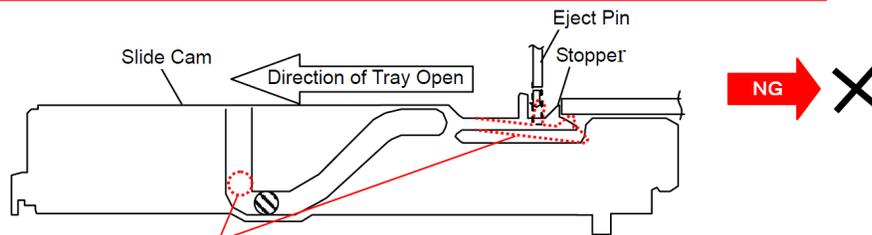

1. Press [POWER] key on the front panel for over 10 seconds to turn off the power forcibly, and press [STOP] [CH UP] keys on the front panel simultaneously for 5 seconds.

#### 6.1.2. (DVD) When the Forcible Disc Eject can not be done.

#### Caution!

- 1: If you push strong and move the Slide Cam to counter direction of the arrow, the Stopper will be bended and Slide Cam won't stop at Stopper and will reach position for taking out Traverse Base. And Traverse Base might fall down later.

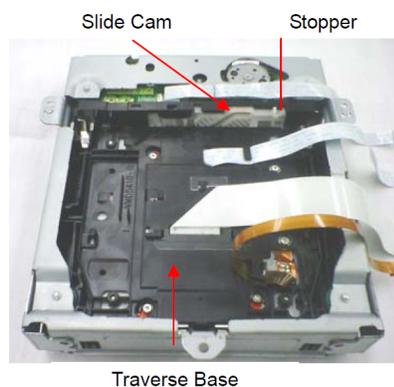

**Absolutely, please do not move Slid Cam in the counter direction of the arrow.**

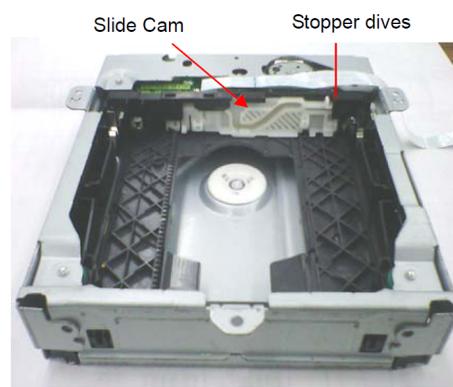

#### **NG Position (Traverse Base might fall down later)**

**If you move the Slide Cam to counter direction of the arrow, Slide Cam won't stop at Stopper and will reach position for taking out Traverse Base. And Traverse Base might fall down later.**

**Before fall down of Traverse Base**

**After fall down of Traverse Base**

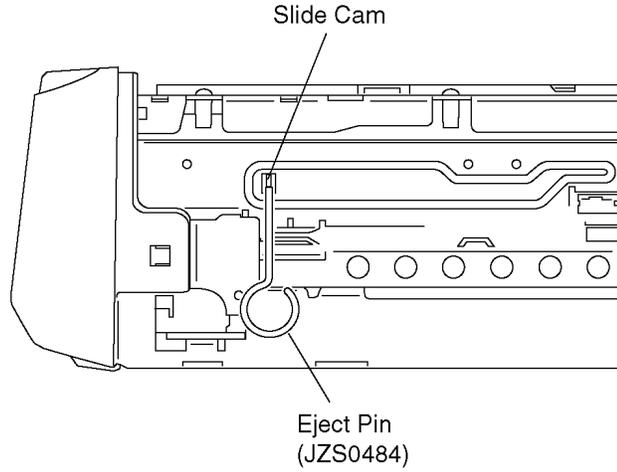

- 2: Moreover, the slide cam will be on irregular position against condition of the shipment if the tray is pushed by the hand after manual tray ejection is done, the hold of traverse Base becomes imperfect, and the danger of fall of traverse Base increases.

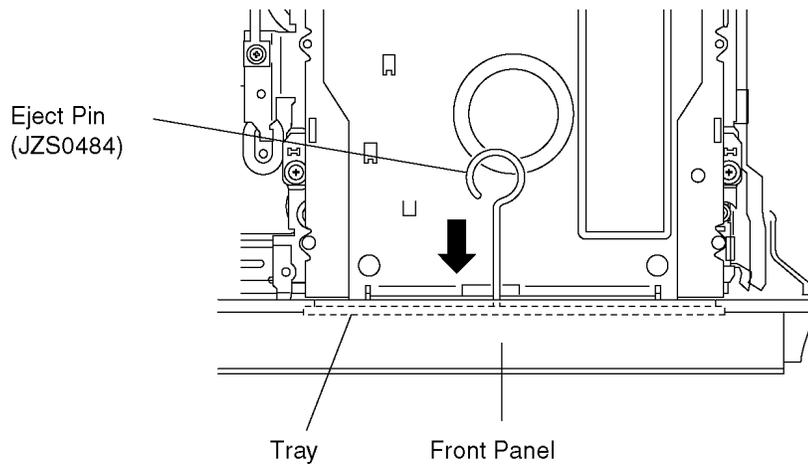

**Absolutely, complete close of tray by electricity** after manual tray ejection was done.

(Especially finish CLOSE function of tray by electricity when the product will be transported after inspection.)

1. Turn off the power and pull out AC cord.
2. Remove the Top Case.
3. Push in SLIDE CAM by Eject Pin(JSJ0484) or minus screw driver (small) to eject tray slightly.

4. Push out Tray by Eject Pin (JZS0484) or minus screw driver (small).

## 6.2. (VHS) Removing Cassette Tape manually

When the cassette tape could not be uninstalled from an electrical malfunction, there are 2 ways to remove a cassette tape.

### 6.2.1. (VHS) Removal by compulsory unloading.

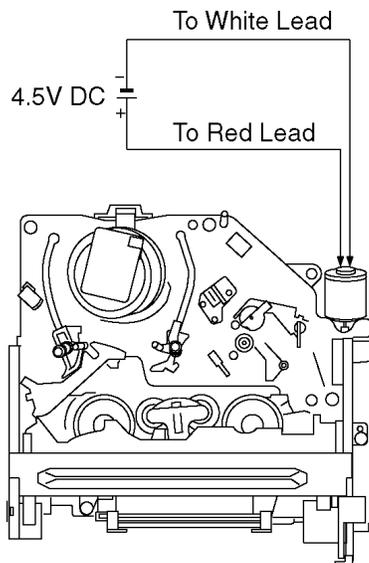

If Service Mode can be activated when the power can not be turned on, this operation is able.

1. Press [STOP] and [CH UP] button simultaneously for more than 5 seconds.

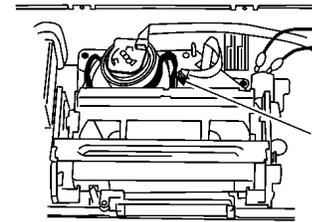

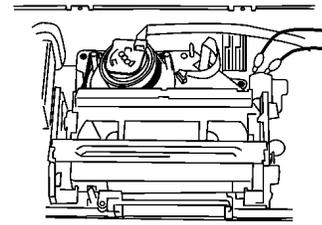

### 6.2.2. (VHS) Removal by manual operation by rotating the Loading Motor with the batteries.

1. Disconnect the AC plug, and remove the Top Panel and the Front Panel by referring to the Disassembly Procedures.
2. Connect three batteries (1.5V spec.) to the Loading Motor in series for supplying 4.5V to rotate the Loading Motor as shown below.

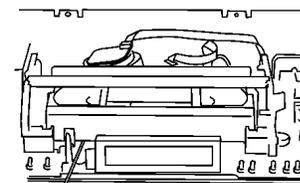

#### CONNECTION for UNLOADING

3. Stop unloading just before unloading will be completed as shown below, and then the tape becomes slack as shown below.
4. Rotate the S-Reel by a small minus screwdriver to remove the slack tape as shown below.

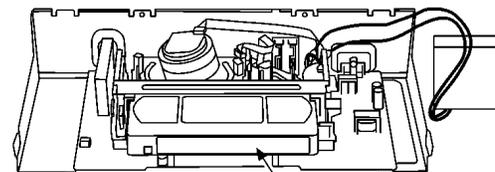

Slack of Tape

Minus Screw Driver (Small)

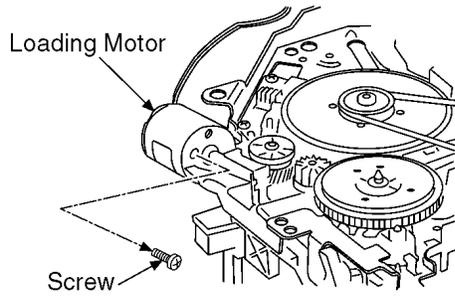

5. Then unload again to remove the cassette tape as shown below.

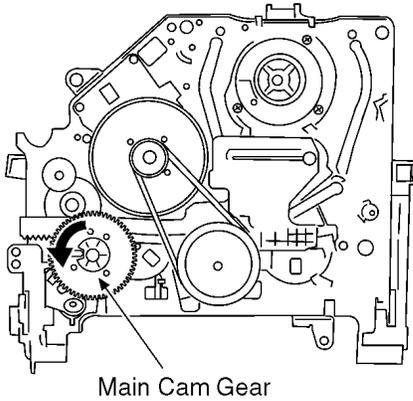

Cassette Tape

### 6.2.3. (VHS) Take out Cassette Tapemanually after removing the mechanism

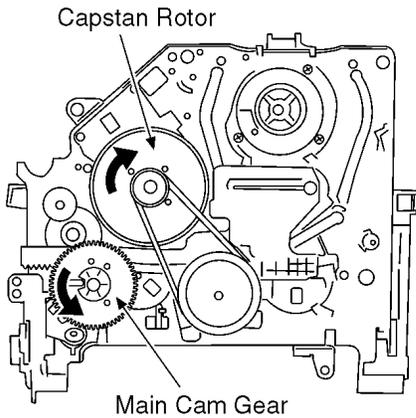

1. Disconnect the AC plug, and remove the Top Case, Front Panel and the Mechanism by referring to "9 Assembling and Disassembling Instructions"
2. Remove the Screw and remove the Loading Motor as shown below.

3. Rotate the Main Cam Gear counter-clockwise until just before the unloading will be completed as shown below. .

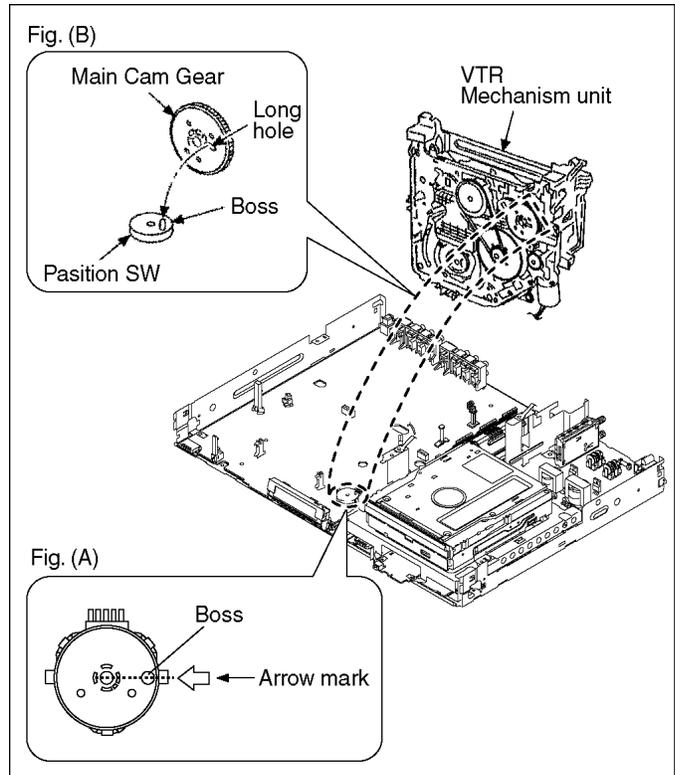

4. Rotate the Capstan Motor clockwise to remove the slack tape as shown below.  
 5. Rotate the Main Cam Gear counter-clockwise again to remove the cassette-tape as shown below.

6. Attach Loading Motor and tighten the screw.

7. Set the Position Switch to EJECT POSITION certainly and attach the mechanism to chassis as shown below.

## 7 Service Mode

### 7.1. (DVD) Self-Diagnosis and Special Mode Setting

#### 7.1.1. (DVD) Self-Diagnosis Functions

Self-Diagnosis Function provides information for errors to service personnel by "Self-Diagnosis Display" when any error has occurred.

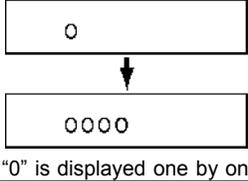

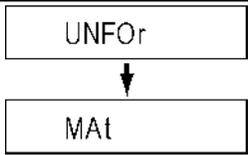

**U\*\*, H\*\* and F\*\* are stored in memory and held.**

You can check latest error code by transmitting [0] [1] of Remote Controller in Service Mode.

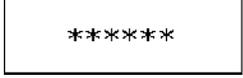

Automatic Display on FL will be cancelled when the power is turned off or AC input is turned off during self-diagnosis display is ON.

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
U30	Remote control code error	Display appears when main unit and remote controller codes are not matched.	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">RC *</div> <p>"*" is remote controller code of the main unit. Display for 5 seconds.</p>
U59	Abnormal inner temperature detected	Display appears when the drive has abnormal temperature. The power is turned off forcibly. For 30 minutes after this, all key entries are disabled. (Fan motor operates at the highest speed for the first 5 minutes. For the remaining 25 minutes, fan motor is also stopped.) The event is saved in memory as well.	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U59</div> <p>"U59 is displayed for 30 minutes.</p>
U61	The unit is carrying out its recovery process. (with no disc in the disc tray)	<ul style="list-style-type: none"> <li>The unit detected an error while recording or playing with no disc in the disc tray.</li> <li>The unit is carrying out its recovery process. This process restores the unit to normal operation. The unit is not broken. Wait until the message disappears.</li> </ul>	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U61</div>
U72	HDMI connection error (communication error)	This error is displayed when there are any communication problems with the unit and the equipments (TV, amplifier etc.) connected to the unit by HDMI. (or when there is a problem with the HDMI cable)		<div style="border: 1px solid black; padding: 5px; text-align: center;">U72</div> <p>U72 display disappears when error has been solved by Power OFF/ON of connecting equipment or by inserting/removing of HDMI cable.</p>
U73	HDMI connection error (authentication error)	When authentication error occurs while the equipments (TV, amplifier etc.) are connected by HDMI. (or when there is a problem with the HDMI cable)	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U73</div> <p>U73 display disappears when error has been solved by Power OFF/ON of connecting equipment or by inserting/removing of HDMI cable.</p>
U76	Injustice disc error	HDMI cannot output because you are connected to a model that does not support copyright protection.	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U76</div>
U88	The unit is carrying out its recovery process. (with a disc in the disc tray)	<ul style="list-style-type: none"> <li>The unit detected an error while recording or playing with a disc in the disc tray.</li> <li>The unit is carrying out its recovery process. This process restores the unit to normal operation. The unit is not broken. Wait until the message disappears.</li> </ul>	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U88</div>
U99	Hang-up	Displayed when communication error has occurred between Main microprocessor and Timer microprocessor.	No display	<div style="border: 1px solid black; padding: 5px; text-align: center;">U99</div> <p>Displayed is left until the [POWER] key is pressed.</p>
F00	No error information	Initial setting for error code in memory (Error code Initialization is possible with error code initialization and main unit initialization.)	No display	No display

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
F09	Serial Communication Error between VHS Microprocessor and Timer Microprocessor.	Please confirm Serial Communication terminal of Microprocessor. <b>NOTE:</b> If F09 appears just after updating Firmware, pull off and insert AC plug, then it will disappear.	No display	F09
F34	Initialization error when main microprocessor is started up for program recording	When initialization error is detected after starting up main microprocessor for program recording, the power is turned off automatically. The event is saved in memory.	No display	No display
F58	Drive hardware error	When drive unit error is detected, the event is saved in memory.	No display	No display
F60	DVD module has not been started.	Defect of Digital P.C.B. Mode: No change	No display	F60
HDMI	HDMI connection check	This unit is confirming that it is connected with equipment compatible with HDAVI control.	No display	HD 771
F74	HDIM Device Key Communication error.	HDMI connection could not be authenticated due to a transfer malfunction. Factor of HDMI Device key-road failure · When HDMI LSI is damaged. · When the bus line of I2C doesn't operate normally. · When device key information recorded is damaged.	No display	F74
F75	HDIM Device Key Information error	HDMI connection could not be authenticated due to an internal data malfunction. Factor of HDMI Device key-road failure · When HDMI LSI is damaged. · When the bus line of I2C doesn't operate normally. · When device key information recorded is damaged.	No display	F75
UNSUPPORT	Unsupported disc error	*An unsupported format disc was played, although the drive starts normally. *The data format is not supported, although the media type is supported. *Exceptionally in case of the disc is dirty.	"This disc is incompatible."	UNSUP ↓ PORT Display for 5 seconds.
NO READ	Disc read error	*A disc is flawed or dirty. *A poor quality failed to start. *The track information could not be read.	"Cannot read. Please check the disc."	NO ↓ READ
HARD ERR	Drive error	The drive detected a hard error.	"DVD drive error."	Display for 5 seconds. HARD ↓ Err
No REC	Recording is impossible	[No REC] is displayed when recording is impossible due to the defect, dirt or wound of media.	No display	WRITE ↓ Err
SELF CHECK	Restoration operation	Since the power cord fell out during a power failure or operation, it is under restoration operation. *It will OK, if a display disappears automatically. If a display does not disappear, there is the possibility that defective Digital P.C.B.	No display	0 ↓ 0000 "0" is displayed one by one.

