**MANUAL ON BUSDUCT – PUBLICATION NO. 318 -
COST : RS. 1500/-**

'Bus duct' in electrical power system forms a vital link for transfer of power with reliability and efficiency. To match with the fast growth in the power sector, development and up-gradation of bus duct design, manufacturing processes/technology, quality requirements and accessories involved requires a consolidated documented guidelines/manual for the use of all utilities and manufacturers. Presently not much of documented technical information is available in the country for Bus Duct except National/International Standards.

The Central Board of Irrigation of Power, realizing the requirement and demand was firstly published Manual on Busduct in 2007. To incorporate the latest developments and to facilitate the professional engineers associated in the field; this Manual has been updated now. This manual covers all aspects of bus duct like Type of Bus Ducts, Design Requirements & Criteria, Layout, Specifications, Accessories, Supporting Structures, Manufacturing guidelines and Quality requirements, Testing requirements, Packing, Transportation and site Storage, Erection, Testing and Commissioning, Operation and Maintenance, Spare Parts Management etc. This document is outcome of the ceaseless efforts made by each & every member of the Expert Group.

**PROCEEDINGS OF TUNNELLING ASIA-2013: USING UNDERGROUND
SPACE FOR INFRASTRUCTURE PROJECTS: ISSUES AND
CHALLENGES 26-28 FEBRUARY 2013 AT NEW DELHI COST,
RS. 1000/-**

Proceedings containing the Keynote lectures and technical papers contributed by national and international tunnel experts working on the different tunnels and underground projects, about their experience and the use of high technology in the developed countries, the resulting problem and the solutions adopted for their mitigation and about the actual performance on ground. The input of information and experience both from national and international experts in the form of technical papers were taken up for discussions which may enable to draw some conclusions to recommend concrete action both on a short-term as well as long term perspective.

1. Planning, Investigation and Design of Tunnel, Cavern & Underground Projects;
2. Tunnels & Cavern Construction Technologies and Equipment;
3. Risk Management;
4. Urban tunnelling
5. Environmental and Social Impacts;
6. Safety Issues – Standards and Policies;
7. Contract Management and Financing of Underground Construction Works;
8. Research & Development

CD containing the PowerPoint presentations made by the professionals are compiled and available for sale along with the proceedings volume at a cost of Indian Rs.1000 /US \$ 50 including postage charges. Members of CBIP, TAI and ISRM (India) are offered 25% discount.

**WORKSHOP ON “ DESIGN, CONSTRUCTION AND RISK MANAGE-
MENT IN UNDERGROUND CONSTRUCTION**

CD containing the PowerPoint presentations made by International experts, Prof. Robert Galler from University of Leoben, Austria, Dr. Harald Wagnor, Mr. Stephen Lawry, Team Leader of General Consultant to DMRC and Mr. R.K. Vishnoi, General Manager – Design & Engg., THDC who made the presentations to cover the following topics during the Workshop is now available on sale at a price of Rs. 250/ \$ 20 Including postal charges.

- (i) Tunnel Design
- ii) Tunnel Construction
- iii) Risk Management
- (iv) Ground Improvement
- (v) Instrumentation and analysis of data
- (vi) Water drainage and water tightness

**HYDROELECTRIC PROJECTS IN INDIA – PUB. NO. 312 –
COST: RS. 5000/- (30% Discount)**

CBIP has brought out updated publication titled, “Hydroelectric Projects in India” which is a comprehensive publication giving complete information of all the hydro projects in the country whether under operation, construction, concurred by CEA, or these for which DPR/PFR has been prepared and those under survey and investigation etc.

**“EARTH REINFORCEMENT- DESIGN & CONSTRUCTION” –
PUBLICATION NO. 314 - COST: RS. 1000/- (25% Discount)**

The conventional retaining structures such as cantilever and counter-fort retaining walls are elaborate and require far more construction time. In a congested locality, there is a need to carry out the construction in a stipulated time. Hence, it is normally preferred to adopt earth reinforced structures. Geosynthetics have facilitated construction of such structures and enhanced their performance. These help in improving the strength of the soil manifold by making it strong enough to carry out the desired functionality satisfactorily.

