

HIGH-EFFICIENCY FRONT-LOAD

LAUNDRY INNOVATION

KEEPS CLOTHES LOOKING NEWER LONGER*

The new Whirlpool® Duet® laundry pair uses intuitive 6th Sense® Technology to provide optimal cleaning for each unique load, to help keep clothes staying rich and bright.

Duet™
fabric care system

*Compared to traditional top-load laundry.

EXCLUSIVE 6TH SENSE® TECHNOLOGY FROM WHIRLPOOL BRAND **KEEPS CLOTHES LOOKING NEWER LONGER***

FEATURES IN THE WASHER – Provide optimal cleaning with gentle fabric care

PRECISION DISPENSE ULTRA
Dispenses the optimal amount of detergent based on each individual load, to help **keep colours staying rich and bright.**

ADAPTIVE WASH ACTIONS
With up to 16 different wash actions, Duet® washers adapt to the fabric and cycle selected, for **gentle fabric care.**

FEATURES IN THE DRYER – Help prevent over-drying

ADVANCED MOISTURE SENSING
Three active built-in sensors read incoming air temperature, exhaust temperature and moisture levels, so drying cycle ends as soon as the load is dry to **help prevent over-drying.**

ADAPTIVE TUMBLING
No matter what type of fabric is being dried, the cycle adapts to **ensure even drying.**

*Compared to traditional top-load laundry.

DUET® FRONT-LOAD LAUNDRY FEATURES

FANFRESH™ OPTION WITH DYNAMIC VENTING TECHNOLOGY™ (DVT)

The **built-in washer fan** activates after the wash cycle is over, tumbling clothes for up to 16 hours. Small loads can be washed and dried right in the washer,* or the fan can start drying out the washer between cycles.

QUIET SPIN 360 TECHNOLOGY

Duet™ washers offer the ultimate vibration control even when handling the largest loads. The **6-point suspension system** and **2 balance rings** each with **26 ball bearings**, work to easily maintain control of large loads at top speeds. The **accelerometer** measures the washer's movement to recalibrate for each load.

ECOBOOST™ OPTION

When the EcoBoost™ option is activated in the washer and dryer, overall energy use is lowered, without compromising performance. **In the washer**, energy is saved with lower water temperature and increased spin speed. **In the dryer**, this option slightly extends the cycle time, while using half the wattage.