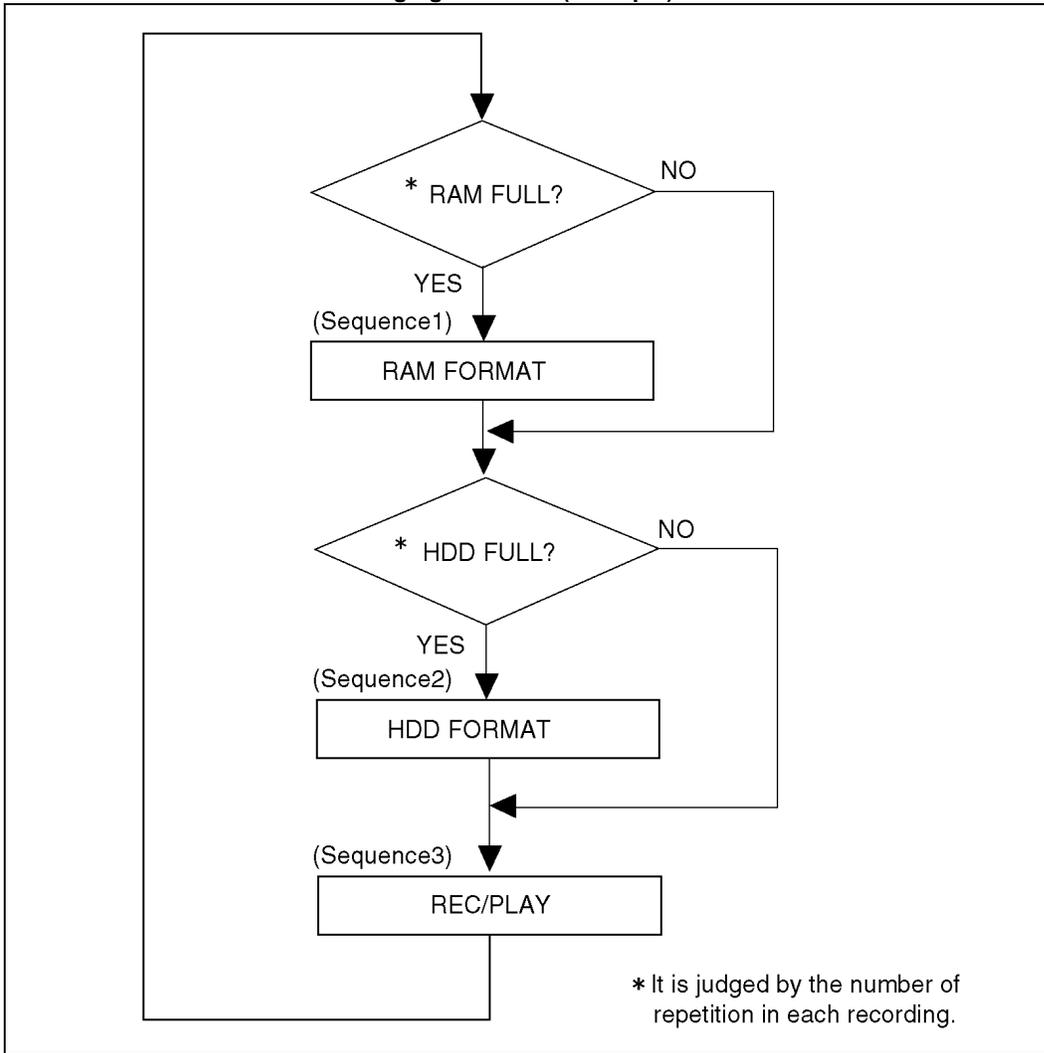

Error Code	Diagnosis contents	Description	Monitor Display	Automatic FL display
PLEASE WAIT	Unit is in termination process	Unit is in termination process now. "BYE" is displayed and power will be turned off. In case "Quick Start" of setup menu is ON, it is displayed in restoration operation for AC off.	No display	
UNFORMAT	Unformatted disc error	You have inserted an unformatted DVD-RAM or DVD-RW that is unformatted or recorded on other equipment.	<div style="border: 1px solid black; padding: 2px; width: fit-content;">Format</div> This disc is not formatted properly. Format the disc in DISK MANAGEMENT?	

## 7.1.2. (DVD) Special Modes Setting

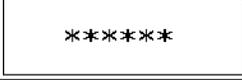

Item		FL display	Key operation
Mode name	Description		Front Key
TEST Mode	*All the main unit's parameters are initialized.		Press [VHS to DVD COPYING], [REC] and [OPEN/CLOSE] keys simultaneously for five seconds when power is off.
Rating password	The audiovisual level setting password is initialized to "Level 8".	No display	When the power is on (E-E mode). While the tray is open, press [REC] and [PLAY] simultaneously for 5 seconds.
Service Mode	Setting every kind of modes for servicing. *Details are described in "7.1.3. (DVD) Service Modes at a glance".		When the power is off, press [VHS to DVD COPYING], [OPEN/CLOSE] and [STOP] keys simultaneously for 5 seconds.
Forced disc eject	Removing a disc that cannot be ejected. The tray will open and unit will shift to P-off mode. *During Schedule Recording, Forced disc eject is invalid. While Demonstration Lock is being set, this Forced disc eject function is not accepted.	The display before execution leaves. 	When the power is off, press [STOP] and [CH UP] keys simultaneously for 5 seconds.
Forced power-off	When the power button is not effective while power is ON, turn off the power forcibly. *When Schedule Recording is ON, execute "Forced Power-off" after releasing Schedule Recording.	Display in P-off mode.	Press [POWER] key over than 10 seconds.
Aging	Perform sequence of modes as * Aging Description shown below continually. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Caution:</b>            All programs in DVD-RAM disc will be deleted because Formatting is done once in Aging process.         </div>	Display following the then mode.	Set DRIVE SELECT to DVD. When the power is ON, press [CH DOWN], [VHS to DVD COPYING] and [OPEN/CLOSE] simultaneously for over 5 seconds and less than 10 seconds. <b>NOTE1:</b> If Unit has not turned into Aging mode by operations shown above, execute TEST MODE once and re-execute operation shown above. (*All the main unit's parameters are initialized by TEST mode.) <b>NOTE2:</b> If the unit has hung-up because of pressing keys for over 10 seconds, once turn off the power, and re-execute this command. *When releasing Aging mode, press [POWER] key, AC-OFF.

Item		FL display	Key operation
Mode name	Description		Front Key

**Aging Contents (Example):**

- \*XP mode . . . . . repeat once
- SP mode . . . . . repeat 2 times
- LP mode . . . . . repeat 4 times
- EP mode . . . . . repeat 12 times

Item		FL display	Key operation
Mode name	Description		Front Key
Demonstration lock/unlock	Ejection of the disc is prohibited. The lock setting is effective until unlocking the tray and not released by "Main unit initialization" of service mode.	*When lock the tray.  "LOCK" is displayed for 3 seconds.	When the power is on, press [STOP] and [POWER] keys simultaneously for 5 seconds. *The time difference of simultaneous key pressings should be within 0.5 sec. <b>Note1:</b> When a disc is not in tray, this setting is not effective. <b>Note2:</b> Time difference between pressing of [STOP] and [POWER] should be within 0.5 seconds.
		*When unlock the tray.  "UNLOCK" is displayed for 3 seconds.	When the power is on and tray being locked, press [STOP] and [POWER] keys simultaneously for 5 seconds.
		*When press OPEN/CLOSE key while the tray being locked.  Display "LOCK" for 3 seconds.	Press [OPEN/CLOSE] key while the tray being locked.
Progressive initialization	The progressive setting is initialized to Interlace.	The display before execution leaves. 	When the power is on (E-E mode), press [STOP] and [VHS to DVD COPYING] simultaneously for 5 seconds.
ATP Initialization	ATP setting and all parameters (including clock) are initialized, and the unit turns off automatically.	It is same with display in stop mode.	When the power is on (E-E mode), press [CH UP] and [CH DOWN] simultaneously for 5 seconds.

### 7.1.3. (DVD) Service Modes at a glance

Service mode setting: While the power is off, press [STOP], [VHS to DVD COPYING] and [OPEN / CLOSE] simultaneously for five seconds.

Item		FL display	Key operation (Remote controller key)
Mode name	Description		
Release Items	Item of Service Mode executing is cancelled.	SM	Press [0] [0] or [Return] in service mode.
ROM Version Display	1. Region code (displayed for 5 sec.) 2. Main firm version (displayed for 5 sec.) 3. Timer firm version (displayed for 5 sec.) 4. Drive firm version (displayed for 5 sec.) 5. ROM correction version (displayed for 5 sec.) 6. VHS Microprocessor version (displayed for 5 sec.) 7. VHS ROM correction version (left displayed)	1. NO* 2. ***** 3. ***** 4. **** 5. *** 6. **** 7. ** * are version displays.	Press [0] [2] in service mode
White Picture Output	White picture is output as component Output from AV Decoder. *White picture (Saturation rate : 100%) *It is enable to switch Interlace/Progressive by "I/P switch: [1] [4]"	*Initial mode is "Interlace". WH it	Press [1] [1] in service mode.
		Switch Interlace/Progressive WH it P	Press [1] [4] in White Picture Output mode. *I/P are switched alternately.
Magenta Picture Output	Magenta picture is output with Component Output from AV Decoder. *Magenta picture (Saturation rate: 100%) *It is enable to switch Interlace/Progressive by "I/P switch: [1] [4]"	*Initial mode is "Interlace". MAGE	Press [1] [2] in service mode.
		Switch Interlace/Progressive MAGE P	Press [1] [4] in Magenta Picture Output mode. *I/P are switched alternately.
I/P Switch	Switch Interlace and Progressive in EE mode. *Initial setting is "Interlace". *This command is effective during executing "White Picture Output", "Magenta Picture Output" and mode.	Initial mode is Interlace SM P Switch Interlace/Progressive SM I	Press [1] [4] in I/P Switch mode. *I/P are switched alternately.
Audio Mute (XTMUTE)	Check whether mute is applied normally by the timer microprocessor.	X T	Press [2] [1] in service mode.
Audio Mute (XDMUTE)	Check whether mute is applied normally by the Digital P.C.B..	D T	Press [2] [2] in service mode.

Item		FL display	Key operation
Mode name	Description		(Remote controller key)
Audio Pattern Output	The audio pattern stored in the internal memory is output (Lch: 1kHz/-18dB) (Rch: 400Hz/-18dB) *Audio sound clock switching operation of DAC can be confirmed by sub command [2] [4].	Initial mode (Audio 48kHz) 	Press [2] [3] in service mode.
		Audio 44.1kHz/48kHz switching 	Press [2] [4] in Audio Pattern Output mode. *48 kHz / 44.1 kHz are switched alternately.
Laser Used Time Indiction	Check laser used time (hours) of drive.	 ●(*****) is the used time display in hour. ●Laser used time of DVD/ CD in Playback/Recording mode is counted.	Press [4] [1] in service mode.
Delete the Laser Used Time	Laser used time stored in the memory of the unit is deleted.		Press [9] [5] in service mode.

Item		FL display	Key operation

S1 signal output	Forcibly superimpose the S1 signal (approx. 4.5V DC) on the EE chroma signal, and check the output on the S terminal.	<div style="border: 1px solid black; padding: 5px; font-size: 24px;">S1</div>	Press [5] [2] in service mode.															
S2 signal output	Forcibly superimpose the S2 signal (approx. 2V DC) on the EE chroma signal, and check the output on the S terminal.	<div style="border: 1px solid black; padding: 5px; font-size: 24px;">S2</div>	Press [5] [3] in service mode.															
Front connection inspection	Press all front keys and check the connection between Main P.C.B. and Front key Switches.	<div style="border: 1px solid black; padding: 5px; text-align: center;"> <table style="margin: auto;"> <tr> <td style="text-align: center;">0Γ</td> <td style="text-align: center;">**</td> </tr> <tr> <td style="text-align: center;"> </td> <td style="text-align: center;"> </td> </tr> <tr> <td style="text-align: center;">(1)</td> <td style="text-align: center;">(2)</td> </tr> </table> </div> <p>(1) Each time a key is pressed, segment turned on increases one by one. (2) Total number of keys that have been pressed.</p>	0Γ	**			(1)	(2)	Press [5] [4] in service mode. *When finish this mode, press [POWER] for 10 seconds.									
0Γ	**																	
(1)	(2)																	
Production Date Display	Display the date when the unit was produced.	<div style="border: 1px solid black; padding: 5px; font-size: 24px;">YYMMDD</div> <p>YY: Year MM: Month DD: Day</p>	Press [6] [1] in service mode.															
Display the accumulated working time	Display the accumulated unit's working time.	<div style="border: 1px solid black; padding: 5px; font-size: 24px;">*****</div> <p>(Indicating unit: Second)</p>	Press [6] [4] in service mode.															

Item		FL display	Key operation
Mode name	Description		(Remote controller key)
Display the Error History	Display the Error History stored on the unit.	Display reason of error for 5 seconds. <div style="border: 1px solid black; padding: 5px; text-align: center;">NO ***</div> 01: Defect of Digital P.C.B. (AV DEC / MAIN CPU) 02: Defect of RAM Drive. 03: Defect of Disc. 04: Defect of Digital P.C.B. or Communication Error. 05: Defect of Digital P.C.B. (AV DEC / MAIN CPU)  Display the time when the error has occurred for 5 seconds. <div style="border: 1px solid black; padding: 5px; text-align: center;">DDhhmm</div> DD: Day hh: Hour mm: Minute Accumulated working time till occurring of the error is left displayed. <div style="border: 1px solid black; padding: 5px; text-align: center;">*****</div> (Indicating unit: Second)	Press [6] [5] in service mode. Then press [0] [1] ~ [1] [9], the past 19 error histories are displayed.
Delete the Error History	Delete Error History information stored on the unit.	<div style="border: 1px solid black; padding: 5px; text-align: center;">CLr 3</div>	Press [9] [7] in service mode.
Tray OPEN/CLOSE Test	The RAM drive tray is opened and closed repeatedly.	<div style="border: 1px solid black; padding: 5px; text-align: center;">*****</div> * is number of open/close cycle times.	Press [9] [1] in service mode *When releasing this mode, press the [POWER] button of Remote Controller more than 10 seconds.
Error code initialization	Initialization of the last error code held by timer (Write in F00)	<div style="border: 1px solid black; padding: 5px; text-align: center;">CLr 4</div>	Press [9] [8] in service mode.
Initialize Service	Last Drive Error, Error history and Error Codes stored on the unit are initialized to factory setting.	<div style="border: 1px solid black; padding: 5px; text-align: center;">CLr 5</div>	Press [9] [9] in service mode.
Finishing service mode	Release Service Mode.	Display in STOP (E-E) mode. <div style="border: 1px solid black; padding: 5px; text-align: center;">*****</div>	Press power button on the front panel or Remote controller in service mode.

## 7.2. (VHS) Self-Diagnosis and Special Mode Setting

### 7.2.1. (VHS) Self-Diagnosis Functions

This model has a self-diagnosis and display function. If the VHS section detects trouble during installation or during use, one of the following Error Codes will automatically appear in the display on VHS side. Error Codes are displayed in the form of a single English letter followed by two numbers, as for example "H01".

**Note:**

1. The indication "U" is displayed on the FIP while power remains on.
2. The indication "H" or "F" is displayed on the FIP, and the power is automatically turned off. When the power is turned on again, the Error indication code will disappear and the unit will return to normal display mode (either clock or counter is displayed).
3. This Error indication code will be stored in the microprocessor even after the AC plug being disconnected.  
The two-digit number portion of the stored Error indication code can be re-displayed in "second" display portion (the last 2 digits of the FIP) by placing the unit in Service Mode Number 3. When turning on Service Data Display as for example "01" or "02" etc. If a second error occurs, the most recent error will be displayed and stored until 3 self-diagnosis histories in maximum.
4. To erase the stored Error Code data, Press STOP and EJECT buttons on VCR simultaneously for over 5 seconds in Service Mode 3.

#### Example of Error Indication on the FIP

		U, H or F	0	5
		↓	↓	↓
HOUR	10min.	1min.	10sec.	1sec.
Blank	Blank	Management Sign	Service Data No.	

#### Division of Management

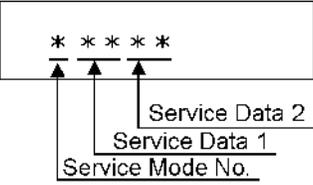

Management Sign	Management Division
U	User can deal with.
H	Shop can deal with.
F	It should be dealt with in service shop.

#### Error Number at a glance

Memory No. (Error No.)	Reason	Automatic display	Memory
H01	The cylinder could not be started. (Error of the cylinder or the cylinder driver.)	Yes	Yes
H02	The CAP FG could not be detected.	Yes	Yes
F03	Mechanism lock during without the unloading and the cassette-up.	Yes	Yes
F04	Mechanism lock during unloading	Yes	Yes
F05	S-reel pulse cannot be detected when a cassette tape is inserted. (Error of the S-reel system or the Capstan system.)	No	Yes
F06	Mechanism lock during the Cassette-up.	Yes	Yes
F09	Communication Error between VHS Microprocessor (IC6001) and Timer Microprocessor (IC7501)	Yes	Yes
H07	The recording circuit can not be operated in REC mode.	Yes	Yes
H08	The recording circuit is operated in except for REC mode.	Yes	Yes
U11	Cylinder clogs during the PLAY mode.	Yes	Yes
F15	S-reel pulse cannot be detected when a cassette tape is inserted. (Error of the S-reel system or the Capstan system.)	No	Yes
H16	Detection of the Cylinder lock during the constant rotation	No	Yes
H17	Detection of S-reel lock during the constant tape running	Yes	Yes
H18	Detection of T-reel lock during the constant tape running	Yes	Yes
F20	NG1 in the PG Shifter Automatic Adjustment (The cylinder rotation is unstable during the automatic adjustment.)	Yes	Yes
F21	NG2 in the PG Shifter Automatic Adjustment (The vertical sync signal is lacked while over 5 seconds on the alignment tape.)	Yes	Yes
F22	NG3 in the PG Shifter Automatic Adjustment (The installing position of Heads to the cylinder is out of specification.)	Yes	Yes
F23	NG4 in the PG Shifter Automatic Adjustment (The servo is not locked to the cylinder for more than 10 sec.)	Yes	Yes
H80	An exceptional ejection depends on a Error	No	Yes

## 7.2.2. (VHS) Special Modes Setting

**NOTE:**  
**OPERATION SELECT should be set to VHS.**

Item		FL display	Key operation
Mode name	Description		Front Key
Tracking Center	Tape Tracking is adjusted to center FIX position.	No display.	During PLAYBACK, press [CH UP] and [CH DOWN] keys simultaneously.
VHS Service Mode	In order to make service easy, a part of inside information of a microprocessor is displayed on FIP. *Details are described in "7.2.3. (VHS) Service Modes".		Press [STOP], and [EJECT] keys simultaneously for 3 seconds when power is off.
Eject	Ejecting Cassette Tape	No display.	While in other than Timer REC mode, press [STOP] key for 3 seconds or press [STOP] key of the Remote Controller for 3 seconds in VHS mode.

## 7.2.3. (VHS) Service Modes

### <Service Mode Setting>

Set OPERATION SELECT to VHS.

When power is OFF, press [STOP] and [EJECT] keys simultaneously for 3 seconds to into Service Mode.

In Service Mode, press [STOP] and [EJECT] keys simultaneously to add Service Number.

### 7.2.3.1. (VHS) Service Mode and Service Data at a glance

Service Number	Contents	Contents of Indication on minute	Contents of Indication on second	Remarks
0	Indication for the inner data of IC6001	VHS mode (Real time)	Process number (Real time)	
		VCR mode (OPM)	Management number of the processing during mechanism shifting	
1	Indication for the inner data of IC6001	Starting / finishing edges detecting data (Real time)	Data of receiving key (Real time)	
		00: Both starting / finishing edges have not been 01: Starting edge is detecting now 02: Finishing edge is detecting now 03: Both starting / finishing edges are detecting now	Indicate the receiving code when the key of VCR or remote controller being operated.	

Service Number	Contents	Contents of Indication on minute	Contents of Indication on second	Remarks
2	Indication for the inner data of IC6001	Mechanism position (Real time) 0L: EJECT position 02: DOWN position 03: RREW position 04: LOAD position 05: REV position 06: PLAY position 07: POFF position 08: STOP_R position 09: STOP_F position - : FF/REW position - : Intermediate between each positions	Ordering for the Motors (Real time) 0*, 2*: CYL off, CAP off 1*: CYL off, CAP on (fwd) 3*: CYL off, CAP on (rev) 8*, A*: CYL on, CAP off 9*: CYL on, CAP on (fwd) B*: CYL on, CAP on (rev) *0: Motor off *1: Loading *2: Unloading *3: Break (Load + Unload)	There are next conditions in this mode for enable the mechanism operations without a cassette tape. ● The starting / finishing edges are not detected. ● The reel lock is not detected ● The tape and the positions are not detected. , And so on. Press the EJET key for over 3 seconds in this mode, and then the VCR is shifted into the special modes, such as PG Adjustment, Model Code Setting, and so on. The orders for the motors are as follows. Bit 7: CYL ON/OFF Bit 6: ----- Bit 5: CAP FWD/REV Bit 4: CAP ON/OFF Bit 3: ----- Bit 2: ----- Bit 1: UNLOADING(H) Bit 0: LOADING(H)
3	Self-diagnosis history (1st)	Error number of history 1	Supplementary data 1 and 2 of history 1.	In the Self-Diagnosis Memory, next 3 BYTE is memorized for an Error. 1 BYTE: Its Error number 2 BYTE: Its supplementary data In these modes, the supplementary data 3 and 4 instead of the Error number and supplementary data 1 and 2 are indicated only while pressing STOP key.
4	Self-diagnosis history (2nd)	Error number of history 2	Supplementary data 1 and 2 of history 2.	
5	Self-diagnosis history (3rd)	Error number of history 3	Supplementary data 1 and 2 of history 3.	
6	Indication for the inner data of IC6001	Real time servo data (4 digits) (Real time) Higher rank 1 BYTE of SERVO data	Lower rank 1 BYTE of SERVO data	
7	Manual mechanism operation	Real time mechanism position 0L: EJECT position 02: DOWN position 03: RREW position 04: LOAD position 05: REV position 06: PLAY position 07: POFF position 08: STOP_R position 09: STOP_F position - : FF/REW position - : Intermediate between each positions	Real time ordering for the Motors 0*, 2*: CYL off, CAP off 1*: CYL off, CAP on (fwd) 8*, A*: CYL on, CAP off 9*: CYL on, CAP on (fwd) B*: CYL on, CAP on (rev) *0: Motor off *1: Loading *2: Unloading *3: Break (Load + Unload)	Press the STOP key, and then the cassette tape is unloaded.