The book is edited by Dr. G. Venkatappa Rao (Former Professor, Department of Civil Engineering, IIT Delhi and Past President, Indian Chapter of IGS), Dr. G.V.S. Suryanarayana Raju (President, Indian Chapter of IGS, and Engineer-in-Chief (R&B), Government of Andhra Pradesh), and is expected to serve the practicing engineers and other geosynthetic professionals, interested in the frontier areas of modern technology.

**PROCEEDINGS OF THE 6TH ASIAN ROCK MECHANICS SYMPOSIUM
ON “ADVANCES IN ROCK ENGINEERING” – COST: RS. 1500/-**

ISRM International Symposium and the 6th Asian Rock Mechanics Symposium on “**Advances in Rock Engineering**” was jointly organized by the Indian National Group of ISRM and Central Board of Irrigation and Power, in New Delhi during 25-27 October 2010. The proceedings of the Symposium contains extended abstracts of 166 papers from 27 countries selected for oral and poster presentations.

In addition, the proceedings contains the full texts of the following keynote lectures delivered by renowned experts from Australia, Canada, China, Israel, Italy, Japan, Singapore, U.K. and USA: • On Site Visualization as a New Paradigm for Field Measurement in Rock Engineering • Progress in the Understanding of Landslides from Massive Rock Slope Failure • Deep Injection Disposal: Environmental and Petroleum Geomechanics • Application of Intelligent Rock Mechanics Methodology to Rock Engineering • Modelling Dy-

dynamic Deformation in Natural Rock Slopes and Underground Openings with Numerical DDA Method • Underground Radioactive Waste Disposal — The Rock Mechanics Contribution • Rock Dynamics Research in Singapore: Fundamentals and Practices • The Large Open Pit Project • Deep Underground Instrumentation and Monitoring

**MANUAL ON ROCK MECHANICS – PUB. NO. 310 –
COST : RS. 2000/- (50% Discount)**

CBIP has published the revised edition of Manual on Rock Mechanics to reflect the then state-of-art knowledge of Indian Engineers in the field of Rock Mechanics with the following 19 chapters:

1. Rock Mechanics – Need and Scope.
2. Rock Mechanics- Basic Concepts
3. Laboratory Assessment of Rock.
4. Site Characterization – Quantitative Description of Discontinuities in Rock Masses.
5. Classification of Rocks Intact and Mass.
6. Geophysical Investigations.
7. Drilling for Geological Investigations
8. Laboratory Tests for Design.
9. State of Stress in Rock Mass.
10. Field Tests for Design.
11. Devices and Instruments to Measure Movements and Pressures.
12. Interpretation of Test Data.
13. Rock Loads and Tunnel Supports.
14. Design of Tunnels with Rock Support Interaction Analysis.
15. Design of Tunnel Lining.
16. Numerical Methods in Rock Engineering.
17. Foundation Treatment of Dams.
18. Rock Blasting for Underground and Open Excavations.
19. Shotcreting, including Some Case Histories

**MANUAL ON RENOVATION, MODERNIZATION AND LIFE EXTENSION
OF THERMAL POWER PLANTS – PUB. NO. 286 – COST: RS.1200/-
(DISCOUNT 50%)**

CBIP had brought out a publication titled, “Manual on Renovation, modernization and Life extension of Thermal Power Plants in 2003. This manual brings out an overview of R&M programme of Thermal Power Plants covering the historical background, present implementation status, potential available and investment requirements upto the year 2012 in the country.

The manual also deals with the methodology and engineering aspects of R&M listing out the aspects of damage mechanism of high pressure and temperature components, advancement in materials, various health assessment techniques, equipments, code of practices and facilities available in India.

**MANUAL ON DEVELOPMENT OF SMALL HYDROELECTRIC PROJECTS
PUB. NO. 305 – COST: RS. 1000/- (50% Discount)**

CBIP, IASH has brought out above Manual cum Guidebook which intends to provide basic knowledge to the various professionals/others about various steps to be taken while formulating a small hydroelectric scheme. The manual also familiarizes about various components of small hydro power projects and provide good working knowledge and guidance on data collection, investigation and essential computation for project report etc. This manual will be a ready reckoner for a range of stakeholders in the development of small hydropower project and interalia covers the latest information and data on Policy and Regulatory Mechanisms, Proper selection of Equipments and Equipment Manufacturers, Design: Civil Engineering and Electro-mechanical, Hydrology, Geology, Forestry and Environmental issues, Financing Including CDM & Case Studies.