### 7.2.3.2. Example of FIP

<b>4</b>	<b>0</b>	<b>3</b>	<b>1</b>	<b>2</b>
HOUR	10min.	1min.	10sec.	1sec.
Service No.	Service Data 1		Service Data 2	

### 7.2.4. (VHS) Self-Diagnosis History Memory Function

#### 7.2.4.1. (VHS) Condition for memorizing of the self-diagnosis history

1. The self-diagnosis result and the supplementary data are the condition memorized just as an Error is detected.
2. There are the histories from number 1 to number 3.
3. The latest Error is memorized on history number 1, and then the old histories are shifted to the history number 2, 3.
4. Put out data from the memory number 3 by the shift is deleted.
5. If the latest Error is same with the history number 1 (2nd-latest), it is not memorized.

(The same Error number is not memorized in succession)

### 7.2.4.2. (VHS) Condition for clearing the self-diagnosis history

1. A case of that press the STOP key and the EJECT key simultaneously over 5 seconds.

### 7.2.4.3. (VHS) Indication of the self-diagnosis history.

1. The self-diagnosis histories and its supplementary data could be indicated on the FIP with Service mode of number from 3 to 5.
2. The procedure of setting the service mode and the format if the indication are same as usual.

FIP INDICATION:

4                      0                      3                      5                      2

Hour of one-digit	Minute of two-digit	Minute of one-digit	Second of two-digit	Second of one-digit
Service mode number	Error number		Supplementary Data	
3	Number of history 1 (The latest)		Supplementary data 1 of history 1	Supplementary data 2 of history 1
4	Number of history 2 (2nd latest)		Supplementary data 1 of history 2	Supplementary data 2 of history 2
5	Number of history 3 (3rd latest)		Supplementary data 1 of history 3	Supplementary data 2 of history 3

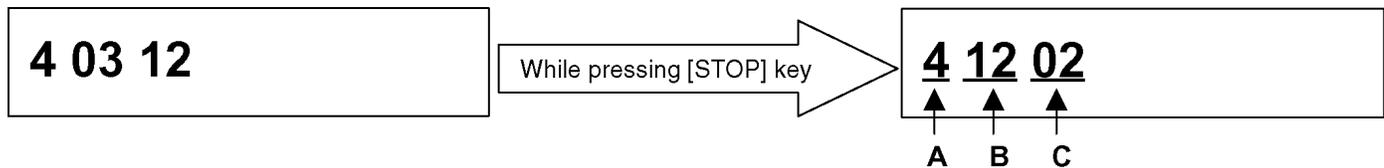

Both the Error numbers and its supplementary data of history 1, 2 and 3 are indicated by selecting the Service mode 3, 4 and 5 as shown above.

In case of that any Error has not been memorized, the Error number and its supplementary data is indicated as " - ".

### 7.2.4.4. (VHS) Display of Supplementary Data 3 and 4

During displaying the Self-Diagnosis History, press [STOP] key on front panel to change the display.

\*Example of Display

**A: Service Mode Number.**

**B: Supplementary Data 3...Mechanism process shifting Number.**

**C: Supplementary Data 4...LM(Loading Motor information)**

\*Display of 4 12 02 means that " Loading Motor turns ON when [EJECT] button was pressed, but an error has occurred while mechanism was between REV position and LOAD position.

#### <Supplementary Data 3>

[EJECT]	[FF]	[REW]
10: PLAY → passing REV 11: passing REV 12: passing REV → LOAD (Capstan STOP) 13: LOAD → DOWN 14: DOWN → EJECT 15: EJECT completion	U0: PLAY → STOP F U1: STOP F → FF U2: FF starting up	A0: PLAY → STOP F A1: STOP → REW A2: REW starting up
[PLAY]	[REC]	[STILL]
20: Cylinder starting up, Phase drawing	30: Cylinder starting up, Phase drawing	40: Turning forward
21: Audio muting, VV selection	31: REC signal output	41: Speed is 0, Capstan is OFF
[P.ON]	[STILL → PLAY]	[CUE]
-- Process of turning on power	48: Tape sending	49: x2 speed sending, Turning point of Calculating remains
[P.OFF]	[CUE → PLAY]	[REV]
70: PLAY → P.OFF	4A: Finishing edge Checking, Tape sending	80: PLAY → P.OFF
	4-: PLAY Checking, Tape sending	81: Rewinding
		P.OFF → REV

**<Supplementary Data 4> (LM Information)**

Result of request of driving Loading Motor.

Display	Description
1	There was no change of mechanism position. (Loading Motor was OFF)
2	There was some change of mechanism position. (Loading Motor was ON)

**7.2.5. (VHS) Description of Self Diagnosis Memory**

In this Self-Diagnosis Function, in case error has occurred continuously, maximum of the newest 3 error data are memorized.

And in order to analyze cause of error, the error number and the supplementary data of mode, mechanism position and so on are memorized.

**7.2.5.1. (VHS) Error Number and Supplementary Data**

The Supplementary Data as shown below are memorized to each error number.

Error No.	Reason	Supplementary Data			
		Data 1	Data 2	Data 3	Data 4
01	The cylinder could not be started. (Error of the cylinder or the cylinder driver.)	VHS mode	-	-	-
02	The CAP FG could not be detected.	VHS mode	-	Process No.	Number of FG
03	Mechanism lock during without the unloading and the cassette-up.	VHS mode	Standby position	Process No.	LM information
04	Mechanism lock during unloading	VHS mode	-	Process No.	LM information
05	S-reel pulse cannot be detected when a cassette tape is inserted. (Error of the S-reel system or the Capstan system.)	VHS mode	Tape position	Process No.	LM information
06	Mechanism lock during the Cassette-up.	VHS mode	Standby position	Process No.	LM information
07	The recording circuit can not be operated in REC mode.	VHS mode	-	Process No.	-
08	The recording circuit is operated in except for REC mode.	VHS mode	-	Process No.	-
09	Serial communication Error between VHS Microprocessor (IC6001) and Timer Microprocessor (IC7501).	-	-	-	-
11	Cylinder clogs during the PLAY mode.	VHS mode	-	Process No.	-
15	S-reel pulse cannot be detected when a cassette tape is inserted. (Error of the S-reel system or the Capstan system.)	VHS mode	Value of S-Reel Pulse counted	Process No.	-
16	Detection of the Cylinder lock during the constant rotation	VHS mode	Tape position	Process No.	-
17	Detection of S-reel lock during the constant tape running	VHS mode	Tape position	Process No.	Number of FG
18	Detection of T-reel lock during the constant tape running	VHS mode	Tape position	Process No.	Number of FG
20	NG1 in the PG Shifter Automatic Adjustment (The cylinder rotation is unstable during the automatic adjustment.)	VHS mode	-	Process No.	-
21	NG2 in the PG Shifter Automatic Adjustment (The vertical sync signal is lacked while over 5 seconds on the alignment tape.)	VHS mode	-	Process No.	-
22	NG3 in the PG Shifter Automatic Adjustment (The installing position of Heads to the cylinder is out of specification.)	VHS mode	-	Process No.	-
23	NG4 in the PG Shifter Automatic Adjustment (The servo is not locked to the cylinder for more than 10 sec.)	VHS mode	-	Process No.	-
80	An exceptional ejection depends on a Error	VHS mode	Refer to *Note 3	Process No.	-

**Note 1: Details of "VHS mode" of the Supplementary Data 1 (These values are hexadecimal indication)**

0: STOP, 1: EJECT, 2: REW, 3: FF, 4:REV, 5: CUE, 6: SLOW, 7: POWEROFF, 8: PLAY, 9: STIL,  
A: REC, B: REC PAUSE, C: ADUB, D: ADUB PAUSE, E: INSERT, F: INSERT PAUSE

**Note 2: Explanation of "Tape position" of the Supplementary Data**

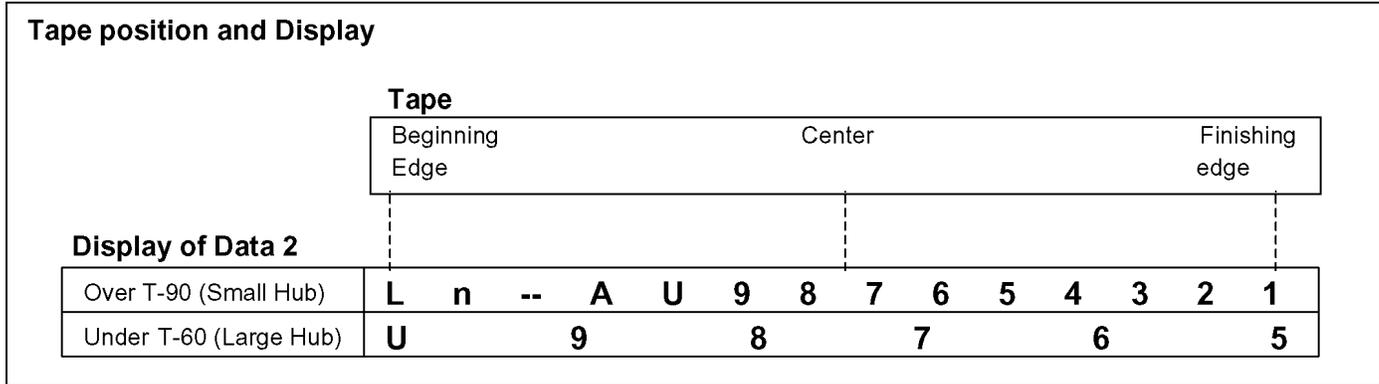

The Tape position Data is the area data of S-reel that is used for judgment of reducing speed in the Main microprocessor IC6001, and as the tape position is moved from the starting edge to the finishing edge, the value becomes smaller.

The Tape Data does not become "0" even if the tape reaches the finishing edge as the hub remains, and the tape position values are different between the large hub and the small hub as the each diameters are different from each other.

Tape Type	The aim of Tape position between the starting edge and the finishing edge
60 min. or less type (Large Hub)	The Tape position is divided into 6 stages between the Tape beginning edge: "A " and the Tape end edge: "5".
90 min. or over type (Small Hub)	The Tape position is divided into 14 stages between the Tape beginning edge: "E " and the Tape end edge: "1".

- "A" and "E" is hexadecimal. "A" =10 (Decimal), "E" =14 (Decimal).
- Hexadecimal indication from "A" to "E" are shown below.

A: □	B: □	C: —	D: □	E: □	F: □
------	------	------	------	------	------

**Note 3: Supplementary Data 2 (Reason of Ejection)**

Supplementary Data 2	Reason
1	S-reel pulse is less than 3 when the loading has been completed. (Miss catching the tape)
2	Pulse Timer over during the short rewind at the DOWN position. (Error of S-photo sensor system, S-reel system, Capstan system)
3	Mechanism lock from the DOWN position to the LOAD position during the loading.
4	Both ends have been detected at the LOAD position when the loading is started.

## 8 Service Fixture & Tools

(For DVD)

Part Number	Description	Compatibility
RFKZ0168	Extension Cable (Power & Digital I/F P.C.B. - FAN / 3 Pin)	Same as E50 / ES30V / ES40V Series
RFKZ0169	Extension Cable (Power & Digital I/F P.C.B. - DVD Drive / 4 Pin)	Same as E100H Series
RFKZ0366	Extension FFC (Digital P.C.B. - DVD Drive / 40 Pin)	Same as EH55 Series
RFKZ0327	Extension Cable (Main P.C.B. - Power & Digital I/F P.C.B. / 15 Pin / 40 mm)	Same as ES40V Series
RFKZ0240	Extension Cable (Main P.C.B. - Power & Digital I/F P.C.B. / 19 Pin / 40 mm)	Same as EH75V / ES30V / ES40V Series
RFKZ0178	Extension Cable (Main P.C.B. - Power & Digital I/F P.C.B. / 7 Pin)	Same as EH75V Series
RFKZ0215	Extension Cable (Main P.C.B. - Front (L) P.C.B. / 12 Pin)	Same as ES15 / E55 / ES30V / ES40V Series
RFKZ0239	Extension Cable (Power & Digital I/F P.C.B. - Front (R) P.C.B. / 10 Pin)	Same as E75V / ES30V Series
RFKZ0260	Extension Cable (Power & Digital I/F P.C.B. - Digital P.C.B. / 88 Pin)	Same as ES15 / EH55 Series
JZS0484	Eject Pin	Same as ES15 / E50 Series
RFKZ03D01K	Lead Free Solder (0.3mm/100g Reel)	Same as ES15 Series
RFKZ06D01K	Lead Free Solder (0.6mm/100g Reel)	Same as ES15 Series
RFKZ10D01	Lead Free Solder (1.0mm/100g Reel))	Same as ES15 Series
RFKZ0316	Solder Remover (Lead free low temperature Solder/50g)	Same as ES15 Series
RFKZ0328	Flux	Same as ES15 Series

(For VHS)

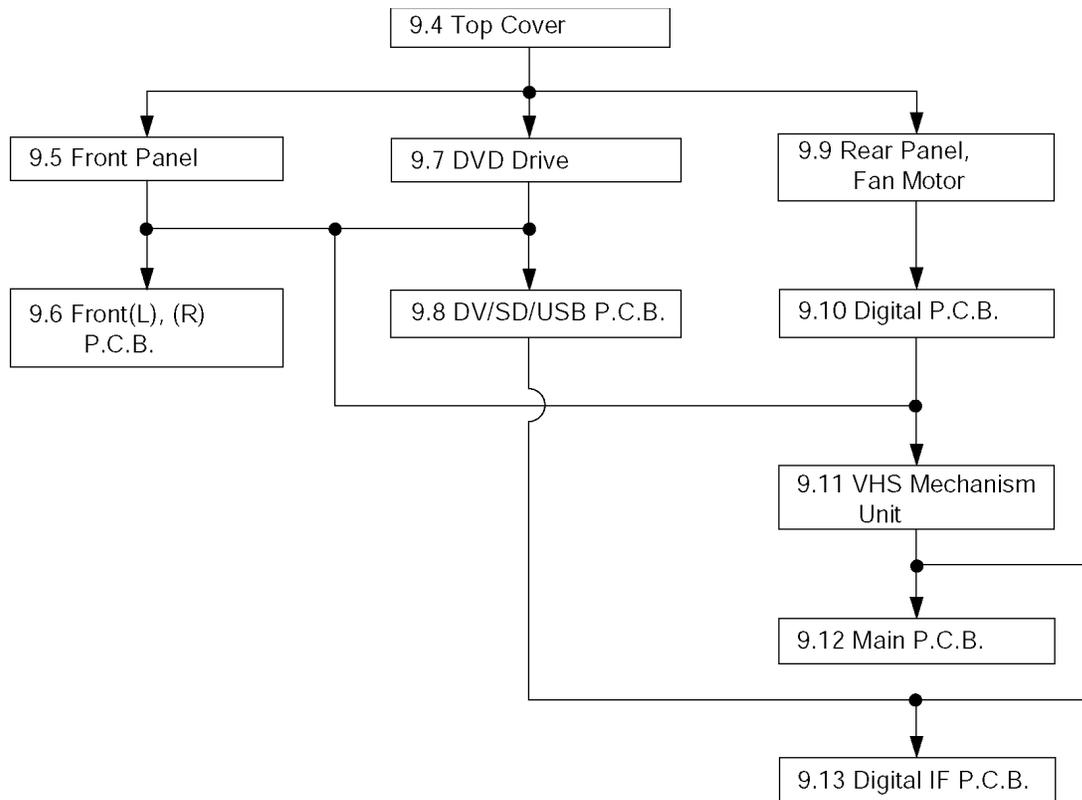

Part Number	Description	Compatibility
VFM8080HQFP	NTSC VHS Alignment Tape	Same as E75V / ES30V / ES40V Series
VFK0329	Post Adjustment Screwdriver	Same as E75V / ES30V / ES40V Series
VFK0330	Fine Adjustment Gear Driver	Same as E75V / ES30V / ES40V Series

## 9 Assembling and Disassembling Instructions

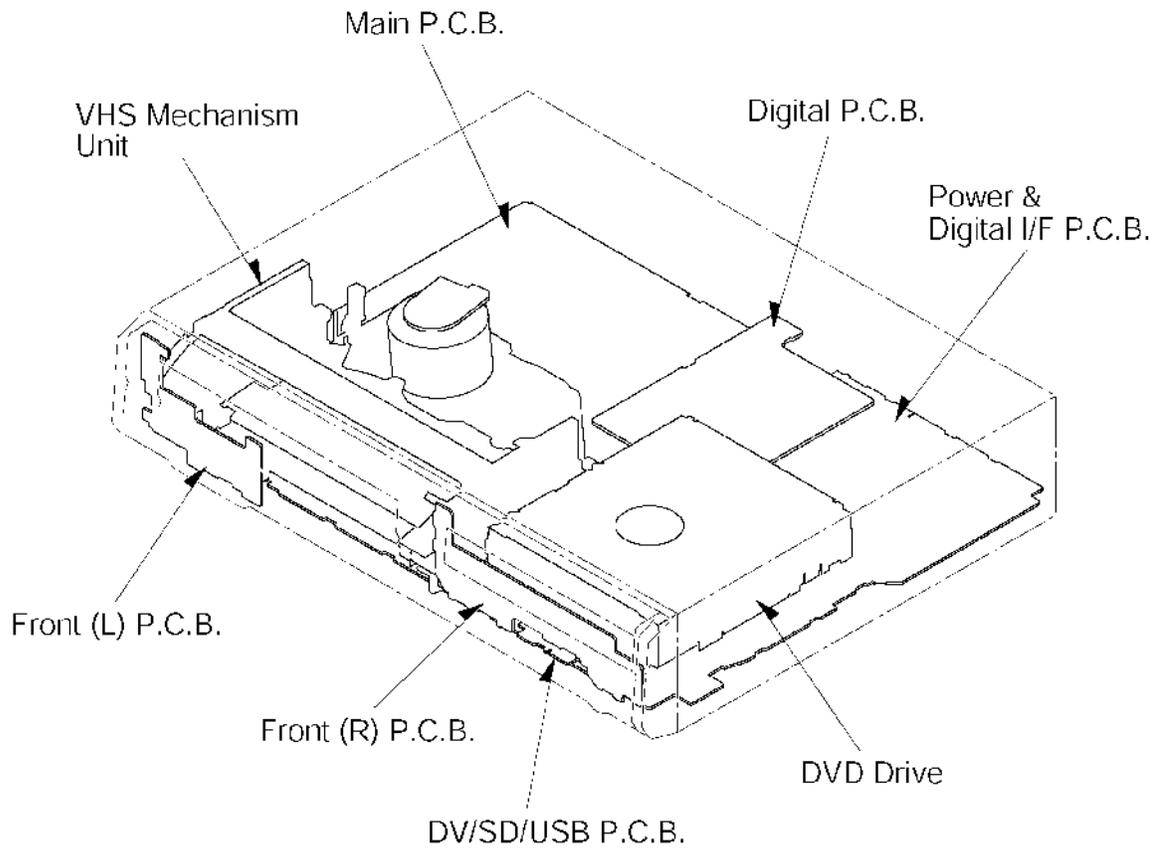

### 9.1. Disassembly Flow Chart

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart below.

## 9.2. P.C.B. Positions

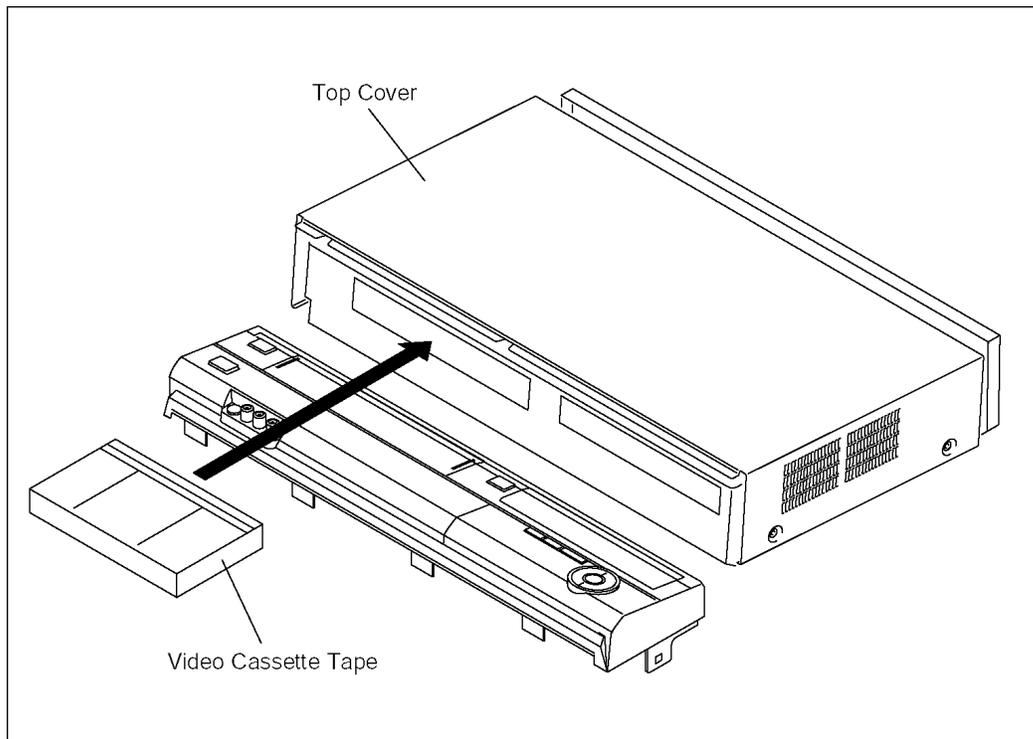

### 9.3. Caution with inserting cassette tape when disassembling the unit

**Note1:**

For description of the disassembling procedure, see the section 9.4.

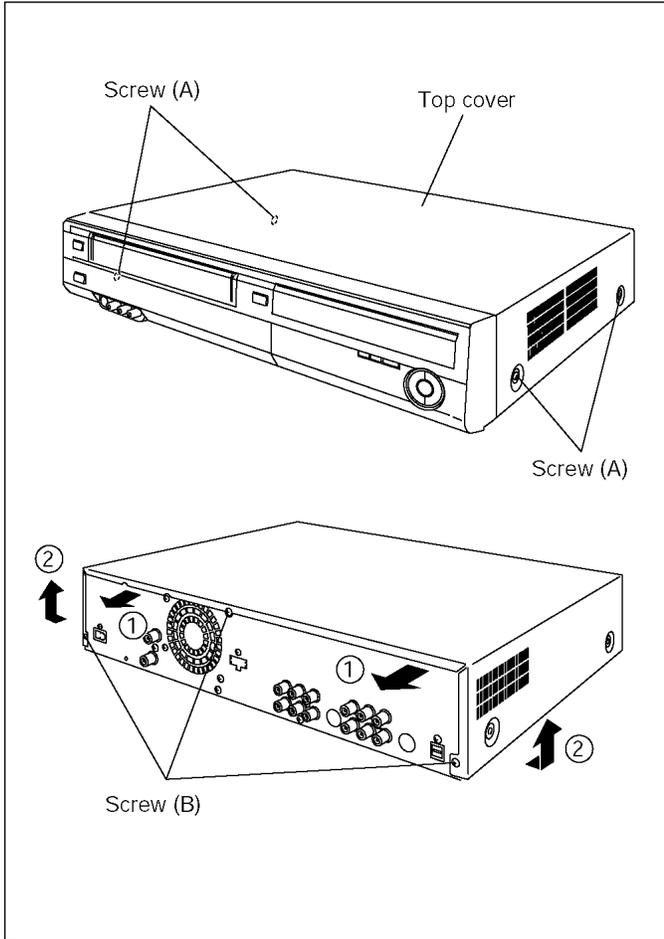

**Note2:**

Video Cassette might not enter when a strong lighting is applied to VHS Mechanism when Video Cassette is inserted. Please weaken the lighting or cover with the top panel etc.

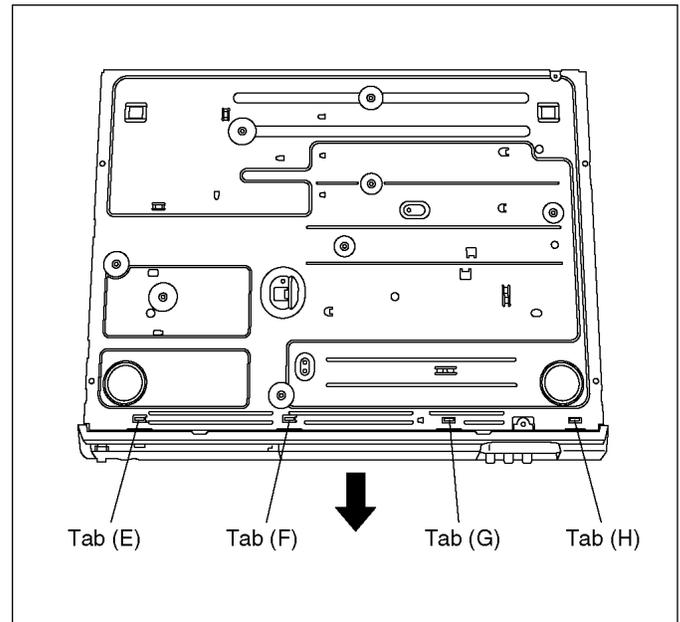

## 9.4. Top cover

1. Remove the 4 screws (A) and 3 screws (B).
2. Slide Top cover rearward and open the both ends at rear side of the Top cover a little and lift the Top cover in the direction of the arrows.

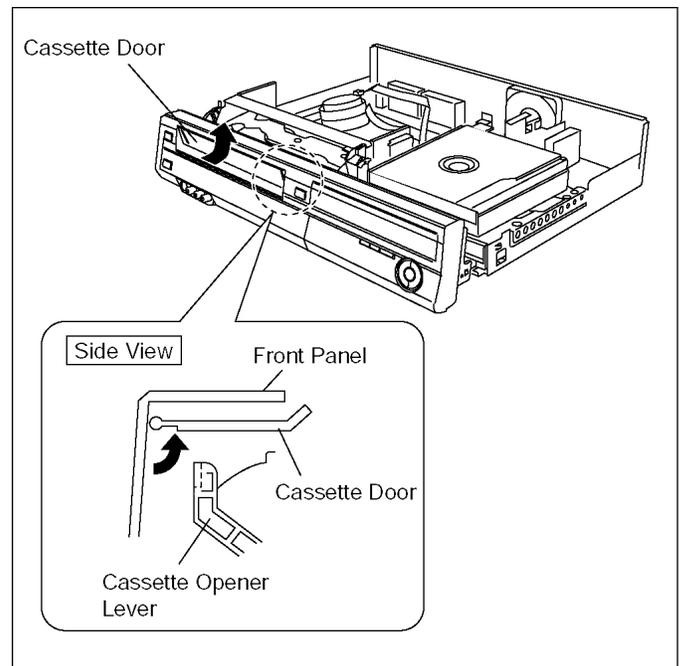

arrow.

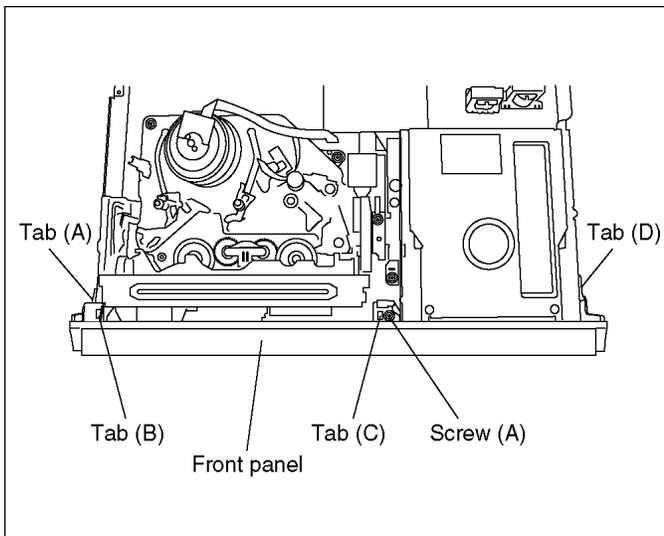

### Note:

When attaching Front Panel, in order to hook Cassette Door Opener Lever to Cassette Door, push up cassette door in the direction of arrow and insert a front panel.

## 9.5. Front Panel

1. Remove one screw (A).
2. Unlock 4 tabs in (A) - (D) turn.  
Pull with the front panel in the direction of your side.

3. Make the unit turn inside out, push the tabs (E) - (H) by (-) screwdriver while pulling Front panel in the direction of

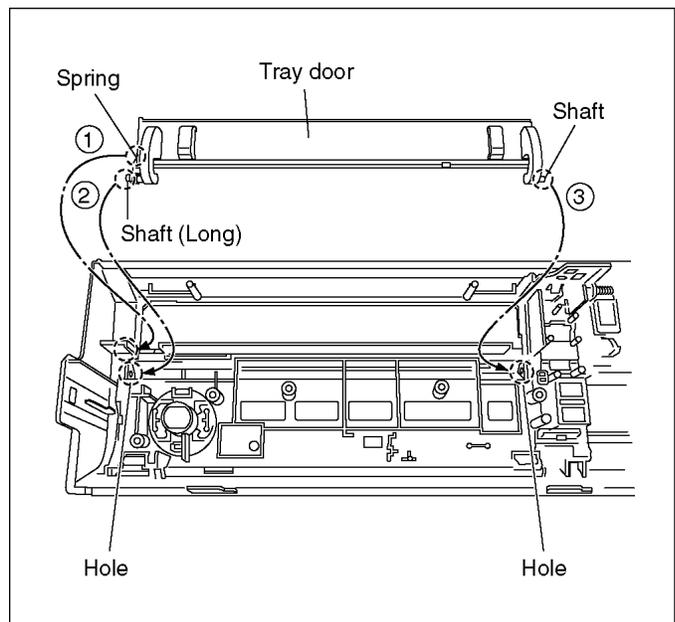

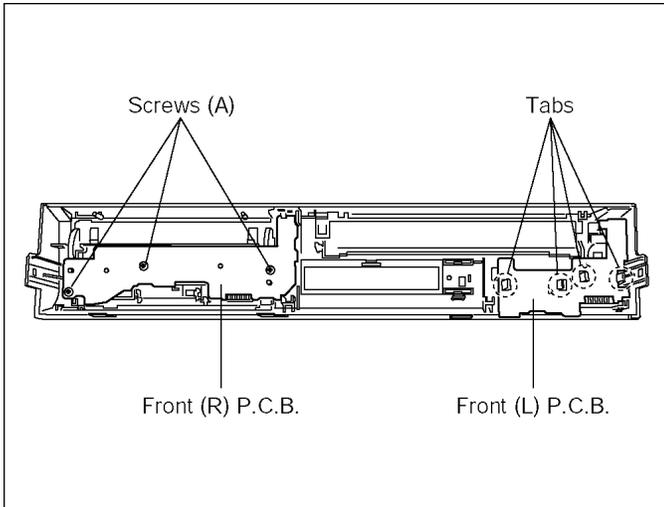

## 9.6. Front (L) P.C.B. & Front (R) P.C.B.

### 9.6.1. Front (L) P.C.B.

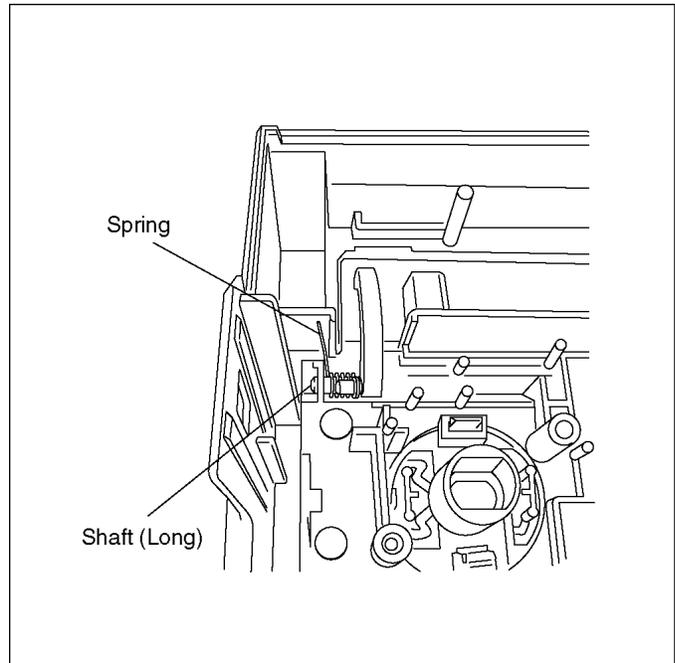

1. Remove 4 tabs to remove Front (L) P.C.B..

### 9.6.2. Front (R) P.C.B.

1. Remove 3 screws (A) and tab to remove Front (R) P.C.B..

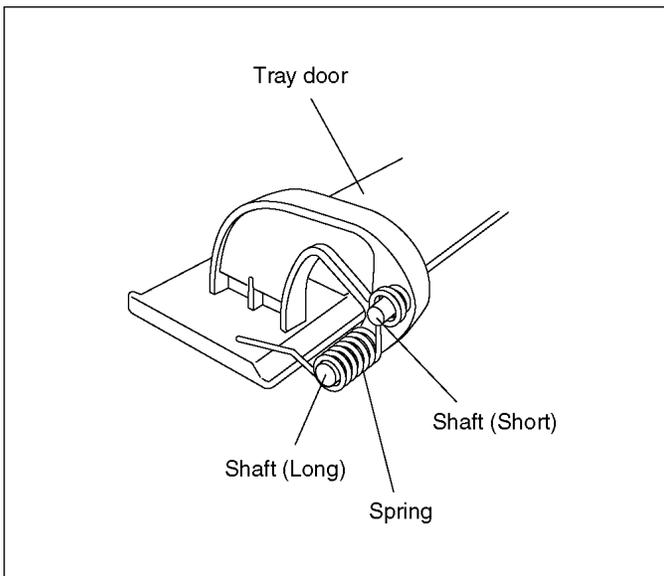

3. Confirm the Brinder spring is attached as following.

### 9.6.3. How to assemble Tray door ass'y

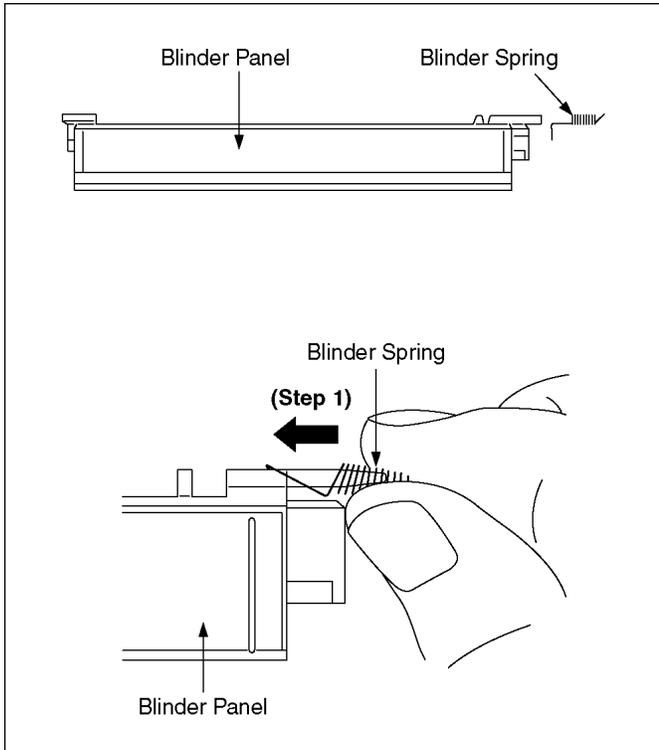

1. Attach Brinder spring to Tray door ass'y.

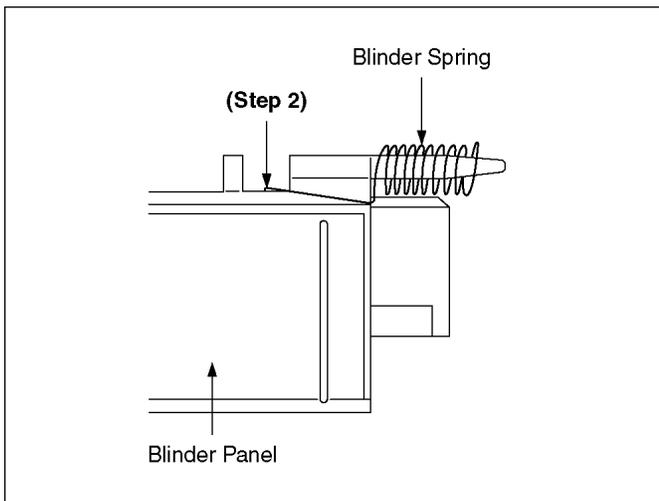

2. Attach Tray door ass'y in order from ① to ③.

- ①: Put the Brinder spring on the front panel.
- ②: Insert the shaft in the hole.
- ③: Insert the shaft in the hole.

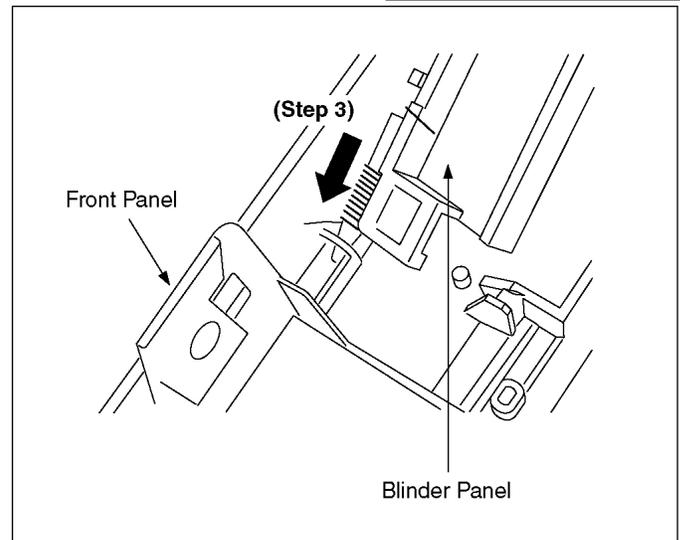

### 9.6.4. Assembly of Blinder Panel and Blinder Spring

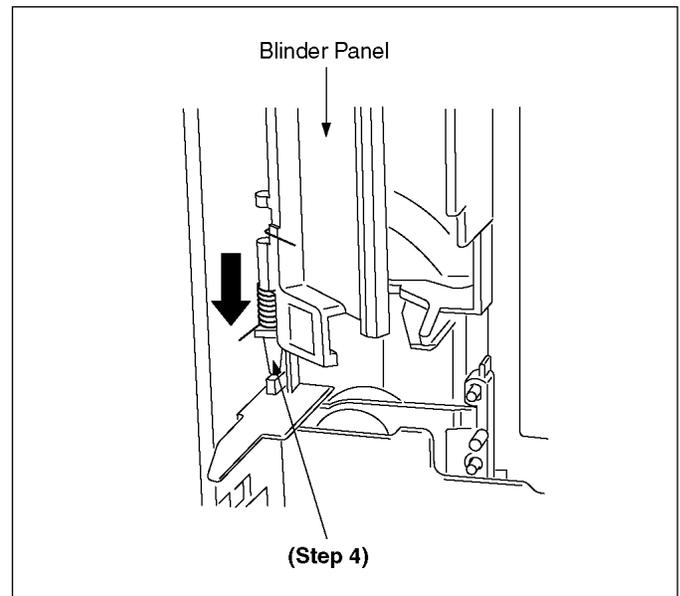

Step 1 : Insert Blinder Spring into shaft of Blinder Panel.

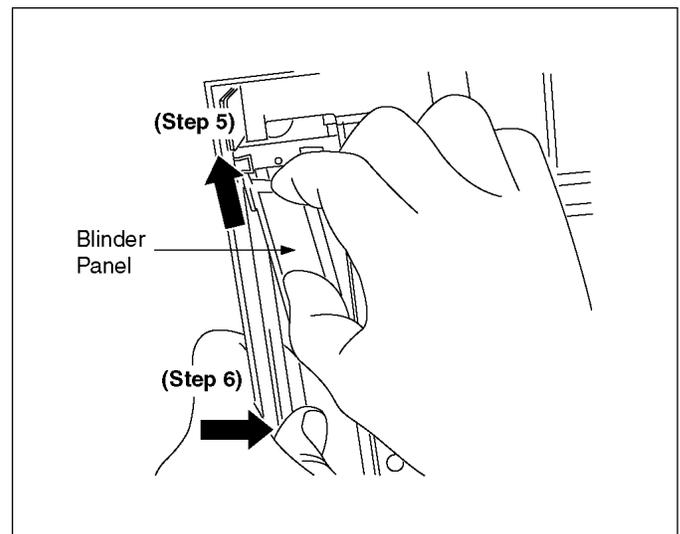

Step 2 : Hook Blinder Spring to bottom of the shaft.

Step 3 : Slide Blinder Panel into shaft hole of Front Panel.

Step 4 : Slide down Blinder Panel to touch the shaft on top of the rib.

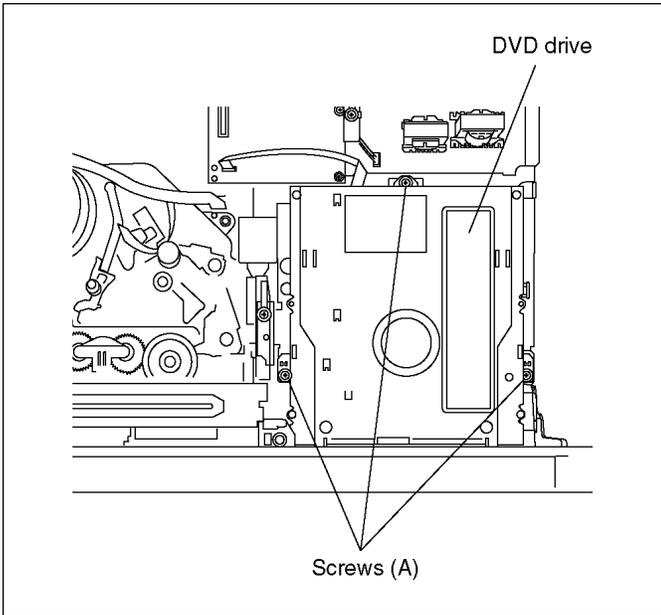

Step 5 : Push shaft into shaft hole.

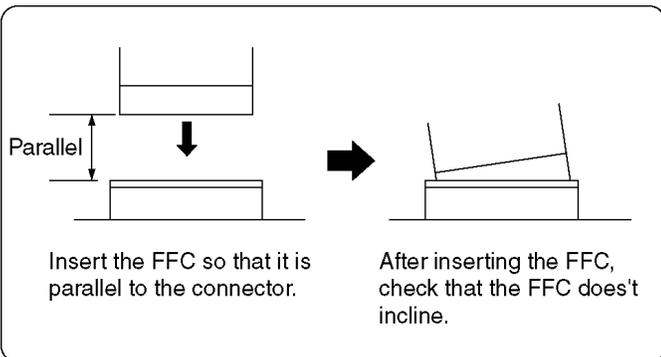

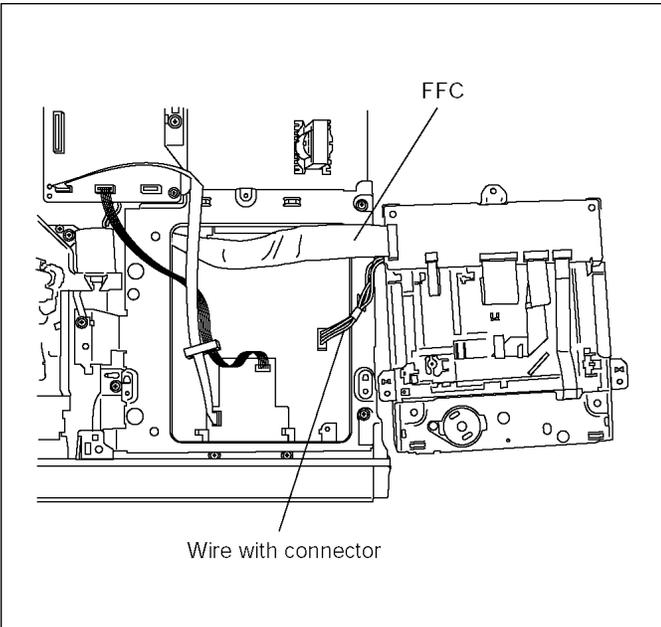

Step 6 : Press centre of Blinder Panel and bow down.

## 9.7. DVD drive

1. Remove 3 Screws (A).

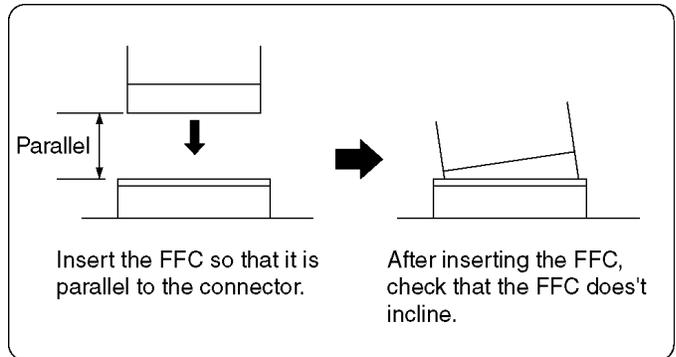

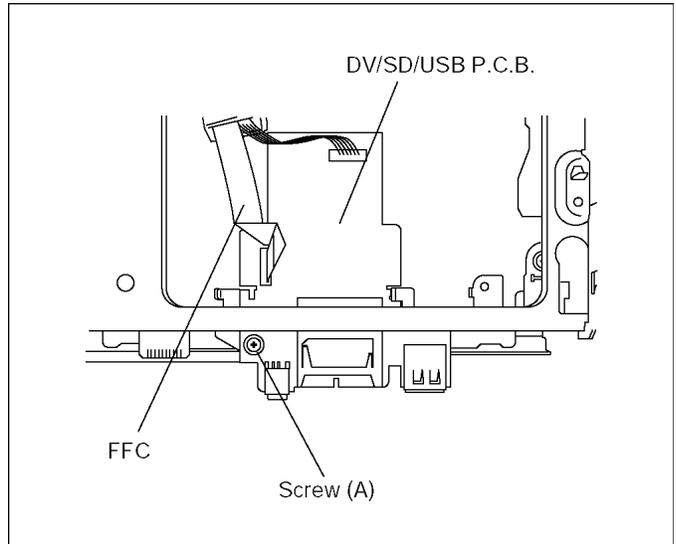

2. Disconnect FFC and Wire with connector, remove DVD drive.

## 9.8. DV/SD/USB P.C.B.

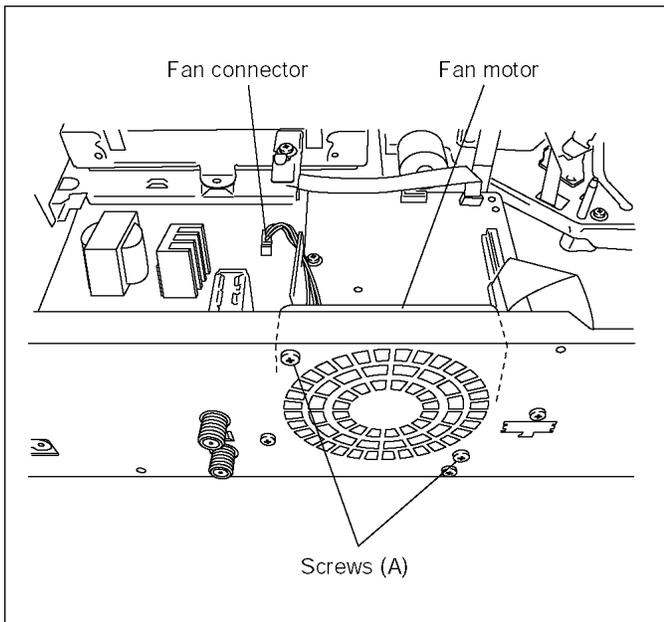

1. Remove 1 Screw (A) to remove DV/SD/USB P.C.B..

## 9.9. Rear Panel, Fan Motor

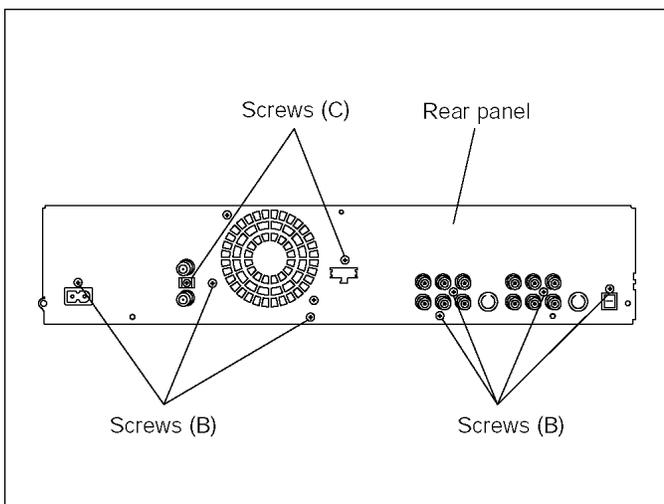

### 9.9.1. Only Fan motor

1. Disconnect Fan Connector.
2. Remove 2 Screws (A) to Remove Fan Motor.

### 9.9.2. Rear panel with fan motor

1. Disconnect Fan Connector.
2. Remove 7 Screws (B) and 2 Screws (C).
3. Unlock 2 Locking Tabs (A) to remove Rear Panel with Fan Motor.

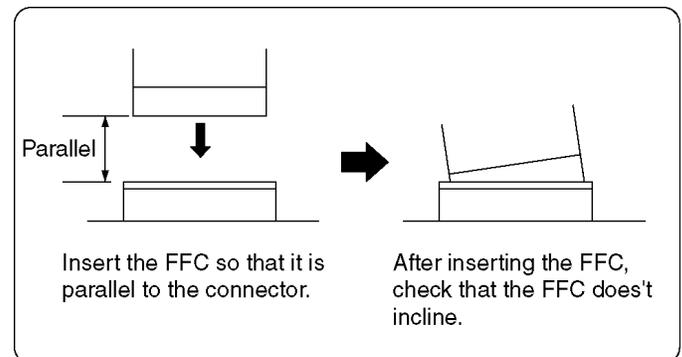

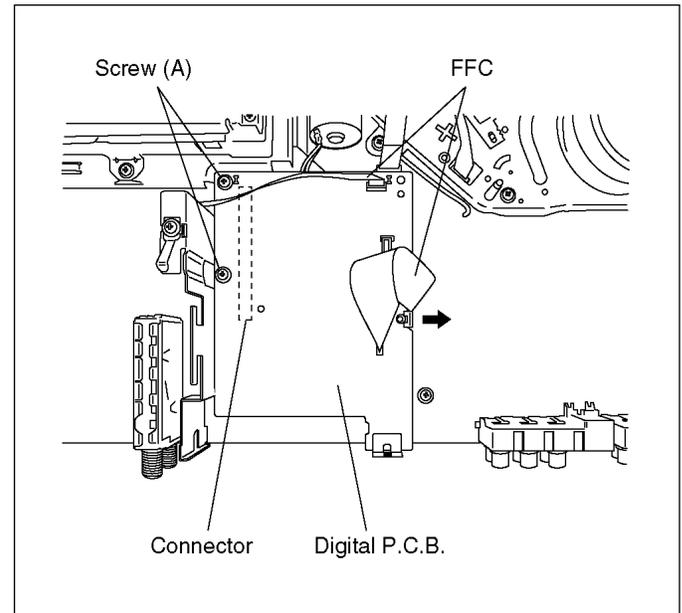

## 9.10. Digital P.C.B.

### Caution:

It is necessary to adjust PG shifter when replacing of Digital P.C.B.  
Because FROM as IC56002 have adjustment data for PG shifter.

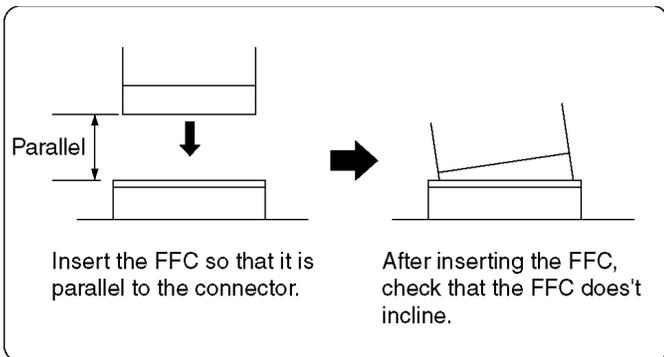

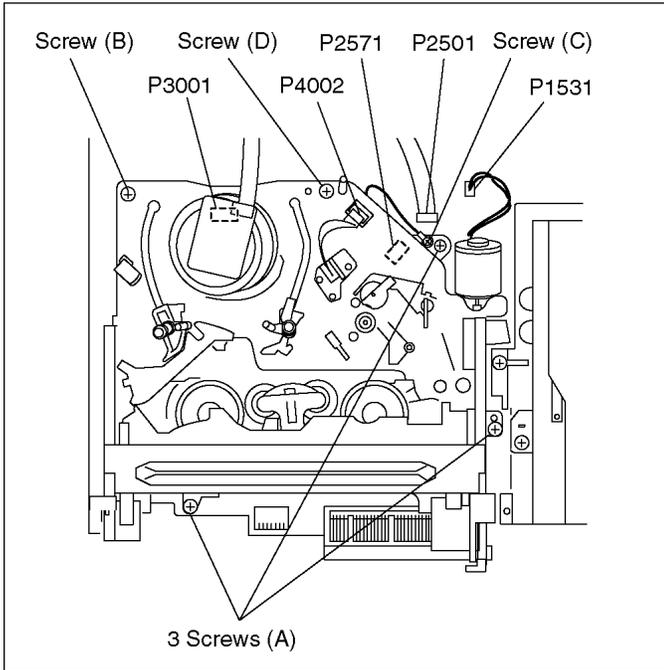

1. Remove 2 Screws (A) and 2 FFCs.

And lift up Digital P.C.B. slightly so to disconnect connectors to remove Digital P.C.B..

## 9.11. VTR Mechanism Unit

1. Disconnect 3 Connectors (P1531, P2501 and P4002).
2. Remove 3 Screws (A), Screw (B), Screw (C) and Screw (D).
3. Lift up VTR Mechanism Unit perpendicularly so to disconnect Connectors (P2571 and P3001).

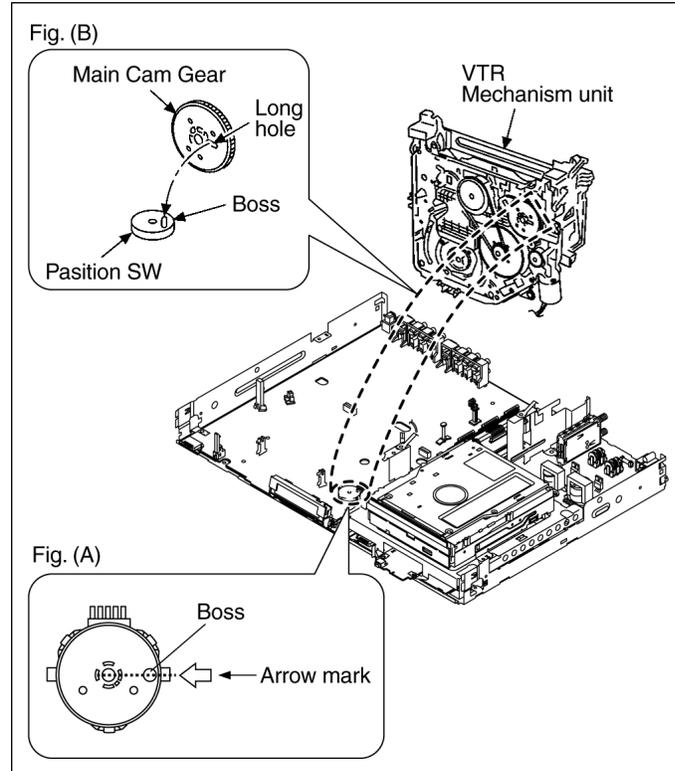

### Note:

Pay attention to stiff connections of P2571 and P3001, when removing VTR Mechanism Unit.

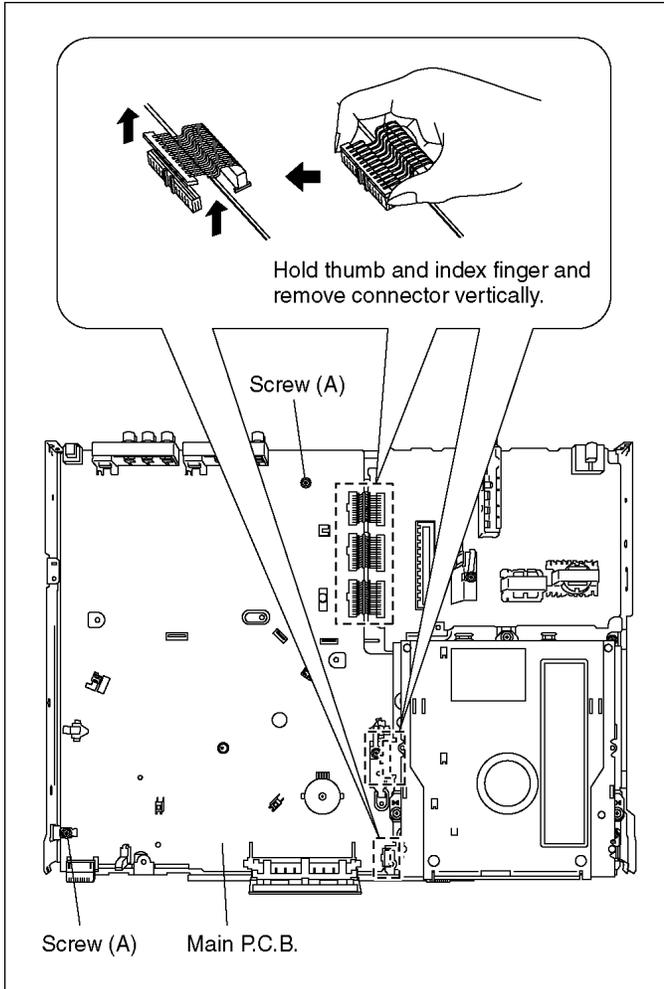

### 9.11.1. Caution for attaching VTR Mechanism Unit

1. Because Position SW should be set to "Eject Position", refer to fig.(A) and set the position switch so that the boss and arrow mark come on a straight line.
2. Attach VTR Mechanism Unit so that Boss of Position SW is put into long hole of Main Cam Gear, refer to Fig. (B).

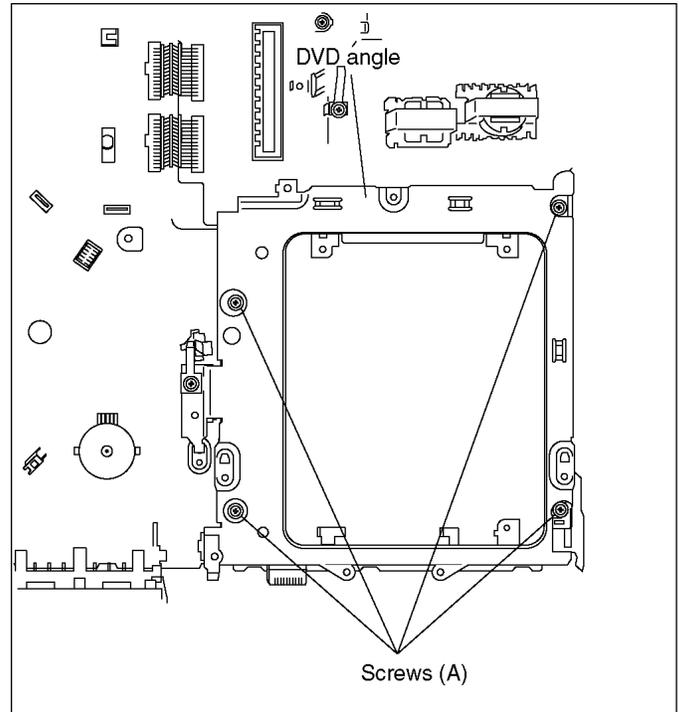

## 9.12. Main P.C.B.

1. Disconnect 4 Connectors.
2. Remove 2 Screws (A) and remove Main P.C.B.

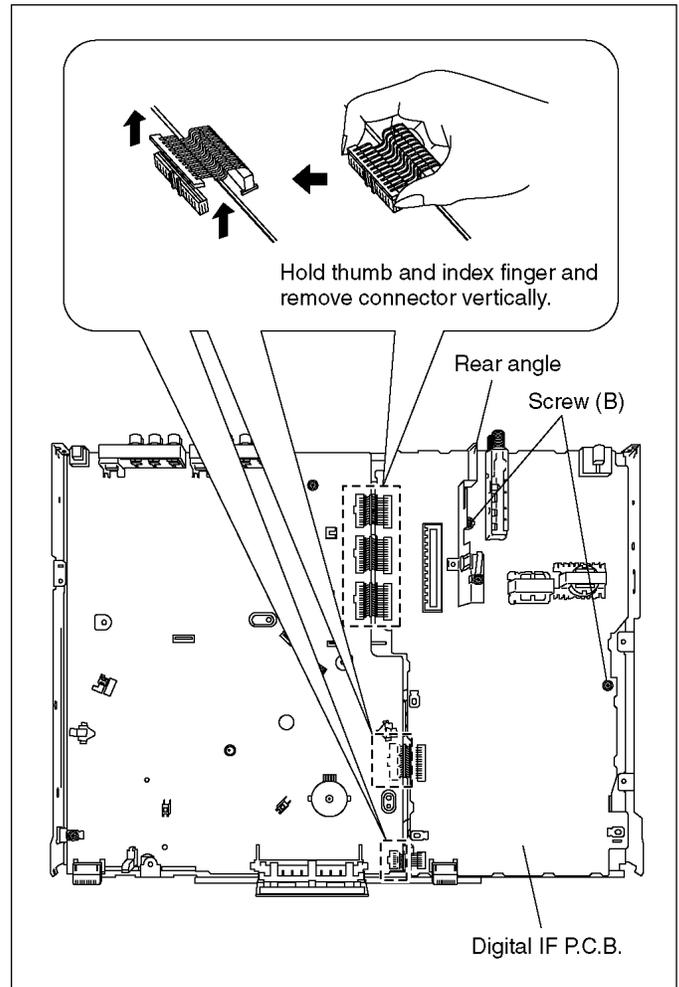

## 9.13. Digital I/F P.C.B.

1. Remove 4 Screws (A) to remove DVD angle.

2. Disconnect 4 Connectors.
3. Remove the Screw (B) to remove Digital I/F P.C.B. after removed Rear angle.

# 10 Measurements and Adjustments

## 10.1. Service Positions

### Note:

For description of the disassembling procedure, see the section 9.

### 10.1.1. Checking and Repairing of Power & Digital I/F P.C.B.

#### 1. Top Cover

Remove 4 Screws (A) on side.

Remove 3 Screws (B) on rear.

Remove Top Cover.

#### 2. Front Panel

Remove 1 Screw (A) on center.

Unlock 4 Locking Tabs (A),(B),(C),(D).

Unlock 4 Locking Tabs (E),(F),(G),(H) on bottom to remove Front Panel

#### 3. DVD Drive

Remove 3 Screws (A) fixing DVD Drive.

Left up DVD Drive slightly.

Remove Cable between DVD Drive and Power & Digital P.C.B..

Remove FFC between DVD Drive and Digital P.C.B..

Remove DVD Drive and put it beside chassis.

#### 4. Digital P.C.B.

Disconnect 1 FFC from DVD Drive.

Disconnect 1 FFC from DV/SD/USB P.C.B..

Remove 1 Screw (A) on rear.

Remove 2 Screws (B) fixing Digital P.C.B..

Right up Digital P.C.B. slightly to remove it.

#### 5. DVD Angle with DV/SD/USB P.C.B.

Remove 5 Screws (A) fixing DVD Angle with DV/SD/USB P.C.B..

#### 6. Power & Digital I/F P.C.B.

Disconnect FAN Motor Connector.

Disconnect 5 Connectors (A) between Main P.C.B. and Power & Digital I/F P.C.B..

Remove 1 Screw (A), and 3 Screws (B) on rear.

Remove Power & Digital I/F P.C.B..

Connect an original FFC between Digital P.C.B. and DV/SD/USB P.C.B. and the foil side the Power & Digital I/F P.C.B. faces up

Connect Extension Cables.

\*between Main P.C.B. and Power & Digital I/F P.C.B. with (RFKZ0327/ RFKZ0240 x 3/ RFKZ0178).

\*between Main P.C.B. and Front (L) P.C.B. with (RFKZ0215).

\*between Main P.C.B. and Front (R) P.C.B. with (RFKZ0239).

\*between Power & Digital I/F P.C.B. and Fan Motor with (RFKZ0168).

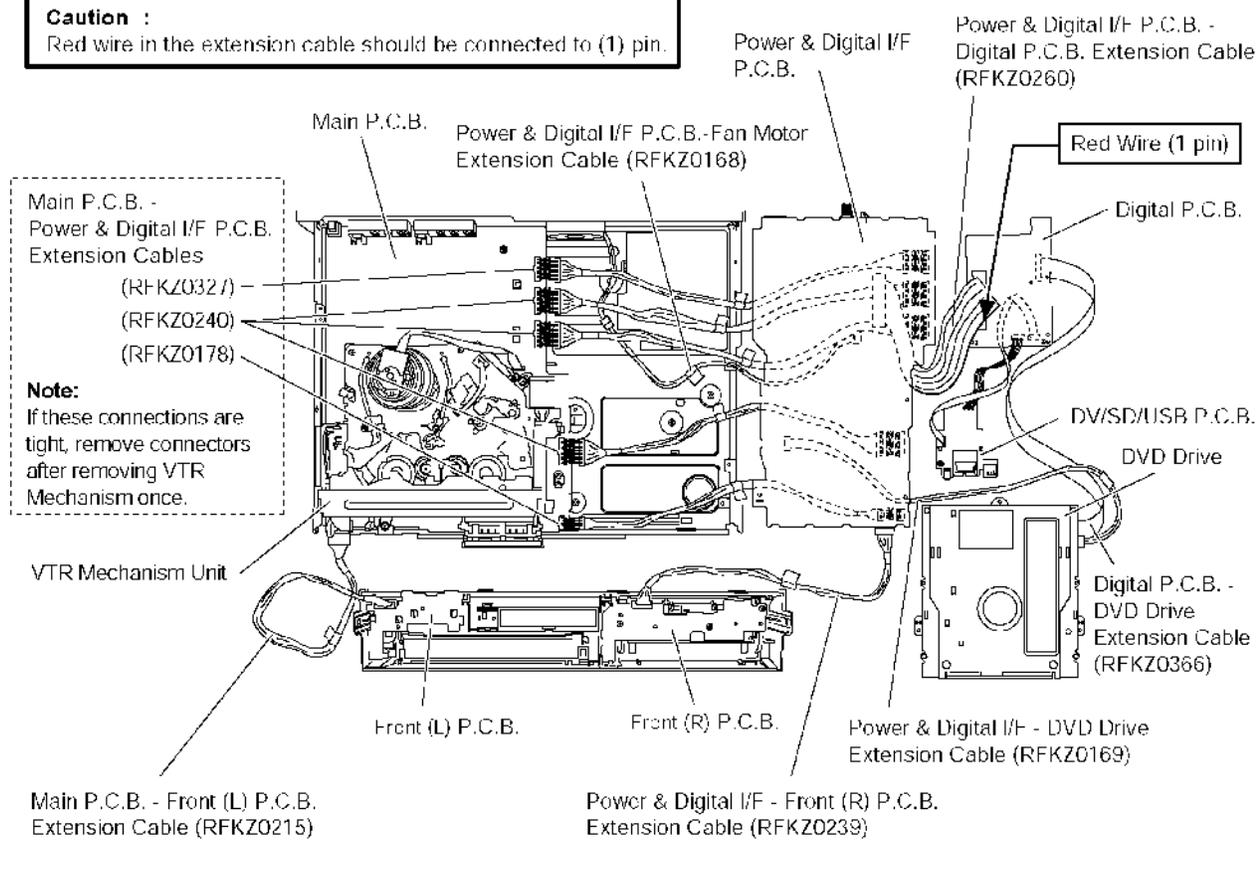

\*between Digital P.C.B. and Power & Digital I/F P.C.B. with (RFKZ0260).

\*between DVD Drive and Power & Digital I/F P.C.B. with (RFKZ0169).

\*between Digital P.C.B. and DVD Drive with (RFKZ0366).

#### Caution :

Red wire in the extension cable should be connected to (1) pin.

## 10.1.2. Checking and Repairing of Main P.C.B.

### 1. Top Cover

Remove 4 Screws (A) on side.

Remove 3 Screws (B) on rear.

Remove Top Cover.

### 2. Front Panel

Remove 1 Screw (A) on center.

Unlock 4 Locking Tabs (A),(B),(C),(D).

Unlock 4 Locking Tabs (E),(F),(G),(H) on bottom to remove Front Panel

### 3. DVD Drive

Remove 3 Screws (A) fixing DVD Drive.

Left up DVD Drive slightly.

Remove Cable between DVD Drive and Power & Digital P.C.B..

Remove FFC between DVD Drive and Digital P.C.B..

Remove DVD Drive and put it beside chassis.

### 4. Digital P.C.B.

Disconnect 1 FFC from DVD Drive.

Disconnect 1 FFC from DV/SD/USB P.C.B..

Remove 1 Screw (A) on rear.

Remove 2 Screws (B) fixing Digital P.C.B..

Right up Digital P.C.B. slightly to remove it.

### 5. DVD Angle with DV/SD/USB P.C.B.

Remove 5 Screws (A) fixing DVD Angle with DV/SD/USB P.C.B..

### 6. VTR Mechanism Unit

Disconnect 3 Connectors.

Remove 3 Screws (A), Screw (B), Screw (C), Screw (D).

Left up VTR Mech. Unit to remove it.

### 7. Main P.C.B.

Disconnect 5 Connectors (A) between Main P.C.B. and Power & Digital I/F P.C.B..

Remove 2 Screws (A) fixing Main P.C.B., and 3 Screws (B) on rear.

Remove Main P.C.B..

Attach VTR Mechanism Unit on to Main P.C.B..

Tighten Screw (C) with Earth Wire.

Tighten Screw (D) beside Screw (C).

Insert 1 Connector and 2 FFCs.

Hold Main P.C.B. with VTR Mechanism, make it upside-down, and put it.

Connect Extension Cables.

\*between Main P.C.B. and Power & Digital I/F P.C.B. with (RFKZ0327/ RFKZ0240 x 3/ RFKZ0178),

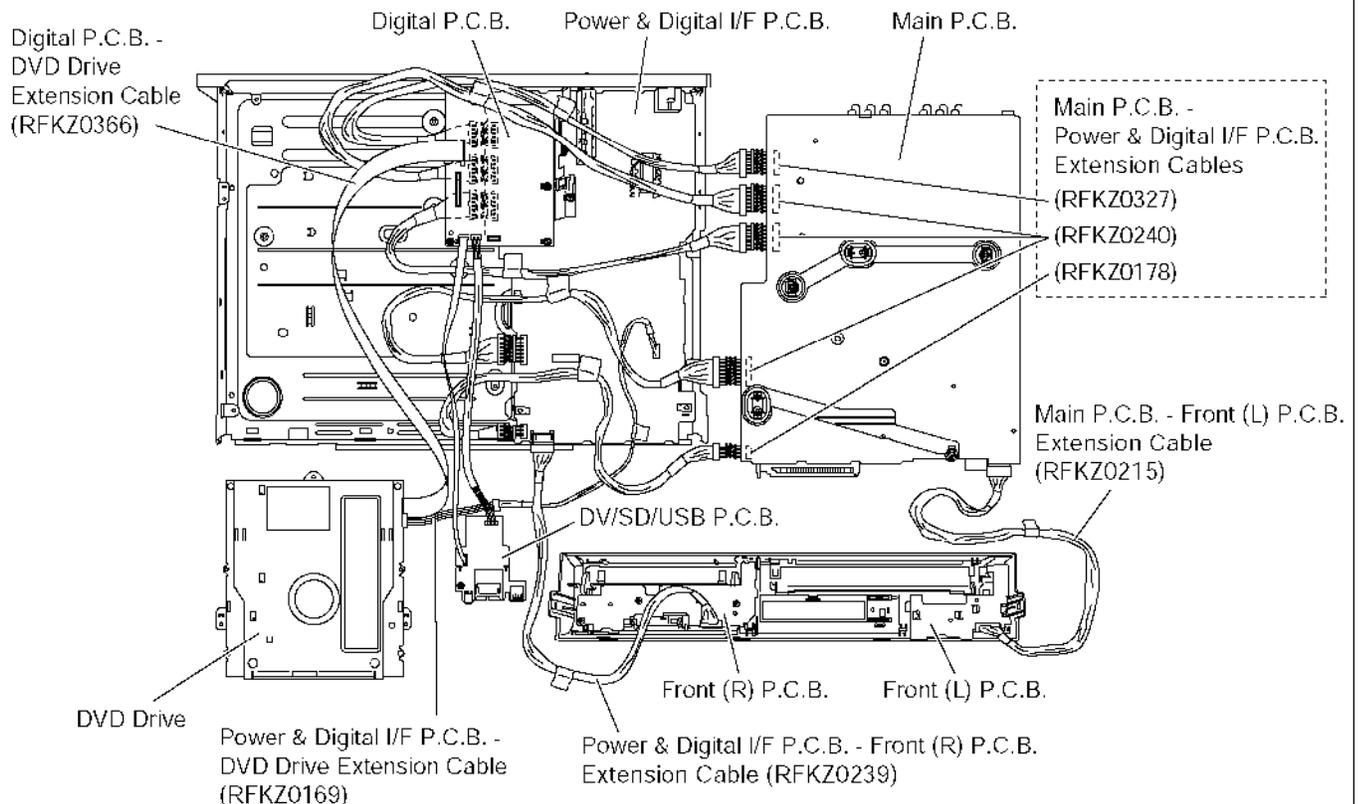

\*between Main P.C.B. and Front (L) P.C.B. with (RFKZ0215),

\*between Main P.C.B. and Front (R) P.C.B. with (RFKZ0239),

\*between DVD Drive and Power & Digital I/F P.C.B. with (RFKZ0169),

\*between Digital P.C.B. and DVD Drive with (RFKZ0366).

**Caution** : Red wire in the extension cable should be connected to (1) pin.

### 10.1.3. Checking and Repairing of Digital P.C.B.

#### 1. Top Cover

Remove 1 Screws (A) on side.

Remove 3 Screws (B) on rear.

Remove Top Cover.

#### 2. DVD Drive

Remove 3 Screws (A) fixing DVD Drive.

Left up DVD Drive slightly.

Remove Cable between DVD Drive and Power & Digital I/F P.C.B.

Remove FFC between DVD Drive and Digital P.C.B..

Remove DVD Drive and put it beside chassis.

#### 3. Digital P.C.B.

Disconnect 1 FFC from DVD Drive.

Disconnect 1 FFC from DV/SD/USB P.C.B..

Remove 1 Screw (A) on rear.

Remove 2 Screws (B) fixing Digital P.C.B..

Right up Digital P.C.B. slightly to remove it.

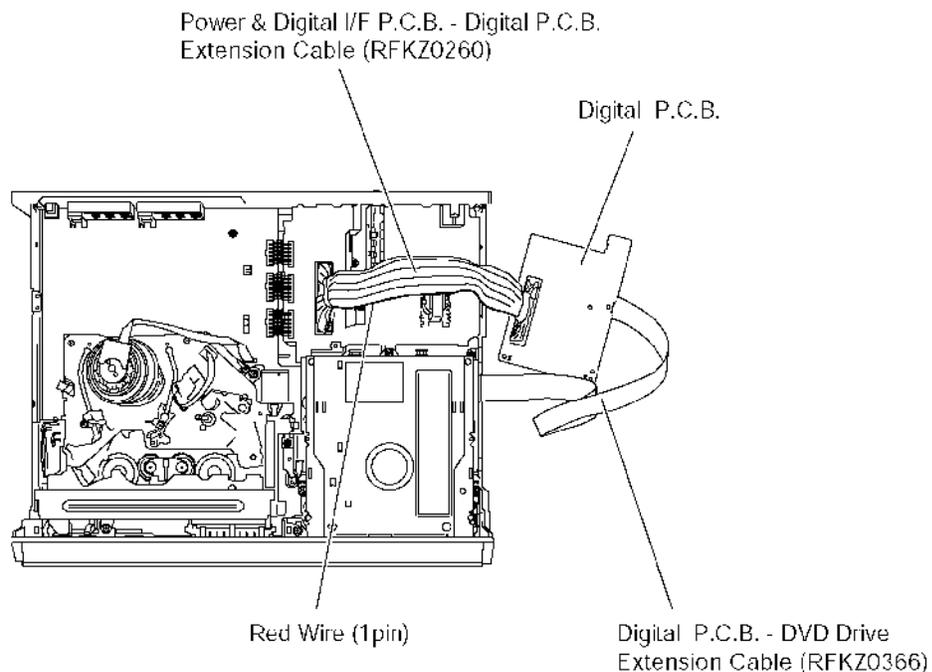

Attach DVD Drive to DVD Angle and connect 1 connector from Power & Digital I/F P.C.B..

Connect Extension Cables,

\*between Digital P.C.B. and Power & Digital I/F P.C.B. with (RFKZ0260),

\*between Digital P.C.B. and DVD Drive with (RFKZ0366).

**Caution** : Red wire in the extension cable should be connected to (1) pin.

## 10.1.4. Checking and Repairing of DVD

### 1. Top Cover

Remove 4 Screws (A) on side.

Remove 3 Screws (B) on rear.

Remove Top Cover.

### 2. DVD Drive

Remove 3 Screws (A) fixing DVD Drive.

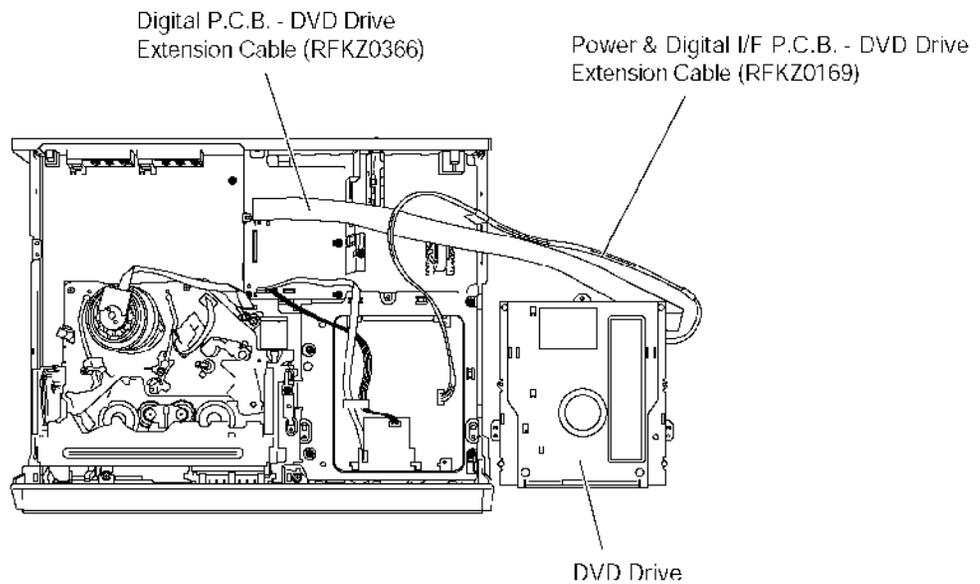

Left up DVD Drive slightly.

Remove Cable between DVD Drive and Power & Digital I/F P.C.B.

Remove FFC between DVD Drive and Digital P.C.B..

Remove DVD Drive and put it beside chassis.

Connect Extension Cables,  
 \*between DVD Drive and Power & Digital I/F P.C.B. with (RFKZ0169),  
 \*between DVD Drive and Digital P.C.B. with (RFKZ0366).

## 10.2. Caution for Replacing Parts

### 10.2.1. Notice after replacing Digital P.C.B.

[TM L1] is displayed, after replacing Digital P.C.B.

Once power off, and start up again.

### 10.2.2. Items that should be done after replacing parts

√: Necessary      —: Unnecessary

	Obtain and register a new registration code. (*Note1)	PG Shifter Automatic Adjustment (*Note2)	X-VALUE & LINEARITY (P2 and P3 Posts) Adjustment (*Note3)	Update Firmware
DD Cylinder	—	√	√	—
Main P.C.B.	√	—	—	—
IC6001	—	—	—	—
IC7501	—	—	—	—
Digital P.C.B.	√	√	—	√
DVD Drive	—	—	—	√

#### \*Note1:

Please will always pass the customer “Warning for Customers Who Use the DivX Video-on-Demand content.” with the product and get it when you unavoidably exchange Digital P.C.B. (When the product is exchanged, it is the same.).

You must use print attached to service part (Digital P.C.B.) or must use copy of print below as “Warning for Customers who use the DivX Video-on-Demand content.”

Information needed without fail for the customer for whom it is used continuing DivX Video-on-Demand Service to “Manual for the customer” is recorded.

#### Appendix:

- \* Parts that memorize user’s information are only Nor-Flash on Digital P.C.B..
- \* The registration of Registration Code is possible for half a year up to 6 recorders up to 10 recorders a year. Replacement of Digital P.C.B. spends one of this.

Registration Code is memorized in Nor-Flash on Digital P.C.B..

If exchange Digital P.C.B., new registration Code differ from previous Registration Code will be generated.

In this case if your customer uses DivX Video-on-Demand service, he/she will no longer be able to play any content that he/she purchased under that same registration code.

Therefore your customer will need to obtain and register the new registration code.

\*Copy this page and cut on the dotted line and give the lower half to your customer.

### Warning for Customers who use the DivX Video-on-Demand content.

1. The registration code has been changed for the repair of the product or the product exchange.
2. Obtain and register a new registration code, otherwise you will no longer be able to play DivX Video-on-Demand content.
3. Follow the procedure on the DivX Video-on-Demand web site to register at <http://vod.divx.com/>

\* If you do not use the DivX Video-on-Demand content, please ignore this warning.

**\*Note2:**

## PG Shifter Automatic Adjustment Procedure

PROCEDURE		F.I.P. DISPLAY	
Turn on the Service Mode. 1. Set Drive Select to VHS and press the [STOP] and [EJECT] key simultaneously for more than 3 seconds.		00000	
Activate the Service Mode 2. (Auto tracking will be turned off) 2. Press the [STOP] and [EJECT] key simultaneously twice.		20000	
Put it in PG adjustment mode. 3. Press the EJECT key for more than 3 seconds.		2 00	
Set it adjustment No.1. 4. Press the CH UP key once.		2 100	
Insert the alignment cassette tape (VFM8080HQFP). 5. The PG Shifter Adjustment starts automatically.		2 100	
6. This display means that adjustment data was saved in memory.		For example: 055F	
Result	Success	Cassette tape is ejected automatically.	2 100
	Error	NG1 in the PG Shifter Automatic Adjustment (The cylinder rotation is unstable during the automatic adjustment.)	F20
		NG2 in the PG Shifter Automatic Adjustment (The vertical sync signal is lacked while over 5 seconds on the alignment tape.)	F21
		NG3 in the PG Shifter Automatic Adjustment (The installing position of Heads to the cylinder is out of specification.	F22
		NG4 in the PG Shifter Automatic Adjustment (The servo is not locked to the cylinder for more than 10 sec.)	F23
Exit from Service Mode. 7. Press [STOP] and [EJECT] keys simultaneously in 6 times. * Then the FIP becomes normal indication.		10:00 (Normal Indication)	

**\*Note3:**

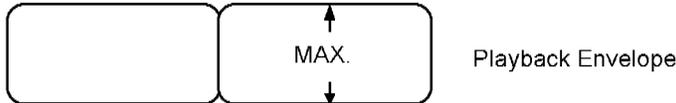

X-VALUE & LINEARITY (P2 and P3 Posts) Adjustment Procedure

1. Set the Auto Tracking to off.
  - (1) Set Drive Select to VHS and press the [STOP] and [EJECT] keys simultaneously for more than 3 seconds to enter Service Mode.
  - (2) Press [STOP] and [EJECT] keys simultaneously twice to activate Service Mode 2, and then Auto-Tracking is turned off.
2. Perform the X-VALUE ADJUSTMENT

X-VALUE ADJUSTMENT

1. After turning off the Auto tracking, playback the alignment Tape and press [CH UP] and [CH DOWN] keys simultaneously to adjust the tracking to FIX value.
2. Adjust A/C Head Base so that the envelope becomes maximum level. (It is described on "5-2. Tape Interchangeability Adjustment" in "R4 Mechanism" that is separated volume.)

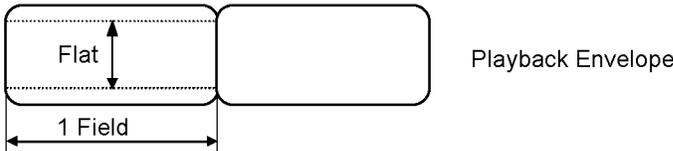

Alignment Tape	VFM8080HQFP
Test Point of Playback Envelope	TW3001 (or TW4502)

LINEARITY ADJUSTMENT

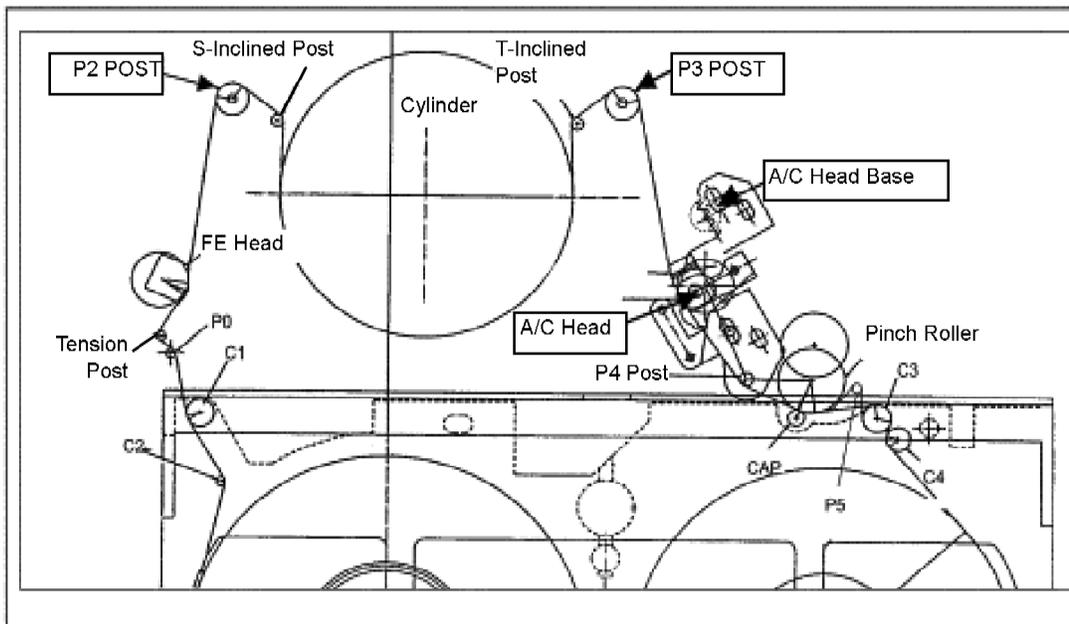

1. After turning off the Auto tracking, playback the alignment Tape and press [CH UP] and [CH DOWN] keys simultaneously to adjust the tracking to FIX value.
2. Adjust the LINEARITY so that the envelope is flat when moving tracking to (+) and (-) directions.

Alignment Tape	VFM8080HQFP
Test Point of Playback Envelope	TW3001 (or TW4502)

- Main symptoms and Adjustment point

Envelope	Post Name		Adjustment Method
	P2 Post		Turn P2 Post counter-clockwise (Approx. 1/2 revolution)
	P2 Post		Turn P2 Post clockwise (Approx. 1/4 revolution)
	P3 Post		Turn P3 Post clockwise (Approx. 1/2 revolution)
	P3 Post		Turn P3 Post counter-clockwise (Approx. 1/4 revolution)
	P2 Post		Turn P2 Post clockwise (Less than 1 revolution) Turn P3 Post counter-clockwise (Less than 1 revolution)
	P3 Post		

### 10.3. Standard Inspection Specifications after Making Repairs

After making repairs, we recommend performing the following inspection, to check normal operation.

No.	Procedure	Item to Check
1	Turn on the power, and confirm items pointed out.	Items pointed out should reappear.
2	Insert RAM disc.	The Panasonic RAM disc should be recognized.
3	Enter the EE (TU IN / AV IN - AV OUT) mode.	No abnormality should be seen in the picture, sound or operation.
4	Perform auto recording and playback for one minute using the RAM disc.	No abnormality should be seen in the picture, sound or operation. *Panasonic DVD-RAM disc should be used when recording and playback.
5	If a problem is caused by a VCD, DVD-R, DVD-Video, Audio-CD, or MP3, playback the test disc.	No abnormality should be seen in the picture, sound or operation.
6	Models with SD Card Slot or DV Input Jack: In case of that the trouble is caused by SD card and/or DV terminal.	Models with SD Card or DV Input Jack: 1) SD Card: Check to be able to display and copy the picture. 2) DV terminal: Check to be able to record from DVC.
7	After checking and making repairs, upgrade the firmware to the latest version.	Make sure that [UPD OK] appears in the FL displays.

#### Caution for updating Firmware

Firmware of this model is compulsively changed even if new version has already been installed in product.  
UNFORMAT in not displayed.  
Please confirm firm version of the product before update, to avoid making down version.

step1. Confirm firm version of the product

- Press [CH UP] + [OPEN/CLOSE] + [REC] buttons of product simultaneously for 5 seconds to turn it in Service Mode.
- Press [0] [2] of the remote controller.  
Region code/ MAIN firm version/ TIMER firm version/ DRIVE firmware version/ ROM Correction version is displayed in this order.

step2. Compare Main firm version and Drive firm version of FL display with versions of updating disc.

For Example:

Versions of updating disc		Versions of FL display		Judgment of updating disc	Descriptions
Main firm	Drive firm	Main firm	Drive firm		
3090U5	S126	3090U5	S155	NG	If this updating disc was used, the product will be made down version. 1. Download latest firmware from TSN System, and burn it to CD-R or CD-RW. 2. Update product with this downloaded latest firmware.
3010C5	S155	3040C5	S155		
3090U5	S155	3090U5	S126	OK	If this updating disc was used, the product will be made up version.
3040C5	S155	3010C5	S155		

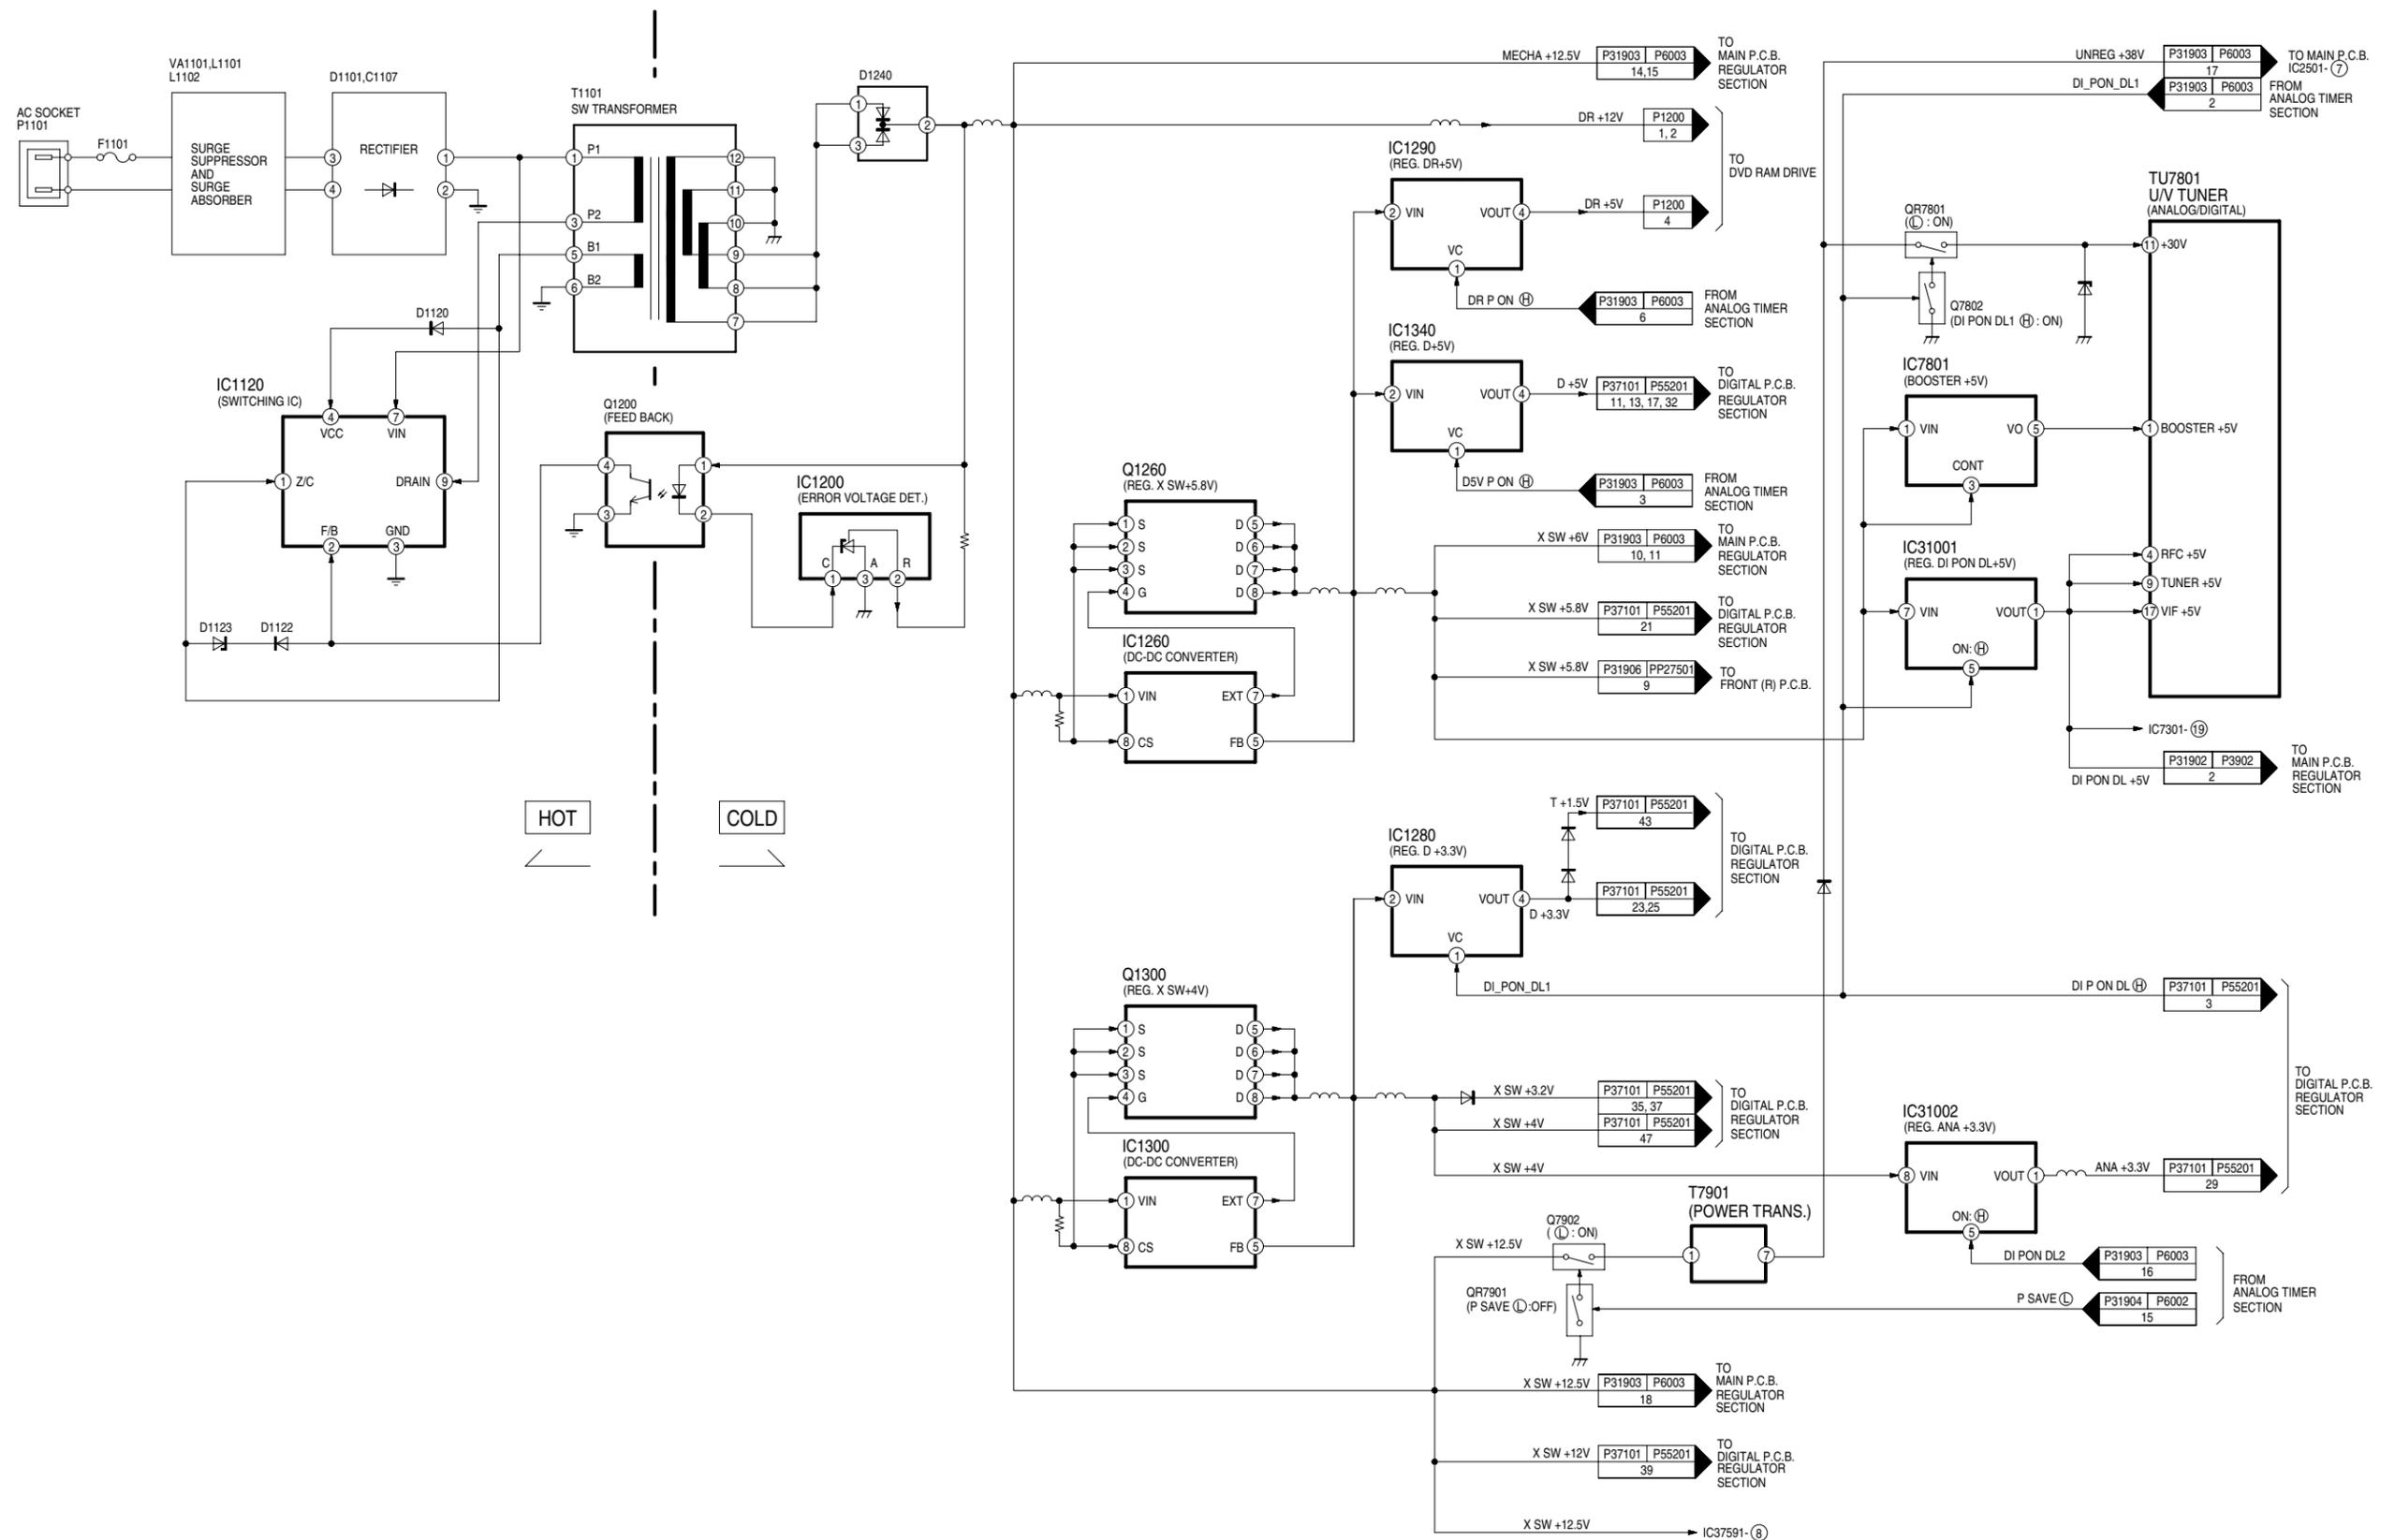

8	Transfer [9][9] in the service mode setting, and initialize the service settings (return various settings and error information to their default values. The laser time is not included in this initialization).	Make sure that [CLR] appears in the FL display. After checking it, turn the power off.
---	--	---

Use the following checklist to establish the judgement criteria for the picture and sound.

Item	Contents	Check	Item	Contents	Check
Picture	Block noise		Sound	Distorted sound	
	Crosscut noise			Noise (static, background noise, etc.)	
	Dot noise			The sound level is too low.	
	Picture disruption			The sound level is too high.	
	Not bright enough			The sound level changes.	
	Too bright				
	Flickering color				
	Color fading

# 14 Appendix for Schematic Diagram

## 14.1. Voltage and Waveform Chart

### Note)

Circuit voltage and waveform described herein shall be regarded as reference information when probing defect point, because it may differ from an actual measuring value due to difference of Measuring instrument and its measuring condition and product itself.

# 15 Parts and Exploded Views

## 15.1. Exploded Views

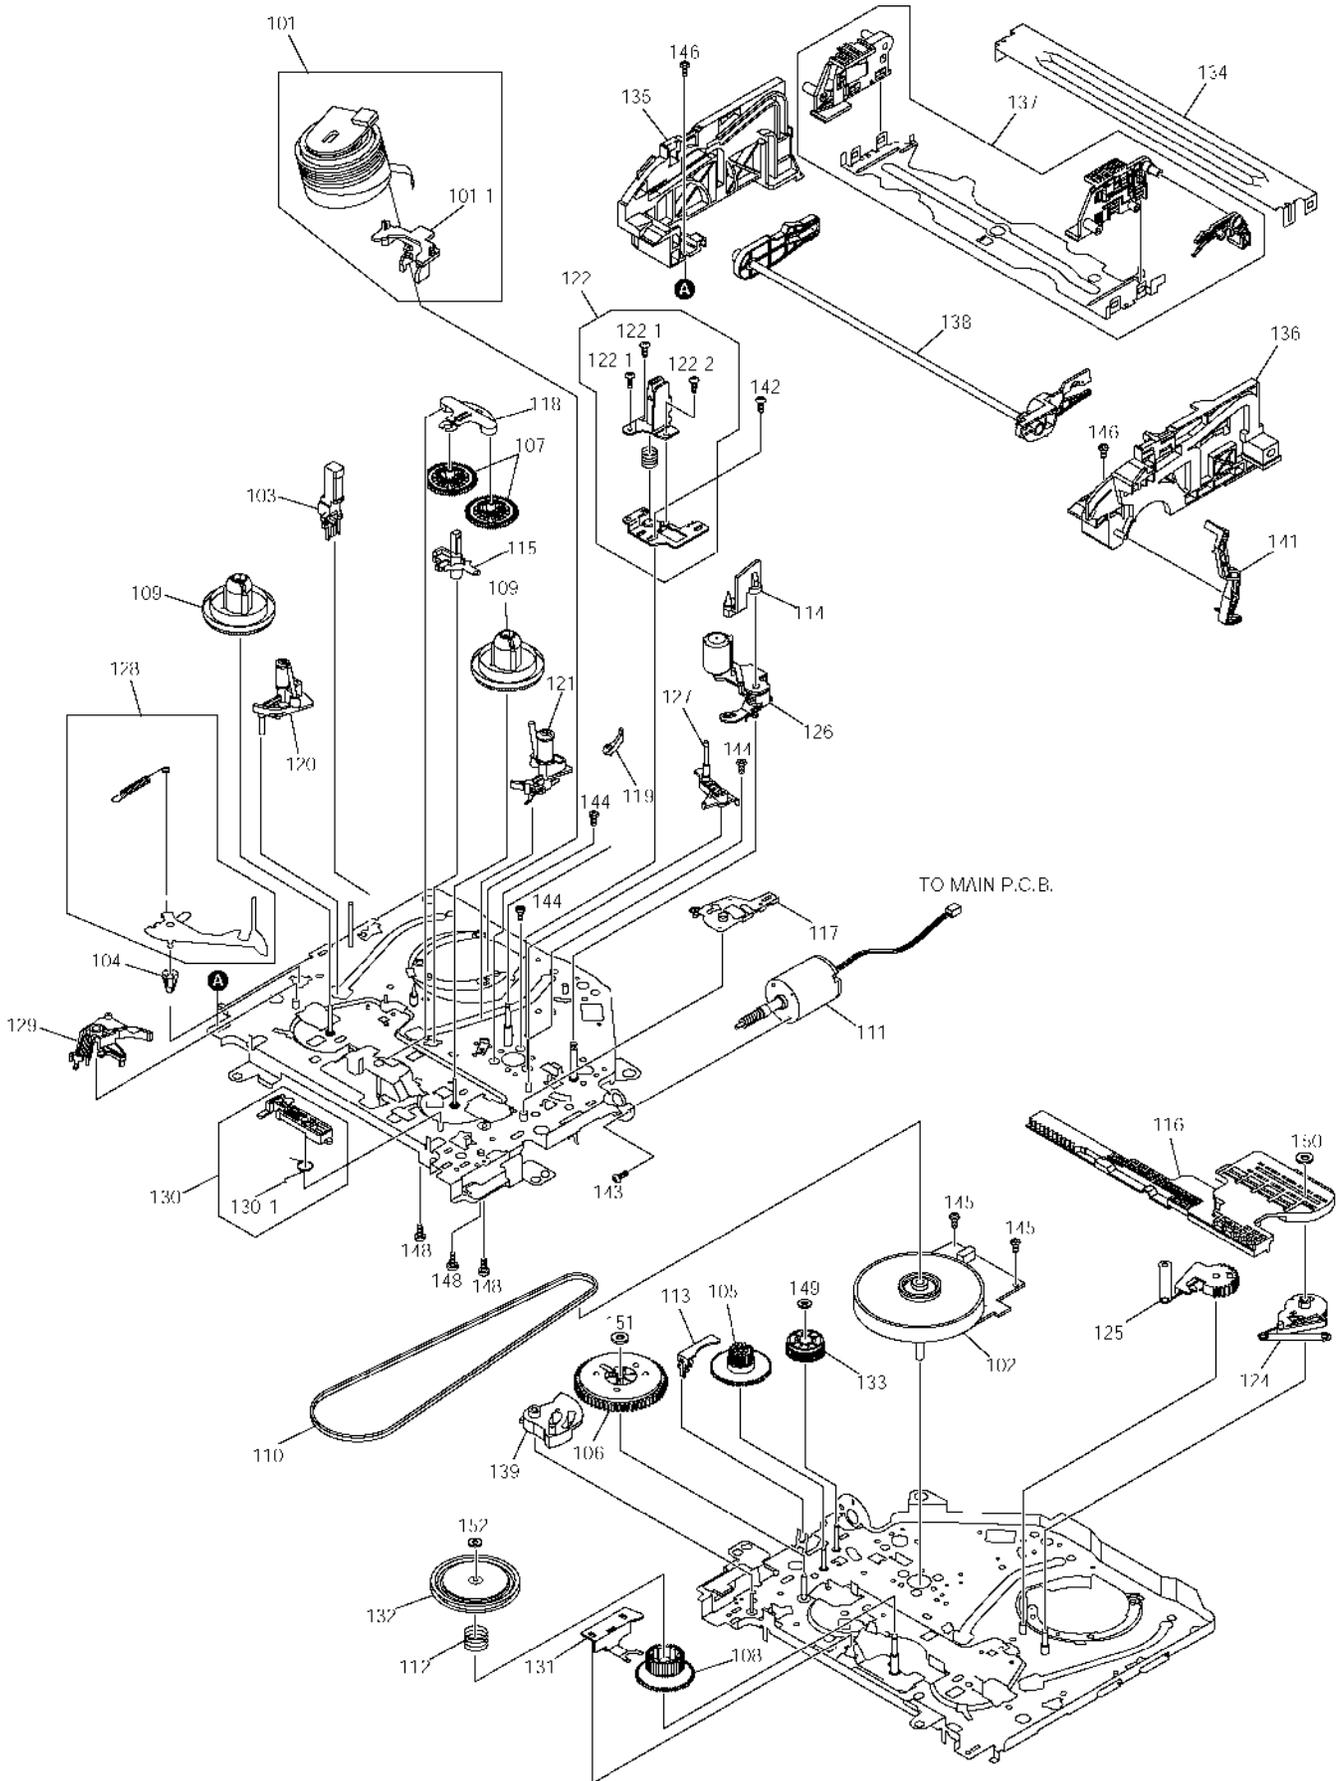

### 15.1.1. Casing Parts & Mechanism Section1

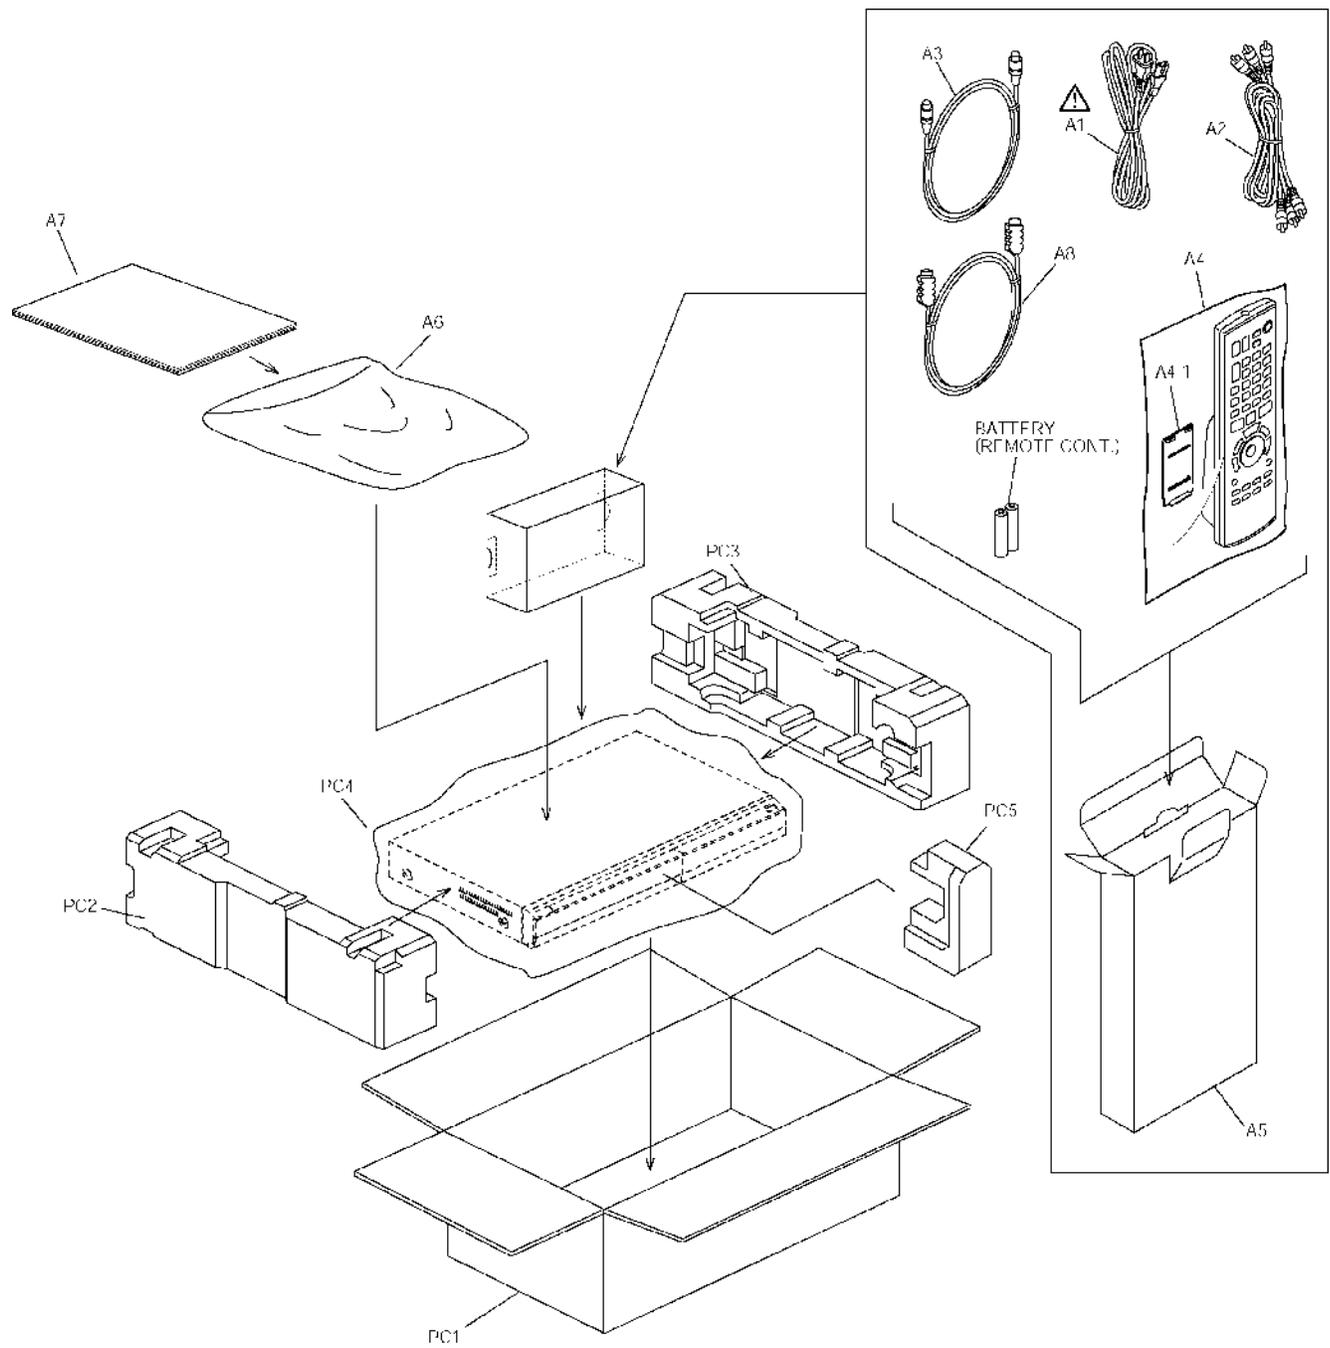

## 15.1.2. Casing Parts &amp; Mechanism Section 2

### 15.1.3. VHS Mechanism Section

### 15.1.4. Packing & Accessories Section

## 15.2. Replacement Parts List

### Notes:

\*Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufactures specified parts shown in the parts list.

\*Warning: This product uses a laser diode. Refer to caution statements.

\*Capacity values are in microfarads ( $\mu\text{F}$ ) unless specified otherwise, P=Pico-farads (pF), F=Farads (F).

\*Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM).

\*The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.

\*“(IA), (IB)”, marks in Remarks indicate languages of instruction manuals. [(IA): English, (IB): Canadian French]

\*All parts are supplied by PAVCSG.
